

# Contents

<b>1 Nonrenewable Two-State Systems</b> .....	1
1.1 Characteristic Functions and Indices .....	1
1.2 Analysis of Failure Data .....	5
1.3 Characteristic Probability Distributions .....	9
1.3.1 Exponential Distribution .....	10
1.3.2 Weibull Distribution .....	12
1.3.3 Uniform Distribution .....	14
1.3.4 Normal Distribution .....	16
1.3.5 Gamma Distribution .....	18
1.3.6 Lognormal Distribution .....	20
1.3.7 Combination of Distributions .....	21
References .....	22
 <b>2 Renewable Two-State Systems</b> .....	 24
2.1 State Transition Diagrams and Associated Indices .....	24
2.2 Exponential Distribution of Up and Renewal Times .....	26
2.3 Absorbing States and the Equivalent Steady-State Transition Diagram .....	31
2.4 General Cdf of Renewal Duration .....	34
2.4.1 Method of Supplementary Variables .....	34
2.4.2 Fictitious States .....	37
2.4.3 Series Connection of Fictitious States .....	40
2.4.4 Parallel Connection of Fictitious States .....	44
2.4.5 Open Loop Sequence of Consecutive States .....	46
References .....	50
 <b>3 Markov Systems</b> .....	 51
3.1 Equations Determining the Probability of System States .....	51
3.2 Composition of System Equations from Component Models .....	54
3.2.1 Independent Components .....	54
3.2.2 Dependent Components .....	57

3.3	Simplification of the System State Probability Equations .....	58
3.3.1	Systems with Independent Components .....	58
3.3.2	Merging of States .....	58
3.4	System Dependability Indices.....	63
3.4.1	System Availability .....	63
3.4.2	System Reliability and Mean Time to First Failure (MTTF)...	64
3.5	Steady-state System Dependability Indices .....	66
3.5.1	System States Indices .....	67
3.5.2	System Indices .....	68
3.5.3	Truncation of States .....	69
3.5.4	Transition Rate Matrix Deviation Concept.....	71
3.5.5	Matrix Gauss-Seidel Approach.....	74
3.6	Characteristic Applications .....	78
3.6.1	Independent Components.....	78
3.6.2	Preventive Maintenance.....	80
3.6.3	Restricted Repair .....	82
3.6.4	Partially Redundant Systems.....	82
3.6.5	Induced Failures.....	83
3.6.6	System with a Cold Standby Unit.....	84
	References .....	87
<b>4</b>	<b>Networks.....</b>	<b>88</b>
4.1	Elementary Network Structures.....	89
4.1.1	Series Connection .....	89
4.1.2	Parallel Connection.....	92
4.1.3	Series-Parallel Connections.....	94
4.2	Composite Structures .....	96
4.2.1	General Expressions for the Steady-State Failure Frequency ..	97
4.2.2	Application of the Total Probability Theorem .....	98
4.2.3	Minimal Paths .....	100
4.2.4	Unreliable Nodes .....	104
4.2.5	Multiple Sources and Sinks .....	105
4.2.6	Minimal Cuts .....	106
4.2.7	Network Partition and Equivalents.....	110
4.2.8	Networks with Dependent Branches .....	112
4.2.9	Limited Transfer Capacity Networks.....	116
	References .....	119

<b>5 Event Inspection Methods</b>	121
5.1 FMECA and FTA Approaches	121
5.1.1 Failure Mode, Effects and Criticality Analysis (FMECA)	121
5.1.2 Fault Tree Analysis (FTA)	122
5.2 Failure Event Set Enumeration	127
5.2.1 Minimal Cuts	127
5.2.2 System State-Space Enumeration	129
5.2.3 Kronecker Algebra Application	131
References	134
<b>6 Finite-Term Dependability Prediction</b>	135
References	142
<b>7 Simulation</b>	143
7.1 Fundamentals	143
7.1.1 General	143
7.1.2 Processing the Outcomes	144
7.2 Generation of Uniformly Distributed Random Numbers	147
7.3 Steady-State Dependability Indices	148
7.3.1 Generation of System States	148
7.4 Time-Specific Dependability Evaluation	151
7.4.1 Generation of Random State-Residence Times	151
7.4.2 System Reliability Evaluation	152
7.4.3 Stochastic Processes	154
References	156
<b>8 Dependability Grading and Optimization</b>	157
8.1 Optimization Concept	157
8.2 Fuzzy Logic Based Dependability Evaluation	160
8.2.1 Fuzzy Sets	160
8.2.2 Fuzzy Logic	163
8.3 Dependability Grading	164
8.3.1 Dependability Evaluation in General	164
8.3.2 Network Dependability Evaluation	165
References	171

<b>9</b>	<b>Uncertainties in the Dependability Evaluation .....</b>	<b>172</b>
9.1	Mathematical Operations with Fuzzy Numbers.....	172
9.1.1	Fuzzy Numbers Representation and Evaluation .....	172
9.1.2	Functions of Fuzzy Numbers .....	174
9.2	Element Dependability Indices.....	177
9.2.1	Reliability.....	177
9.2.2	Steady-State Unavailability .....	179
9.2.3	Time-Specific Unavailability .....	181
9.3	Network Dependability Indices .....	182
9.4	Concluding Remarks .....	185
	References .....	186
<b>Index</b>	<b>.....</b>	<b>187</b>

Dependability of Engineering Systems  
Modeling and Evaluation

Nahman, J.M.

2002, XII, 192 p., Hardcover

ISBN: 978-3-540-41437-7
