0. Introduction	1
0.1 What are L^2 -Invariants?	1
0.2 Some Applications of L^2 -Invariants	2
0.3 Some Open Problems Concerning L^2 -Invariants	3
0.4 L^2 -Invariants and Heat Kernels	5
0.5 L^2 -Invariants and Cellular Chain Complexes	6
0.6 L^2 -Betti Numbers and Betti Numbers	7
0.7 L^2 -Invariants and Ring-Theory	8
0.8 L^2 -Invariants and K -Theory	10
0.9 L^2 -Invariants and Aspherical Manifolds	11
0.10 L^2 -Invariants and Groups	12
1. L^2-Betti Numbers	13
Introduction	13
1.1 Group von Neumann Algebras and Hilbert Modules	14
1.1.1 Group von Neumann Algebras	14
1.1.2 Hilbert Modules	16
1.1.3 Dimension Theory	16
1.1.4 Hilbert Chain Complexes	24
1.1.5 Induction for Group von Neumann Algebras	29
1.2 Cellular L^2 -Betti Numbers	30
1.2.1 Survey on G -CW-Complexes	31
1.2.2 The Cellular L^2 -Chain Complex	33
1.2.3 Basic Properties of Cellular L^2 -Betti Numbers	37
1.2.4 L^2 -Betti Numbers and Aspherical Spaces	45
1.3 Analytic L^2 -Betti Numbers	49
1.3.1 The Classical Hodge-de Rham Theorem	49
1.3.2 Analytic Definition of L^2 -Betti Numbers	52
1.4 Comparison of Analytic and Cellular L^2 -Betti Numbers	54
1.4.1 Survey on Unbounded Operators and Spectral Families	54
1.4.2 L^2 -Hodge-de Rham Theorem	58
1.5 L^2 -Betti Numbers of Manifolds with Boundary	63
1.6 Miscellaneous	65
Exercises	68

2. Novikov-Shubin Invariants	71
Introduction	71
2.1 Spectral Density Functions	72
2.1.1 Spectral Density Functions of Morphisms	72
2.1.2 Spectral Density Functions of Hilbert Chain Complexes	81
2.1.3 Product Formula for Novikov-Shubin Invariants	86
2.1.4 The Laplacian in Dimension Zero	93
2.2 Cellular Novikov-Shubin Invariants	96
2.3 Analytic Novikov-Shubin Invariants	103
2.4 Comparison of Analytic and Cellular Novikov-Shubin Invariants	106
2.5 On the Positivity and Rationality of the Novikov-Shubin Invariants	112
2.6 Novikov-Shubin Invariants of Manifolds with Boundary	114
2.7 Miscellaneous	115
Exercises	117
3. L^2-Torsion	119
Introduction	119
3.1 Survey on Torsion Invariants	120
3.1.1 Whitehead Groups	120
3.1.2 Whitehead Torsion	121
3.1.3 Reidemeister Torsion	123
3.2 Fuglede-Kadison Determinant	126
3.3 L^2 -Torsion of Hilbert Chain Complexes	139
3.3.1 Basic Definitions and Properties of L^2 -Torsion	140
3.3.2 L^2 -Torsion and Chain Contractions	144
3.3.3 Proofs of the Basic Properties of L^2 -Torsion	148
3.4 Cellular L^2 -Torsion	160
3.4.1 Cellular L^2 -Torsion in the Weakly-Acyclic Case	160
3.4.2 Cellular L^2 -Torsion in the Weakly-Acyclic and Aspherical Case	171
3.4.3 Topological L^2 -Torsion for Riemannian Manifolds	176
3.5 Analytic L^2 -Torsion	178
3.5.1 Definition of Analytic L^2 -Torsion	178
3.5.2 The Laplace Transform of a Density Function	181
3.5.3 Comparison of Topological and Analytic L^2 -Torsion	186
3.5.4 Analytic L^2 -Torsion for Hyperbolic Manifolds	186
3.6 L^2 -Torsion of Manifolds with Boundary	189
3.7 Combinatorial Computations of L^2 -Invariants	193
3.8 Miscellaneous	200
Exercises	205

