

Contents

1	What Is Biodiversity?	1
1.1	Introduction	1
1.2	Defining Biodiversity	2
1.2.1	Genetic Diversity	2
1.2.2	Species Diversity	3
1.2.3	Ecosystem Diversity	3
1.2.4	Ecological and Evolutionary Processes	3
2	The Eastern Arc Mountains and Their Biological Significance	5
2.1	Geography	5
2.2	Geology	5
2.3	Soils	7
2.4	Climate	8
2.5	Forest Cover	10
2.6	Protected Area Coverage	11
2.7	Level of Knowledge About Biodiversity	13
2.8	Evolutionary and Ecological Significance	15
2.9	Geographic Comparisons of Species Richness and Endemism	16
2.10	Critically Endangered, Endangered and Vulnerable Species .	18
2.11	Relationship Between Global Threatened Status and Endemism	24
2.12	Forest Loss in Africa and Tanzania	24
2.12.1	Forest Loss in the Eastern Arc Mountains	25
2.13	Primary Causes of Forest Loss in the Eastern Arc Mountains	26
2.13.1	Small-Scale Agricultural Expansion	26
2.13.2	Commercial Logging	30

2.13.3	Large-Scale Agricultural Expansion	31
2.13.4	Cultivation of Cardamom	32
2.13.5	Exotic Softwood and Hardwood Plantations	34
2.13.6	Collection of Fuelwood and Building Poles	34
2.14	Designation of the Eastern Arc Mountains as a Globally Threatened Ecosystem	37
3	Importance of Biodiversity	39
3.1	Medicinal Plants	39
3.2	Food Plants	45
3.3	Cooking Fats	49
3.4	Honey Production	50
3.5	Wildlife as Food	50
3.6	Building Materials	52
3.7	Household Items	54
3.8	Long-Burning Fuels	55
3.9	Dyes	56
3.10	Ornamentals	57
3.11	Cash Crops	60
3.12	Additional Indirect Benefits of Conserving Biodiversity . .	60
3.12.1	Water and Soil Conservation	60
3.12.2	Climate Regulation	64
3.12.3	Ecotourism	64
3.12.4	Education and Research	66
3.13	Economic Valuation of Forest Products	66
3.14	International Convention on Biological Diversity and Biodiversity Prospecting Agreements	67
4	Current Threats to Biodiversity	69
4.1	Deforestation	69
4.1.1	Impact on Species Diversity	70
4.1.2	Impact on Ecosystem Diversity	75
4.1.3	Impact on Ecological Processes	76
4.2	Forest Fragmentation	78
4.2.1	Change in Size and Isolation	80
4.2.2	Change in Microclimate	81
4.2.3	Change in Rates of Predation, Pollination, Seed Dispersal and Parasitism	88
4.3	Forest Degradation	89

Contents		XI
4.3.1	Primates	93
4.3.2	Large Mammals	94
4.3.3	Small Mammals	96
4.3.4	Birds	96
4.3.5	Arthropods	99
4.3.6	Plant Communities	100
4.3.7	Natural Tree Falls and Gaps	101
4.4	Over-Exploitation	102
4.4.1	Plants	102
4.4.2	Animals	104
4.5	Introduction of Exotic Species	106
4.5.1	Exotic Tree Plantations	110
5	Site-Specific Knowledge Important for Conserving Biodiversity	115
5.1	Distribution of Biodiversity	115
5.1.1	Patterns of Species Richness	115
5.1.1.1	Comparison Between Eastern Arc Mountains	116
5.1.1.2	Elevational Zonation	118
5.1.2	Patterns of Endemism	120
5.1.2.1	Comparison Between Eastern Arc Mountains	120
5.1.2.2	Elevational Zonation in the Usambara Mountains	121
5.2	Trends in Populations of Keystone and Indicator Species . .	122
5.2.1	Keystone Species	122
5.2.2	Indicator Species	123
5.3	Critical Ecological and Evolutionary Processes	124
5.4	Minimum Area Requirement of Extinction-Prone Species .	126
5.5	Relationship of Local People to Adjacent Forests	127
5.5.1	Land Tenure	128
5.5.2	Sacred Sites	129
5.5.3	Utilization of Forest Products	130
5.5.4	Impact of Human Activities upon Biodiversity	131
5.5.5	Attitudes of Local People	131
5.6	What Can Be Done in the Absence of Important Site-Specific Information?	133
6	Site-Specific Activities Useful for Conserving Biodiversity .	135
6.1	Biophysical Mapping of Resources	135
6.2	Wildlife Corridors	137

XII		Contents
6.3	Ecological Monitoring	142
6.3.1	What to Monitor	143
6.4	Conservation Initiatives	148
6.4.1	Integrated Conservation and Development Projects	149
6.4.2	Soil and Water Conservation Projects	153
6.4.3	Conflict Resolution Projects	154
6.4.4	Village Woodlot Projects	155
6.4.5	Enhancing Protected Area Institutions	159
7	Summary and Conclusions	161

Conserving Biodiversity in East African Forests

A Study of the Eastern Arc Mountains

Newmark, W.D.

2002, XII, 200 p., Hardcover

ISBN: 978-3-540-42429-1
