

Contents

Chapter I. Foundations	1
§1 Nonarchimedean Fields	2
§2 Seminorms	6
§3 Normed Vector Spaces	8
§4 Locally Convex Vector Spaces	13
§5 Constructions and Examples	19
§6 Spaces of Continuous Linear Maps	27
§7 Completeness	35
§8 Fréchet Spaces	45
§9 The Dual Space	50
 Chapter II. The Structure of Banach Spaces	 59
§10 Structure Theorems	59
§11 Non-reflexivity	64
 Chapter III. Duality Theory	 67
§12 c -Compact and Compactoid Submodules	68
§13 Polarity	76
§14 Admissible Topologies	83
§15 Reflexivity	86
§16 Compact Limits	89
 Chapter IV. Nuclear Maps and Spaces	 101
§17 Topological Tensor Products	102
§18 Completely Continuous Maps	113
§19 Nuclear Spaces	119
§20 Nuclear Maps	125
§21 Traces	136
§22 Fredholm Theory	140
 References	 151
 Notations	 153
 Index	 155
