
Contents

PCR and cDNA Cloning Techniques

Chapter 1

Strategies for cDNA Cloning and Mapping RNA Transcripts

PETER S. SILVERSTEIN, SHILPA J. BUCH, and R. CURTIS BIRD 3

Chapter 2

Cloning PCR Products

WEIWEN JIANG and BRUCE F. SMITH 21

Chapter 3

Site Directed Deletion, Insertion, and Substitution Using PCR

MICHAEL MINGFU LING AND BRIAN H. ROBINSON 33

Chapter 4

Long RT-PCR Cloning – Amplification of Full-Length Enterovirus Genomes

KATHLEEN SIMPSON and JOHN W. GOW 55

Chapter 5

Construction of cDNA Libraries from Small Quantities of Total RNA Using Template Switching Catalyzed by M-MLV Reverse Transcriptase

YORK Y. ZHU, ALEX CHENCHIK, ROGER LI,
FLORENCE Y. HSIEH, and PAUL D. SIEBERT 69

Subtractive and Differential Display Techniques

Chapter 6

Subtractive Hybridization and cDNA Cloning

R. CURTIS BIRD and GIN WU 97

Chapter 7	
Differential Display to Identify Steroid-Induced Genes in Endocrine Cells	
ROBERT J. KEMPPAINEN and ELLEN N. BEHREND	127
Specialized Cloning and Library Screening Strategies	
Chapter 8	
Two Hybrid cDNA Cloning	
JÖRG A. SCHENK	145
Chapter 9	
Yeast One and Two Hybrid cDNA Cloning	
BETTY C.B. HUANG and YING LUO	167
Chapter 10	
High-Throughput Library Screening by Fluorescent Hybridisations on Gridded Membranes	
HUGUES ROEST CROLLIUS, JOHN O'BRIEN, and HANS LEHRACH	187
Chapter 11	
Identification of Cell Targeting Ligands Using Random Peptide-Presenting Phage Libraries	
TATIANA I. SAMOYLOVA and BRUCE F. SMITH	209
Subject Index	233

Genetic Library Construction and Screening

Advanced Techniques and Applications

Bird, R.C.; Smith, B. (Eds.)

2002, XIII, 241 p., Ring binder

ISBN: 978-3-540-67278-4
