Part I The Environment

Preface	3
1	Antarctic Coastal Landscapes: Characteristics, Ecology and Research	5
	M. BÖLTER, L. BEYER, B. STONEHOUSE	
1.1	The Antarctic Environments and Ecosystems	5
1.2	Characteristics of Antarctic Coastal regions	8
1.2.1	The Former Use of 'Oasis' as a Synonym for Ice-Free Landscapes	8
1.3	Characteristics of Antarctic Coastal Landscapes	9
1.3.1	Localities and Topography	10
1.3.2	Soils of Antarctic Coasts	10
1.3.3	Conditions for Colonisation of Soils	11
1.3.4	Development and Maturation	12
1.4	Research Programmes and Objectives	13
References	14
2	Maritime and Continental Antarctic: The Sites of Investigation in Context	17
	M. BÖLTER, L. BEYER	
2.1	Geography and Geology	17
2.2	Climate	18
2.3	The Effects on Soil Ecosystems	19
References	21

3	King George Island – South Shetland Islands, Maritime Antarctic	23
	S. RAKUSA-SUSZCZEWSKI	
3.1	Introduction	23
3.2	Geographical Features	23
3.2.1	Cartographic and Topographic Features	23
3.2.2	Surroundings	26
3.2.3	Shores	26
3.2.4	The Sea Basin	27
3.3	Changes of Climate	28
3.3.1	Temperature	28
3.3.2	Radiation	30
3.3.3	Climatic Differentiations	31
3.4	Climatological Effects	32
3.4.1	Periglacial Features and Processes	32
3.4.2	Variability in the Terrestrial Ecosystem	34
	References	36
 4	 Wilkes Land (Casey Station)	 41
	R.D. SEPPELT	
4.1	The Windmill Islands – Physical Setting	41
4.2	Geology and Geomorphology	41
4.3	Holocene Emergence	44
4.4	Climate	45
	References	46
 5	 Dronning Maud Land and Its Environments	 51
	S. OHTANI, H. KANDA	
5.1	Introduction	51
5.2	Geographical Zone of Dronning Maud Land	51
5.3	Climatic Zonations	51
5.4	Distribution of Mosses, Lichens and Soil Algae	53
5.5	Soil Properties	55
5.5.1	Particle Size Distributions	55
5.5.2	Electrical Conductivity and pH(H ₂ O)	56
5.5.3	Water Availability	57
5.5.4	Nutrients	60
5.6	Environmental Monitoring	64

5.7	Human Activity and Long-Range Dispersal	65
References	66

Part II Soils, Soil Development and Soil Properties

Preface	71
---------	-----------	----

6	Glacial Changes in the Areas of Admiralty Bay, Potter Cove, King George Island, Maritime Antarctica . . .	75
	M. BRAUN, H. GOSSMANN	

6.1	Climate Change Indications in the Region of the Antarctic Peninsula	75
6.2	Satellite Images and Historical Maps	77
6.3	Glacier Retreat in Admiralty Bay and Potter Cove	78
6.4	Tidewater Glaciers	81
6.5	Glaciers Terminating on Land	83
6.6	Possible Reasons for the Differences in Glacier Retreat of the Tidewater Glaciers in Admiralty Bay	85
6.7	Conclusion	87
References	87

7	Soils and Soilscapes	91
	H.-P. BLUME, D. KUHN, M. BÖLTER	

7.1	Introduction	91
7.2	Sites and Analyses	91
7.3	Soil Conditions	94
7.3.1	Windmill Islands (Casey Area)	94
7.3.2	King George Island (Arctowski Area)	98
7.4	Soil Classifications	102
7.5	Soilscapes	105
7.5.1	Windmill Islands	105
7.5.2	King George Island	108
7.6	Conclusions	111
References	112

