
Contents

1	Magnetic Resonance and Dementia	1
1.1	Introduction	1
1.2	Brain Atrophy in Normal Aging	1
1.2.1	General Brain Atrophy	2
1.2.2	Temporal Lobe Atrophy	2
2	Magnetic Resonance: Applications in Dementia	5
2.1	Magnetic Resonance Techniques	5
2.1.1	Overview of Available MR Techniques	5
2.2	Image Processing Techniques	20
2.2.1	ROI-Based Analyses of Regional Patterns of Atrophy	20
2.2.2	High-Resolution (3D) MR Imaging Techniques	21
2.2.3	Voxel-Based Morphometry (VBM)	22
2.2.4	Registration Plus Subtraction	23
3	Classification of Dementia	27
3.1	Considerations	27
3.2	Classification	28
4	Neurodegenerative Disorders	31
4.1	Alzheimer's Disease	31
4.1.1	History	31
4.1.2	Clinical Presentation	31
4.1.3	Neuropathology	32
4.1.4	Pathophysiological Considerations	34
4.1.5	Neurogenetics	35
4.1.6	External Factors	37
4.1.7	Therapy	37
4.1.8	Magnetic Resonance	37
4.1.9	Magnetic Resonance of Alzheimer's Disease: Illustrations	40
4.2	Dementia with Lewy Bodies	57
4.2.1	History	57
4.2.2	Lewy Bodies	57
4.2.3	Clinical Findings	58
4.2.4	Neuropathology	60
4.2.5	Neurogenetics	61
4.2.6	Magnetic Resonance	61

4.3	Frontotemporal Lobar Degeneration (Pick's Complex)	62
4.3.1	Frontotemporal Dementia, Sporadic and 17q-linked.	62
4.3.2	Progressive Aphasia and Semantic Dementia	76
4.3.3	Other Asymmetrical Cortical Degenerative Syndromes.	88
4.4	Dementia with Parkinsonism	95
4.4.1	Dementia in Parkinson's Disease.	95
4.4.2	Corticobasal Degeneration	102
4.4.3	Progressive Supranuclear Palsy.	109
4.4.4	Multiple System Atrophy.	114
4.4.5	Dentatorubral-pallidoluysian Atrophy	119
4.4.6	Lytico-bodig Disease	122
4.5	Huntington's Disease and Dementia.	124
4.5.1	History.	124
4.5.2	Clinical Presentation	124
4.5.3	Pathogenesis	124
4.5.4	Neuropathology	124
4.5.5	Genetics	125
4.5.6	Differential Diagnosis.	125
4.5.7	Therapy	126
4.5.8	Magnetic Resonance	127
4.6	Progressive Subcortical Gliosis	128
4.6.1	History.	128
4.6.2	Clinical Presentation	128
4.6.3	Neuropathology	128
4.6.4	Pathogenetic Considerations	128
4.6.5	Neurogenetics	128
4.6.6	Magnetic Resonance	130
4.7	Prion-Linked Dementias: Creutzfeldt-Jakob Disease (Familial Sporadic and New Variant) and Other Disorders	130
4.7.1	History.	130
4.7.2	Clinical Presentation	133
4.7.3	Neuropathology	136
4.7.4	Genetics	136
4.7.5	Sporadic Creutzfeldt-Jakob Disease: Pathogenesis	137
4.7.6	Magnetic Resonance	137
5	Disorders Primarily Affecting White Matter	139
5.1	Viral Infections Leading to Dementia	139
5.1.1	Herpes Simplex Encephalitis	139
5.1.2	Tick-Borne Encephalitis	142
5.1.3	HIV Encephalitis.	142
5.1.4	Progressive Multifocal Leukoencephalopathy (PML)	145
5.1.5	Subacute Sclerosing Panencephalitis (SSPE).	146
5.2	Inflammatory Disorders: Multiple Sclerosis (MS) and Acute Disseminated Encephalomyelitis (ADEM)	148
5.2.1	Clinical Findings.	148
5.2.2	Neuropathology	151

