Quasi-Conformal Geometry and Hyperbolic Geometry	1
<i>Marc Bourdon, Hervé Pajot</i>	
1 Introduction	1
2 Basic Tools in Geometric Function Theory and Quasi-Conformal Geometry	1
3 Gromov Hyperbolic Groups: a Motivation for Quasi-Conformal Geometry	5
4 Further Properties of Loewner Spaces and Spaces with Poincaré Inequalities	8
5 Differentiability of Quasi-Symmetric Homeomorphisms, Applications to Quasi-Isometry	11
References	15
On and Around the Bounded Cohomology of SL_2	19
<i>Marc Burger, Nicolas Monod</i>	
1 Introduction	19
2 Notations and Conventions	22
3 A Differential Group	23
4 Constructing Cocycles	29
5 Above Degree Two	33
References	36
Densité d'orbites d'actions de groupes linéaires et propriétés d'équidistribution de marches aléatoires	39
<i>Jean-Pierre Conze, Yves Guivarc'h</i>	
1 Introduction	39
2 Ensemble limite, ensemble asymptotique	41
3 Densité d'orbites de Γ dans $L_\Gamma(\mathbb{R}^d)$ et équirépartition	47
4 Actions sur les variétés de drapeaux homogènes	59
5 La méthode des équations fonctionnelles	62
6 Actions des sous-groupes N et A sur $\Gamma \backslash G$ et $\Gamma \backslash G/M$	68
Références	74
Exceptional Sets in Dynamical Systems and Diophantine Approximation	77
<i>Maurice Dodson</i>	
1 Introduction	77
2 Rotation Number	78
3 Very Well Approximable Numbers and Khintchine's Theorem	82

VIII Contents

4	Kolmogorov–Arnol’d–Moser (KAM) Theory	84
5	Linearisation	87
6	Diophantine Approximation in Hyperbolic Geometry	89
7	Extremal Manifolds and Flows	93
8	Conclusion	94
	References	95
	An Introduction to Cocycle Super-Rigidity	99
	<i>Renato Feres</i>	
1	Introduction	99
2	Cocycles over Group Actions	100
3	Cocycles and Principal Bundle Actions	105
4	Semisimple Lie Groups, in a Hurry	113
5	All the Ergodic Theory We Need	117
6	The Algebraic Hull	120
7	Super-Rigidity	123
8	The Proof	124
9	A Few Immediate Applications	131
	References	133
	Rigid Geometric Structures and Representations of Fundamental Groups	135
	<i>David Fisher</i>	
1	Introduction	135
2	Rigid Structures, Killing Fields and Representations of Fundamental Groups	137
3	Representations of the Fundamental Group and Dynamics of the Action	139
4	Constructing Quotients from Representations of π_1	143
	References	146
	Coarse-Geometric Perspective on Negatively Curved Manifolds and Groups	149
	<i>Alex Furman</i>	
1	Introduction	149
2	The Geometric Setup	150
3	Basic Notions of the Coarse-Geometric Setup	155
4	Some Results	159
	References	165
	On Orbit Equivalence of Measure Preserving Actions	167
	<i>Damien Gaboriau</i>

Rigidity in Dynamics and Geometry

Contributions from the Programme Ergodic Theory,
Geometric Rigidity and Number Theory, Isaac Newton
Institute for the Mathematical Sciences Cambridge,
United Kingdom, 5 January – 7 July 2000

Burger, M.; Iozzi, A. (Eds.)

2002, XIII, 492 p. 8 illus., Hardcover

ISBN: 978-3-540-43243-2
