

Contents

1. Introduction	1
1.1 Book Overview.....	1
1.2 RNA, the Underestimated Molecule.....	1
1.3 Examining Regulatory RNA Elements.....	3
1.4 Regulation of Gene Expression	7
1.5 Catalytic Active RNA.....	8
1.6 Combination of RNA and Proteins.....	9
1.7 RNA Motifs and Elements Indicate Conserved Function.....	9
1.8 Context Specificity of RNA Within the Cell	10
2. Instances of Functional RNA.....	13
2.1 Overview	13
2.2 The Different Types of RNA and Their Regulatory Elements	15
2.3 RNA Motifs Involved in Splicing.....	20
2.4 RNA Editing.....	22
2.5 Posttranscriptional Regulatory Signals in mRNA	23
2.6 Further Regulatory RNAs.....	26
2.7 Modified Residues in Eukaryotic mRNAs	26
2.8 Correction of Missing Stop Codons by 10Sa-RNA	27
2.9 Direct Regulation of Gene Expression	27
2.10 Regulation of Prokaryotic Operons	28
2.11 Cytoplasmic RNA Motifs.....	29
2.12 Ribozymes and Their Motifs	30
2.13 Viral RNA	30
2.14 Other RNA Species	32
2.15 A Catalogue of Regulatory RNA Motifs	33
2.16 RNA Motifs in RNA Viridae.....	40
2.17 Protein Motifs Pointing to Interacting RNA Structures.....	42
2.18 Modified Nucleotides	43
2.19 Perspective: from Known Instances to New Ones.....	44
2.20 An Atlas of Regulatory RNA Elements.....	44
3. Experimental Identification of New Functional RNA	69
3.1 Introduction	69
3.2 Typical Challenges	70
3.3 Cellular Regulation.....	72
3.4 Confirmation of RNA Functionality.....	77

4. Computer-Based and Theoretical Identification of Regulatory RNA	85
4.1 Introduction	85
4.2 Carrying Out an RNA Motif Search.....	86
4.3 Example Searches.....	92
4.4 Motif Specific Searches for RNA Elements	93
4.5 General-Purpose Search Programs	98
4.6 Evaluation of the Search Result.....	102
5. Functional RNA Interactions	111
5.1 Introduction	111
5.2 Cellular Information Transfer from mRNA.....	111
5.3 Catalytic RNA	114
5.4 RNA Motif Evolution.....	117
5.5 RNA-Protein Interactions	118
5.6 Designing Interactions.....	123
5.7 Medical Implications	126
5.8 Perspectives	135
6. Areas of Research on RNA Motifs and Regulatory Elements	139
6.1 Introduction	139
6.2 The Transcription of DNA	139
6.3 The Splicing of Messenger RNA.....	140
6.4 <i>Trans</i> -Splicing	144
6.5 RNA Editing.....	147
6.6 Ribosomal RNA Processing Steps.....	154
6.7 Nuclear RNA Transport.....	158
6.8 Regulatory Motifs in mRNA	159
6.9 Posttranscriptional Gene Silencing and RNA Interference	166
6.10 Catalytic RNA and Motifs.....	168
6.11 Viral RNAs.....	170
7. Outlook.....	181
7.1 New Types and Classes of Regulatory RNAs Come up at an Unprecedented Pace	181
7.2 Established Areas of Research	182
7.3 Conclusion.....	184
8. Figure-Acknowledgement.....	185
9. References	187
10. Subject Index	225

RNA Motifs and Regulatory Elements

Dandekar, Th. (Ed.)

2002, X, 234 p., Hardcover

ISBN: 978-3-540-41701-9
