# Table of Contents

<b>Preface</b> .....	V
----------------------	---

---

## Plenary Talks

---

Why do we do “Industrial Mathematics”? Some Comments on Reasons once Given by Alan Tayler .....	3
<i>H. Neunzert</i>	
From Nucleation to Large Aggregates: the Growth of Filamentary .....	16
<i>M.A. Herrero</i>	
State of the Art Simulations of High Intense Particle Beams in Complicated Accelerator Structures .....	28
<i>A. Adelmann, <u>R. Jeltsch</u></i>	
Effective Buckley-Leverett Equations by Homogenization .....	42
<i>C. J. van Duijn, A. Mikelic, I. S. Pop</i>	

---

## Minisymposia

---

### Finance

<b>Organizer: S. Howison</b> .....	55
Trading Volume in Models of Financial Derivatives .....	57
<i>S. Howison, D. Lamper</i>	
Two-Scale Asymptotics for Stochastic Volatility Models .....	63
<i>N. Svanstedt</i>	
Non-Probabilistic Jump Modelling for Financial Derivatives .....	67
<i>D. Bakstein, P. Wilmott</i>	

### Fuel Pipelines

<b>Organizer: A. Fasano</b> .....	73
Mass Gravity Flows Modelling .....	75
<i>M. Drago, A. Terenzi</i>	
Recent Results in the Dynamics of Liquid Dispersions .....	80
<i>A. Fasano, F. Rosso</i>	

Some New Results on the Flow of Waxy Crude Oils in a Loop . . . . .	85
<i>L. Fusi</i>	
<b>Image Processing: Linear and Nonlinear Techniques</b>	
<b>Organizers: M. Mancuso, L. Puccio</b> . . . . .	89
Image Restoration Problems for New-Generation Telescopes . . . . .	91
<i>M. Bertero, P. Boccacci</i>	
Image Processing for Digital Still Cameras . . . . .	96
<i>M. Mancuso</i>	
Multiwavelets and Image Processing . . . . .	105
<i>M. Cotronei, L. Puccio</i>	
<b>Information and Communication Technologies</b>	
<b>Organizer: A.M. Greco</b> . . . . .	111
ICT and Effective Learning . . . . .	113
<i>M. Allegra</i>	
An Advanced Tool for Authoring Multimedia Presentation . . . . .	118
<i>E. Bilotta, P. Pantano</i>	
Evolutionary Music and Fitness Functions . . . . .	126
<i>E. Bilotta, P. Pantano, V. Talarico</i>	
The User “InterActs” with the Web: Integrating Active Study Tools in a Web-Based Instruction System . . . . .	140
<i>G. Fulantelli</i>	
Applications of the Self-Organizing Networks in Document Categorization . . . . .	145
<i>R. Rizzo</i>	
<b>Kinetic Transport in Semiconductor Devices</b>	
<b>Organizer: O. Muscato</b> . . . . .	155
On a Class of Large Size Planar Discrete Velocity Models for Gas Mixtures . . . . .	157
<i>H. Cornille, C. Cercignani</i>	
Time-Depending Solutions to Spherical Harmonic Equations for Semiconductor Devices . . . . .	164
<i>C. Drago, A. Majorana</i>	
A Comparison Between Bulk Solutions to the Boltzmann Equation and the Spherical Harmonic Model for Silicon Devices . . . . .	169
<i>A. Majorana</i>	