4. L^2-Invariants of 3-Manifolds	211
Introduction	211
4.1 Survey on 3-Manifolds	211
4.2 L^2 -Invariants of 3-Manifolds	214
4.3 L^2 -Invariants of Knot Complements	217
4.4 Miscellaneous	218
Exercises	220
5. L^2-Invariants of Symmetric Spaces	223
Introduction	223
5.1 Survey on Symmetric Spaces	223
5.2 L^2 -Invariants of Symmetric Spaces of Non-Compact Type	227
5.3 L^2 -Invariants of Symmetric Spaces	229
5.4 Miscellaneous	231
Exercises	232
6. L^2-Invariants for General Spaces with Group Action	235
Introduction	235
6.1 Dimension Theory for Arbitrary Modules	237
6.2 Comparison of Modules and Hilbert Modules	246
6.3 Induction and the Extended von Neumann Dimension	253
6.4 The Extended Dimension Function and Amenable Groups	255
6.4.1 Survey on Amenable Groups	256
6.4.2 Amenability and the Coinvariants of the Group von Neumann Algebra	258
6.4.3 Amenability and Flatness Properties of the Group von Neumann Algebra over the Group Ring	258
6.5 L^2 -Betti Numbers for General Spaces with Group Actions	263
6.6 L^2 -Euler Characteristic	276
6.6.1 Definition and Basic Properties of L^2 -Euler Characteristic	277
6.6.2 L^2 -Euler Characteristic, Equivariant Euler Characteristic and the Burnside Group	280
6.7 Finitely Presented Torsion Modules and Novikov-Shubin Invariants	285
6.8 Miscellaneous	287
Exercises	289
7. Applications to Groups	293
Introduction	293
7.1 Groups with Vanishing L^2 -Betti Numbers	293
7.1.1 General Criteria for the Vanishing of the L^2 -Betti Numbers of a Group	294
7.1.2 The Vanishing of the L^2 -Betti Numbers of Thompson's Group	297

7.2	Euler Characteristics of Groups	298
7.3	Deficiency of Groups	299
7.3.1	Survey on Deficiency of Groups	299
7.3.2	Applications of L^2 -Betti Numbers to Deficiency and to Signatures of 4-Manifolds	303
7.4	Group Automorphisms and L^2 -Torsion	304
7.4.1	Automorphisms of Groups G with Finite Models for BG	304
7.4.2	Automorphisms of Surfaces	307
7.4.3	A Combinatorial Approach for the L^2 -Torsion of an Automorphism of a Finitely Generated Free Group ...	308
7.4.4	Generalizations	310
7.5	Miscellaneous	311
	Exercises	314
8.	The Algebra of Affiliated Operators	317
	Introduction	317
8.1	The Algebra of Affiliated Operators	318
8.2	Basic Properties of the Algebra of Affiliated Operators	323
8.2.1	Survey on Ore Localization	323
8.2.2	Survey on von Neumann Regular Rings	325
8.2.3	Basic Properties of the Algebra of Affiliated Operators	327
8.3	Dimension Theory and L^2 -Betti Numbers over the Algebra of Affiliated Operators	329
8.4	Various Notions of Torsion Modules over a Group von Neumann Algebra	331
8.5	Miscellaneous	333
	Exercises	333
9.	Middle Algebraic K-Theory and L-Theory of von Neumann Algebras	335
	Introduction	335
9.1	Survey on von Neumann Algebras	336
9.1.1	Definition of a von Neumann Algebra	336
9.1.2	Types and the Decomposition of von Neumann Algebras	337
9.1.3	Finite von Neumann Algebras and Traces	338
9.1.4	Extending Results for Group von Neumann Algebras to Finite von Neumann Algebras	340
9.2	Middle K -Theory of a Neumann Algebra	341
9.2.1	K_0 of a von Neumann Algebra	341
9.2.2	K_1 of a von Neumann Algebra	343
9.3	Middle K -Theory of the Algebra of Affiliated Operators	345
9.4	L -Theory of a von Neumann Algebra and the Algebra of Affiliated Operators	347

9.5	Application to Middle K - and G -Theory of Group Rings	354
9.5.1	Detecting Elements in K_1 of a Complex Group Ring . .	354
9.5.2	Survey on the Isomorphism Conjecture for K_0 of Complex Group Rings, the Bass Conjecture and the Hattori-Stallings Rank	357
9.5.3	G -Theory of Complex Group Rings	363
9.6	Miscellaneous	365
	Exercises	366
10.	The Atiyah Conjecture	369
	Introduction	369
10.1	Survey on the Atiyah Conjecture	370
10.1.1	Various Formulations of the Atiyah Conjecture	370
10.1.2	Relations of the Atiyah Conjecture to Other Conjectures	376
10.1.3	Survey on Positive Results about the Atiyah Conjecture	378
10.1.4	A Counterexample to the Strong Atiyah Conjecture . .	379
10.2	A Strategy for the Proof of the Atiyah Conjecture	381
10.2.1	The General Case	381
10.2.2	Survey on Universal Localizations and Division and Rational Closure	385
10.2.3	The Strategy for the Proof of Linnell's Theorem	387
10.3	The Proof of Linnell's Theorem	391
10.3.1	The Proof of Atiyah's Conjecture for Free Groups	391
10.3.2	Survey on Crossed Products	396
10.3.3	Property (R) Ascends to Finite Extensions	399
10.3.4	Property (R) Ascends to Extensions by Infinite Cyclic Groups	399
10.3.5	Property (K) and Extensions by Virtually Finitely Generated Abelian Groups	402
10.3.6	Property (K) holds for Virtually Free Groups	405
10.3.7	The Induction Step for Directed Unions	408
10.4	Miscellaneous	410
	Exercises	413
11.	The Singer Conjecture	417
	Introduction	417
11.1	Survey on Positive Results about the Singer Conjecture	418
11.1.1	Low-Dimensional Manifolds	418
11.1.2	Pinched Curvature	420
11.1.3	Aspherical Manifolds and Locally Symmetric Spaces . .	421