8	Weathering and Soil Formation	115
	H.-P. BLUME, L. BEYER, E. KALK, D. KUHN	
8.1	Introduction	115
8.2	Sites and Methodology	115
8.2.1	Soil Analyses	115
8.2.2	Lithology of the Sites and Mineralogy of Soils	116
8.3	Soil Forming Processes and Their Products	128
8.3.1	Weathering, Acidification and Mineral Formation	128
8.3.2	Humus Accumulation and Biotic Aggregation	131
8.3.3	Podzolisation	132
8.3.4	Carbonisation, Salinisation and Alkalisiation	135
8.3.5	Redoximorphism	135
8.4	Conclusions	136
	References	137
 9	 Refractory Soil Organic Matter – Formation, Accumulation, Translocation and Transformation	 139
	L. BEYER, D.M. WHITE, H.-P. BLUME, M. BÖLTER, D. KUHN, K. PINGPANK, B. VOGT	
9.1	Introduction	139
9.2	Sites and Analyses	140
9.3	Soil Organic Matter – Distribution and Accumulation	141
9.4	Soil Formation and SOM Translocation	145
9.4.1	¹³ C-NMR Spectroscopy	147
9.4.2	PyGC/MS Analysis	148
9.5	Soil Formation and SOM Transformation	150
9.6	Conclusions	154
	References	156
 10	 Ornithogenic Ecosystems in the Maritime Antarctic – Formation, Development and Disintegration	 161
	A. TATUR	
10.1	Colonisation of Antarctic Coast by Sea Vertebrates	161
10.1.1	Marine Vertebrates in the Maritime Antarctic Paleoecosystem	161
10.1.2	Colonisation of Land by Sea Vertebrates During Glacial/ Interglacial Cycles	162
10.1.3	Impact of Sea Animals on Terrestrial Ecosystem Formation	165

Contents	XV
----------	----

10.2	Ornithogenic (Penguin) Soils in the Maritime Antarctic . .	167
10.2.1	Mineralisation of Guano	167
10.2.2	Ornithogenic Waters	168
10.2.3	Phosphatisation – the Main Ornithogenic Soil Forming Process in the Maritime Antarctic	171
10.2.4	Ornithogenic Soils of Active Rookeries	174
10.2.5	Ornithogenic Soils of Abandoned Rookeries	175
10.3	Development of Terrestrial Ornithogenic Ecosystems	177
10.4	Biogeochemical Cycle of Ornithogenic Matter on the Land/Sea Boundary	179
References	181

Part III Soil Microbes, Plants and Soil Fauna

Preface	187
---------	-----------	-----

11	Heterotrophic Soil Microbes, Microbial and Enzymatic Activity in Antarctic Soils	189
	M. BÖLTER, E. KANDELER, S.J. PIETR, R.D. SEPPELT	

11.1	Introduction	189
11.2	The Microbial Community	190
11.2.1	Bacterial Counts	190
11.2.2	Bacterial Biomass	192
11.2.3	Fungi and Yeasts	193
11.3	Microbial Activity	195
11.3.1	Bacterial Activity	195
11.3.2	Turnover Times of Glucose	195
11.3.3	Respiration of Glucose	196
11.3.4	Biomass Production Based on Glucose Metabolism	197
11.4	Enzymatic Activity	197
11.5	CO ₂ Evolution and O ₂ -Consumption	199
11.6	Driving Factors of Microbial Activity	201
11.6.1	Environmental Conditions	201
11.6.2	Dissolved Organic Matter	204
11.7	Mineralisation of Guano	205
References	208

12	Plant Communities on King George Island	215
	M. OLECH	
12.1	Introduction	215
12.2	Comments on the Flora	216
12.3	A Review of Important Plant Communities on King George Island	220
12.3.1	Communities of Rock Substrates	220
12.3.2	Nitrophobic Communities	221
12.3.3	Halophilous and Nitrophilous Communities	222
12.4	Terricolous Communities	223
12.4.1	Communities with Vascular Plants	223
12.4.2	Communities with a Predominance of Bryophytes	224
12.4.3	Communities with a Predominance of Lichens	225
12.5	The role of Animals in Antarctic Terrestrial Ecosystems	225
12.6	Distribution of the Principal Terrestrial Ecosystems	227
	References	230
 13	 Plant Communities at Wilkes Land	 233
	R.D. SEPPELT	
13.1	Flora and Vegetation of the Windmill Islands	233
13.2	Geology, Geomorphology and Vegetation Patterns	233
13.3	Plants in the Terrestrial Ecosystem	235
13.4	Ecophysiological Adaptations of the Flora	238
13.5	Environmental Impacts and Conservation Issues	241
	References	242
 14	 Plant Communities at Dronning Maud Land	 249
	H. KANDA, S. OHTANI, S. IMURA	
14.1	Introduction	249
14.2	Vegetation in Dronning Maud Land	249
14.2.1	Vascular Plants	249
14.2.2	Cryptogamic Organisms	251
14.2.3	Moss Habitats and Communities	256
14.2.4	Soil Algal Communities in the Vicinities of Syowa Station, East Dronning Maud Land	259
	References	261