An Extended Fluid-Dynamical Model Describing Electron Transport in Semiconductors .....	174
<i>G. Mascali, M. Trovato</i>	
Monte Carlo Verification of an Extended Hydrodynamic Model Describing Charge Carrier Transport in Semiconductors .....	179
<i>O. Muscato</i>	
Modeling of Quantum Ballistic Transport in Electron Waveguide Devices .....	185
<i>E. Polizzi, N. Ben Abdallah</i>	
Carrier Transport in Silicon Dioxide using the Spherical-Harmonics Expansion of the BTE .....	190
<i>S. Reggiani, M. Marsella, A. Gnudi, M. Rudan</i>	
<b>Liquid/Solid Phase Transitions and Interfaces</b>	
<b>Organizers: P. Bontoux, M. El Ganaoui, D. Mansutti</b> .....	195
Front-Fixing Modeling of Directional Solidification in Microgravity Conditions .....	197
<i>M. M. Cerimele, D. Mansutti, F. Pistella</i>	
Computational Model for Solidification Process of a Binary Alloy .....	204
<i>M. El Ganaoui, P. Bontoux</i>	
Numerical Study for Solutal Convection in Liquid Alloy by Spectral and Finite Volume Approximations .....	210
<i>R. Guérin, M. El Ganaoui, A. Lamazouade, P. Haldenwang</i>	
Equipment and Process Modelling of Industrial Crystal Growth Using the Finite Volume Codes CrysVUn and STHAMAS .....	218
<i>M. Hainke, T. Jung, J. Friedrich, B. Fischer, M. Metzger, G. Müller</i>	
<b>Mathematical Problems in Glass Industry</b>	
<b>Organizer: N. Siedow</b> .....	223
Optimal Design of Thermo-Electrical Flanges .....	225
<i>N. Siedow, S. Manservigi</i>	
Numerical Simulation of the Plunger Velocity .....	230
<i>K. Laevsky, R.M.M. Mattheij</i>	
<b>Microelectronics</b>	
<b>Organizers: M. Anile, M. Guenther</b> .....	237

Advanced Transport Modelling in a Microelectronics Company: Status and Perspectives . . . . .	239
<i>C. Bergonzoni, A. Benvenuti, A. Marmioli</i>	
Energy Transport Model for Silicon Semiconductors Derived from the Non Parabolic Band Hydrodynamical Model Based on the Maximum Entropy Principle . . . . .	246
<i>V. Romano</i>	
Neural Networks with Higher Level Architecture for Bipolar Device Modeling . . . . .	252
<i>A. Plebe, A. M. Anile, S. Rinaudo</i>	
Multirate Methods in Electrical Circuit Simulation . . . . .	258
<i>A. Bartel, M. Günther, A. Kværnø</i>	
An Accelerated Poincaré-Map Method for Finding the PSS of Autonomous Oscillators . . . . .	266
<i>S.H.M.J. Houben, J.M. Maubach</i>	
Iterative Solution of Linear Systems in Circuit Simulation . . . . .	272
<i>W.H.A. Schilders</i>	
<b>Models of Highway Traffic</b>	
<b>Organizer: R.E. Wilson</b> . . . . .	279
Travelling Waves in a Linearly Stable, Optimal-Velocity Model of Road Traffic . . . . .	281
<i>P. Berg, A. Woods</i>	
Discovering of Synchronized Flow as a New Traffic Phase and Related Problems for Traffic Flow Modeling . . . . .	286
<i>B.S. Kerner</i>	
Gipps' Model of Highway Traffic . . . . .	293
<i>R.E. Wilson</i>	
<b>Models from the Textile Industry</b>	
<b>Organizers: H. Neunzert, H. Ockendon</b> . . . . .	299
Asymptotic Methods for Air-Flow Around Fibers . . . . .	301
<i>T. Götz</i>	
A Continuum Model for the Carding Machine . . . . .	306
<i>M.E.-M. Lee, H. Ockendon</i>	
<b>Numerical Methods for Hyperbolic and Kinetic Equations</b>	
<b>Organizer: G. Puppo</b> . . . . .	311