11.2 The Singer Conjecture for Kähler Manifolds	421
11.2.1 Hodge Theory on Kähler manifolds	424
11.2.2 The L^2 -Lefschetz Theorem	426
11.2.3 Novikov-Shubin Invariants for Kähler Hyperbolic Manifolds	429
11.2.4 Non-Vanishing of the Middle L^2 -Betti Number for Kähler Hyperbolic Manifolds.....	431
11.3 Miscellaneous	432
Exercises	434
12. The Zero-in-the-Spectrum Conjecture	437
Introduction.....	437
12.1 An Algebraic Formulation of the Zero-in-the-Spectrum Conjecture	438
12.2 Survey on Positive Results about the Zero-in-the-Spectrum Conjecture	440
12.2.1 The Zero-in-the-Spectrum Conjecture for Low-Dimensional Manifolds.....	440
12.2.2 The Zero-in-the-Spectrum Conjecture for Locally Symmetric Spaces	441
12.2.3 The Zero-in-the-Spectrum Conjecture for Kähler Hyperbolic Manifolds	442
12.2.4 The Zero-in-the-Spectrum Conjecture for HyperEuclidean Manifolds.....	442
12.2.5 The Zero-in-the-Spectrum Conjecture and the Strong Novikov Conjecture.....	443
12.2.6 The Zero-in-the-Spectrum Conjecture and Finite Asymptotic Dimension	443
12.3 Counterexamples to the Zero-in-the-Spectrum Conjecture in the Non-Aspherical Case	444
12.4 Miscellaneous	449
Exercises	450
13. The Approximation Conjecture and the Determinant Conjecture	453
Introduction.....	453
13.1 Survey on the Approximation Conjecture and Determinant Conjecture	454
13.1.1 Survey on Positive Results about the Approximation Conjecture and the Determinant Conjecture	454
13.1.2 Relations to Other Conjectures.....	455
13.1.3 A Class of Groups	456
13.2 The Proof of the Approximation Conjecture and the Determinant Conjecture in Special Cases	459
13.2.1 The General Strategy	460

13.2.2 Limits of Inverse Systems	465
13.2.3 Colimits of Directed Systems	467
13.2.4 Amenable Extensions	469
13.2.5 Quotients with Finite Kernels	473
13.3 Variations of the Approximation Results	475
13.4 Miscellaneous	482
Exercises	483
14. L^2-Invariants and the Simplicial Volume	485
Introduction	485
14.1 Survey on Simplicial Volume	485
14.1.1 Basic Definitions	485
14.1.2 Elementary Properties	487
14.1.3 Bounded Cohomology and Amenable Groups	489
14.1.4 The Simplicial Volume of Hyperbolic and Low-Dimensional Manifolds	489
14.1.5 Volume and Simplicial Volume	491
14.1.6 Simplicial Volume and Betti Numbers	494
14.1.7 Simplicial Volume and S^1 -Actions	496
14.1.8 Some Information about the Second Bounded Cohomology of Groups	496
14.1.9 Further Properties of the Simplicial Volume	496
14.2 Simplicial Volume and L^2 -Invariants of Universal Coverings of Closed Manifolds	497
14.2.1 Hyperbolic Manifolds and 3-Manifolds	497
14.2.2 S^1 -Actions	498
14.2.3 Amenable Fundamental Groups	498
14.2.4 Selfmaps of Degree Different from -1 , 0 and 1	499
14.2.5 Negative Sectional Curvature and Locally Symmetric Spaces	501
14.2.6 Simplicial Volume and L^2 -Invariants	501
14.3 Miscellaneous	502
Exercises	504
15. Survey on Other Topics Related to L^2-Invariants	507
Introduction	507
15.1 L^2 -Index Theorems	507
15.2 L^p -Cohomology	508
15.3 Intersection Cohomology	509
15.4 Knot Concordance and L^2 -signature	509
16. Solutions of the Exercises	511
References	559
Notation	583
Index	587

L2-Invariants: Theory and Applications to Geometry and
K-Theory

Lück, W.

2002, XV, 595 p., Hardcover