15	Soil Fauna of Antarctic Coastal Landscapes	265
	I. HOGG, M.I. STEVENS	
15.1	Introduction	265
15.2	Faunal Composition	266
15.3	Ecology and Physiology	269
15.4	Interhabitat Dispersal and Population Genetic Structure . .	271
15.5	Potential Responses to Environmental Change	273
15.6	Further Research	275
	References	276
Part IV	Integrating Aspects for Soil Ecology in Antarctic Coastal Landscapes	
Preface	283
16	Soils as Habitats for microorganisms	285
	M. BÖLTER, H.-P. BLUME	
16.1	Introduction	285
16.2	The Microbial Environment	285
16.2.1	The Stone Sphere	286
16.2.2	The Aggregate Sphere	287
16.3	Resource Competition	288
16.4	Water as a Controlling Factor	288
16.4.1	Consequences of Changing Water Availability	290
16.4.2	Osmotic Stress	291
16.4.3	Physical Effects on the Habitat While Freezing and Thawing	293
16.5	Ecological Rating of Habitats – An Example from Antarctic Sites	294
16.6	Adaptation – A Clue to Survival in Harsh Environments? . .	299
	References	299
17	Ecological Classification of Terrestrial Algal Communities in Polar Environments	303
	J. ELSTER	
17.1	Introduction	303
17.2	Environmental Constraints	304
17.2.1	Climate	304

XVIII		Contents
17.2.2	Hydrology and Permafrost	305
17.3	Habitat Classification	305
17.3.1	Hydro-Terrestrial Environments	307
17.3.2	Terrestrial Environments	312
17.4	Conclusion	317
References	319
18	Plants and Lichens in the Antarctic, Their Way of Life and Their Relevance to Soil Formation	327
	L. KAPPEN, B. SCHROETER	
18.1	Introduction	327
18.2	Vascular Plants	327
18.2.1	Immigration and Distribution in Antarctica	327
18.2.2	Physiological Properties Allow Existence in Antarctica . . .	330
18.2.3	Relevance of Vascular Plants for Soil Formation	331
18.3	Bryophytes	332
18.3.1	Bryophytes, as a Component of Antarctic Vegetation	332
18.3.2	Physiological Properties That Enable Bryophytes to Live in Antarctica	333
18.3.3	Productivity and Growth	336
18.3.4	Growth Forms and Strategies	336
18.3.5	Phytomass	339
18.3.6	Other Organisms Attached to Bryophytes	340
18.3.7	Decomposition and Mineralisation	341
18.3.8	Catchment of Debris, Detritus, Airborne Particles, Air Spora and Trace Substances	342
18.3.9	Nutrient Cycling	343
18.4	Lichens	345
18.4.1	Floristic Remarks	345
18.4.2	Physiological Properties That Enable Lichens to Exist in Antarctica	346
18.4.3	Growth and Growth Forms	349
18.4.4	Colonisation and Succession	351
18.4.5	Relations to the Substratum	353
18.4.6	Ion Uptake	354
18.4.7	Contribution to Pedogenetic Processes	357
18.5	Conclusions	359
References	360

Contents	XIX
19 Soil Ecology in Relation to Plant Patterns	375
L. BEYER, H.-P. BLUME, M. BÖLTER, L. KAPPEN, R.D. SEPPELT	
19.1 Introduction	375
19.2 Sites and Environmental Constraints	375
19.2.1 Soils – Texture and Nutrients	376
19.2.2 Vegetation Patterns	382
19.3 Relationships Between Soils and Vegetation	383
19.4 Snow and Water as Structural Components	385
19.5 Conclusion and Needs for Future Research	387
References	388
 20 Uses, Preservation and Protection of Antarctic Coastal Regions	 393
M. BÖLTER, B. STONEHOUSE	
20.1 Ecological Background	393
20.1.1 Ecosystem Development	394
20.1.2 Colonisation by Seabirds and Seals	396
20.2 Occupation, Uses and Impacts by Man	398
20.2.1 Research Installations	398
20.2.2 Tourism	400
20.3 Disturbance and Remediation	401
20.3.1 A Terminology for Disturbance and Damage	401
20.3.2 Remediation	403
20.4 Coastal Landscapes and Global Change	403
20.5 Conservation of Coastal Landscapes	404
References	405
 Concluding Remarks	 409
L. BEYER, M. BÖLTER	
 Subject Index	 413
 Taxonomic Index	 419
 Geographical Index	 425

Geoecology of Antarctic Ice-Free Coastal Landscapes

Beyer, L.; Bölter, M. (Eds.)

2002, XXIII, 429 p., Hardcover

ISBN: 978-3-540-42268-6