Central Schemes for Balance Laws .....	313
<i>G. Russo</i>	
High Resolution Nonoscillatory Central Difference Schemes for the 2D Euler Equations via Artificial Compression .....	318
<i>K.-A. Lie, S. Noelle</i>	
Numerical Solution of the Non Homogeneous Fokker-Planck-Landau Equation.....	325
<i>F. Filbet, L. Pareschi</i>	
Multiscale Hyperbolic Equations: Numerical Approximation and Applications .....	332
<i>G. Naldi</i>	
Similarity and Numerical Analysis of a Singular Moving Boundary Hyperbolic Problem .....	339
<i>R. Fazio</i>	
<b>Problems of Charge Transport in Semiconductor</b>	
<b>Nanostructures</b>	
<b>Organizers: L.L. Bonilla, J.Soler</b> .....	345
Quantum Kinetic Equation Including Phonon Scattering .....	347
<i>E.R. Arriola, L.L. Bonilla, J. Soler</i>	
On a Variational Approach to the Time Evolution of the Mean Field Polaron .....	358
<i>J. Nieto, P. Bechouche, E.R. Arriola, J. Soler</i>	
Wavefronts in Photoexcited Semiconductor Superlattices .....	365
<i>A. Carpio, L.L. Bonilla</i>	
Nonlinear Transport in Semiconductor Superlattices .....	372
<i>D. Sánchez, G. Platero, L.L. Bonilla</i>	
Periodic Recycling and Motion of Wavefronts in a Model of the Gunn Effect with Saturating Current Characteristics .....	386
<i>M. Kindelan, L.L. Bonilla</i>	
<b>Polymers</b>	
<b>Organizers: G. Marrucci, F. Van de Ven</b> .....	399
Stochastic Simulation of Nonisothermal Crystallization of Polymers ...	401
<i>A. Micheletti</i>	

Modeling and Simulating the Crystallization of Polymers via a Many-Particle System . . . . .	408
<i>V. Capasso, D. Morale, C. Salani</i>	
Flow-Induced Deformation of Drops . . . . .	415
<i>F. Greco, S. Guido, and M. Simeone</i>	
Expanding the Industrial Use of Linear Viscoelastic Material Functions . . . . .	420
<i>C.F.J. Den Doelder</i>	
Postponing Polymer Processing Instabilities . . . . .	427
<i>J. Molenaar</i>	
Thermally Induced Flow Front Instabilities in Injection Moulding . . . . .	433
<i>H.J.J. Gramberg, A.A.F. van de Ven</i>	
<b>Some Applications of Fluid and Gas Dynamics</b>	
<b>Organizers: G. Russo</b> . . . . .	439
Estimation of Flood Risks in Urban Areas - The Curb as a Challenge for SWE . . . . .	441
<i>M. Hilden</i>	
Towards a Two-dimensional Modelling Element in River Flow Simulation Systems . . . . .	446
<i>M. Schulz, G. Steinebach</i>	
The Lattice Boltzmann Method for Two-Phase Flows and Applications to Filtration Processes . . . . .	451
<i>M. Junk</i>	
<b>Teaching of Industrial Mathematics at ECMI Centers</b>	
<b>Organizers: Harald E. Krogstad</b> . . . . .	457
Mathematical Modelling – a Challenging Course . . . . .	459
<i>H.E. Krogstad</i>	
Solving Industrial Problems – Learning by Doing . . . . .	466
<i>M. Bracke</i>	
<hr/>	
<b>Contributed Talks</b>	
<hr/>	
Recent Developments and Open Problems in Composites Materials Manufacturing . . . . .	475
<i>D. Ambrosi, A. Farina, L. Preziosi</i>	