5.2.3	Magnetic Resonance	151
5.2.4	MRI and Cognitive Impairment in MS	154
5.3	Inborn Errors of Metabolism: Late Onset.	155
5.3.1	Late-Onset Metachromatic Leukodystrophy	155
5.3.2	Late-Onset Globoid Cell Leukodystrophy	160
5.3.3	Late-Onset Mitochondrial Encephalopathy	162
5.3.4	Cerebrotendinous Xanthomatosis	173
5.3.5	Adreno-myelo-neuropathy	176
5.3.6	Fabry's Disease.	179
5.3.7	Adult Polyglucosan Body Disease	182
5.3.8	Disease of the Vanishing White Matter, Adult Form	183
5.3.9	Wilson's Disease	186
5.3.10	Unclassified Hereditary Leukodystrophies with Adult Onset.	193
5.4	Toxic Encephalopathy and Dementia	197
5.4.1	Introduction	197
5.4.2	Alcohol Abuse and Dementia	198
5.4.3	Heavy Metal Poisoning	204
5.4.4	Lipophilic Substances.	206
5.4.5	Dialysis Dementia	211
5.4.6	Paraneoplastic Syndromes.	215
5.5	Dementia After Trauma, Irradiation, Chemotherapy and Infectious-Inflammatory Disorders	220
5.5.1	Dementia Pugilistica	220
5.5.2	Post-traumatic Dementia	221
5.5.3	Post-radiotherapy, Post-chemotherapy Brain Lesions.	227
6	Vascular Dementia	231
6.1	Commonly Used Criteria for Vascular Dementia	231
6.1.1	The Hachinski Ischemic Score	231
6.1.2	DSM-IV Criteria for Vascular Dementia (APA 1994)	232
6.1.3	The State of California Alzheimer's Disease Diagnostic and Treatment Centers (SCADDTC) Criteria for Ischemic Vascular Dementia (Chui et al. 1992)	232
6.1.4	NINDS-AIREN International Work Group Criteria for Vascular Dementia (Roman et al. 1993).	233
6.2	Vascular Dementia: MR Features of Subgroups	235
6.2.1	Ischemic White Matter Lesions in the Elderly and Dementia.	235
6.2.2	Widened Virchow-Robin (Perivascular) Spaces.	242
6.2.3	Microangiopathy with Microhemorrhages.	245
6.2.4	Strategic Infarctions	245
6.2.5	Multiple Large Emboli	245
6.2.6	Magnetic Resonance	261
6.3	Vascular Dementia with Characteristic Clinical Course, Familial Story, Pathophysiology and MR Pattern	264
6.3.1	Subcortical Arteriosclerotic Encephalopathy	264
6.3.2	Cerebral Amyloid Angiopathy	271
6.3.3	Cerebral Autosomal Dominant Arteriopathy with Subcortical Infarcts and Leukoencephalopathy (CADASIL)	277

6.4	Systemic Disorders and Cerebrovascular Disease.	292
6.4.1	Hereditary Coagulative Disorders	292
6.4.2	Anti-phospholipid Antibodies	294
6.4.3	Sickle Cell Disease	298
6.4.4	Other Forms of Coagulation Disorders	299
6.4.5	Hyperhomocysteinemias	299
6.4.6	Hyperlipidemias	308
6.5	Vasculitis	312
6.5.1	Disease Categories.	312
6.5.2	Magnetic Resonance	327
7	Miscellaneous Forms of Dementia	329
7.1	Normal Pressure Hydrocephalus and Dementia	329
7.1.1	History.	329
7.1.2	Clinical Presentation	329
7.1.3	Neuropathology	329
7.1.4	Pathogenetic Considerations	329
7.1.5	Magnetic Resonance	329
7.1.6	Diagnosis of (Treatable) NPH and Differential Diagnosis	331
7.2	Brain Tumors and Dementia	333
7.2.1	Gliomatosis Diffusa	334
7.2.2	Intravascular Lymphomatosis	337
7.2.3	Other Tumors.	340
7.3	Idiopathic Calcinosis of Fahr	340
	Subject Index	347

Magnetic Resonance in Dementia

Barkhof, F.; Valk, J.; Fox, N.C.; Scheltens, P.

2002, X, 353 p., Hardcover

ISBN: 978-3-540-41731-6
