Evolution and Diversity of Prokaryotic Small Heat Shock Proteins

G. Kapp, J.A.M. Leunissen, and W.W. de Jong

1	Introduction	1
2	sHsps in Prokaryotes	2
3	Are sHsps Dispensable in Some Pathogenic Bacteria?	3
4	Phylogenetic Analysis of Prokaryotic sHsps	7
5	Lateral Transfer or Convergent Evolution of Prokaryotic sHsp Genes	13
6	Secondary Structure Prediction of the α -Crystallin Domain	14
7	Alignment and Secondary Structure Prediction of the N-Terminal Domain	14
8	Summary and Concluding Remarks	15
	References	16

Discovery of Two Distinct Small Heat Shock Protein (HSP) Families in the Desert Fish *Poeciliopsis*

C.E. Norris and L.E. Hightower

1	Introduction	19
2	Variation in Small HSPs Among Desert Species of <i>Poeciliopsis</i>	20
2.1	Results of Survey Among Species	20
2.2	HSP Isoforms as Primary Gene Products	21
2.3	Conclusions	22
3	Variation in Small HSPs Within <i>Poeciliopsis</i> Species	24
3.1	Results of Within-Species Survey	24
3.2	Conclusions	25
4	Discovery of Two Classes of Small HSPs in a Single Taxon	26
4.1	Differential Synthesis	26
4.2	Phosphorylation State of the Small HSPs	28
4.3	Sequence Analysis	28
4.4	Evolutionary Analysis	31
4.5	Conclusions	33
	References	34

Chaperone Function of sHsps

M. Haslbeck and J. Buchner

1	Introduction	37
2	General Aspect of Chaperone Function	37
2.1	Chaperones	37
2.2	Analysis of Chaperone Function	39
3	The Chaperone Properties of sHsps	41
3.1	In Vivo Functions of sHsps	41
3.2	sHsps Bind Non-Native Protein	44
3.3	Complex Formation and Substrate Range	45
3.4	The Substrate Binding Site	46
3.5	Mechanism of Substrate Binding	47
3.6	Regulation of Functional Properties	48
3.7	sHsps in the Context of the Cellular Chaperone Machinery	49
4	Conclusions	50
	References	52

The Small Heat Shock Proteins of the Nematode *Caenorhabditis elegans*: Structure, Regulation and Biology

E. Peter M. Candido

1	Introduction	61
2	The Small Heat Shock Protein Family of <i>C. elegans</i>	61
3	The 16-kDa Stress Proteins (Hsp16s)	63
3.1	Hsp16 Gene Organization	63
3.2	Hsp16 Regulation	65
3.3	Biochemical Properties of Hsp16s	68
3.4	Uses of Hsp16 Promoters in <i>C. elegans</i> Research	69
4	The 12-kDa Small Heat Shock Proteins (Hsp12s)	70
5	SIP-1	73
6	Hsp17.5	73
7	Hsp25	73
8	Hsp43	75
9	Conclusions and Prospects	75