Non-Isothermal Mathematical Model of Wood and Paper Drying . . . . .	488
<i>A. Buiķis, J. Cepītis, H. Kalis, A. Reinfelds</i>	
Tuning of Fuzzy Systems as an Ill-Posed Problem . . . . .	493
<i>M. Burger, J. Haslinger, U. Bodenhofer</i>	
Estimation Problems for a Crystallization Process Modelled by a Dynamic Germ-Grain Model . . . . .	499
<i>M. De Giosa, R.M. Mininni</i>	
Some Mathematical Problems in the Designing of Subsoil Decontami- nation by Bioventing . . . . .	506
<i>F. Diele, F. Notarnicola, I. Sgura</i>	
Power Invariant Vector Compaction Based on Bit Clustering and Temporale Partitioning . . . . .	512
<i>N. Dragone, R. Zafalon</i>	
Production Planning in a Multiproduct Batch Plant Under Uncertainty	526
<i>S. Engell, A. Märkert, G. Sand, R. Schultz</i>	
Programming Numerical Sensitivity Analysis of Ordinary Differential Equations . . . . .	532
<i>S. Franz, M. Kiehl</i>	
Fast-Marching Approach for the Simulation of Directional Etching Processes . . . . .	537
<i>G. Garozzo, A. La Magna, G. D'Arrigo, C. Spinella</i>	
Coupled Frequencies of a Fluid in Closed Circular Cylindrical Rigid Tank with an Elastic Annular Plate in its Roof . . . . .	544
<i>E. Gavrilova</i>	
Numerical Treatment of Optimal Control Problems with Differential- Algebraic Equationsx and Applications to Virtual Test-drives . . . . .	549
<i>M. Gerds</i>	
Different Collision-Dominated Regimes for Chemically Reacting Gases .	554
<i>M. Groppi</i>	
Optimal Shape Design and Optimal Sizing of Industrial Components . .	560
<i>G. Haase, U. Langer, E. Lindner, W. Mühlhuber</i>	
Mathematical and Numerical Modelling of Three-Phase Flows in Pipelines . . . . .	565
<i>L. Hanich, C.P. Thompson</i>	
A Fast Nearest Neighbour Algorithm . . . . .	571
<i>R.J. Henery, U.G. Shehu</i>	

Mathematical Modelling of LD-Steelmaking Process . . . . .	577
<i>K. Kostúr</i>	
Efficiency Analysis of Production Systems . . . . .	584
<i>V.E. Krivonozhko, O.B. Utkin, A.V. Volodin, I.A. Sablin</i>	
A New Finite Difference Scheme for the Boltzmann - Poisson System on Semiconductor Devices . . . . .	592
<i>A. Majorana, R.M. Pidatella</i>	
An Explicit Kinetic Model for Traffic Flow . . . . .	597
<i>T. Materne, M. Günther, A. Klar, R. Wegener</i>	
A Nonlinear Nonviscous Hydrodynamical Model for Charge Transport Derived from Kinetic Theory . . . . .	602
<i>M.S. Mongiovì</i>	
A Penalty Scheme for Solving American Option Problems . . . . .	608
<i>B.F. Nielsen, O. Skavhaug, A. Tveito</i>	
Evaporative and Topographical Effects in Coating Flows . . . . .	613
<i>S.B.G. O'Brien, M. Hayes, J.H. Lammers</i>	
Homogenization for Viscoelastic Composites with Prescribed Interface Jumps in Displacements and Stresses . . . . .	618
<i>J. Orlik</i>	
Inverse Modeling of Sedimentary Basins . . . . .	625
<i>Y.Y. Podladchikov, S.M. Schmalholz, D.W. Schmid</i>	
Nonlinear Pulse Propagation in Blood Flow Problems . . . . .	630
<i>G. Pontrelli</i>	
A Numerical Method for Quantum Billiards with an Application to Waveguides . . . . .	636
<i>F. Raciti, E. Venturino</i>	
Inverse Design of an Axis-Symmetric Diffuser . . . . .	641
<i>A. Scascighini, A. Troxler, R. Jeltsch</i>	
Blended Lobatto Methods with Variable Numerical Damping in Multi- body Dynamics . . . . .	646
<i>M. Schaub, B. Simeon</i>	
An Asymptotic Method for a Conjugate Heat Transfer Problem . . . . .	651
<i>C.F. Stein, P. Johansson</i>	

Relations Between the Motion-Responses Caused by Fixed and Moving Loads Acting on Discretely Supported Strings and Beams . . . . .	657
<i>V. Zoller, I. Zobory</i>	
<b>Color Plates</b> . . . . .	663

Progress in Industrial Mathematics at ECMI 2000

Anile, A.M.; Capasso, V.; Greco, A. (Eds.)

2002, XV, 656 p., Hardcover

ISBN: 978-3-540-42582-3
