

Table of Contents

Chemistry- Transport Models

Parallelisation and Application of a Multi-layer Atmospheric Transport Model to Quantify Dispersion and Deposition of Ammonia over the British Isles	3
<i>N. Fournier, V. A. Pais, M. A. Sutton, K. J. Weston, U. Dragosits, S. Y. Tang and J. Aherne</i>	
Entrainment Process in Mesoscale Models: Observational Validation.....	13
<i>J. Vilà-Guerau de Arellano, P. G. Duynkerke and D. Pino</i>	
Applicability of Indicator-Based Approach to Assess Ozone Sensitivities: A Model Study in Switzerland	21
<i>S. Andreani-Aksoyoglu, J. Keller and A. Prévôt</i>	
HYSPLIT Model Estimates of Atmospheric Deposition of Toxic Contaminants to the Great Lakes (An Overview)	30
<i>M. Cohen, R. Laurin, L. Mathewson, J. F. McDonald and D. Meyer-Wefering</i>	
Eulerian Photochemical Modeling, Multi-nesting Approach The Rhône-Alpes Case Study	42
<i>G. Mounier, O. Couach, M. Batton-Hubert and A. Clappier</i>	
Validation of LMD-ZT Model with ETEX-1 Experiment	50
<i>A. Idelkadi, F. Hourdin and J. P. Issartel</i>	
Indicators Concept Applied to a European City: The Ile de France Area during ESQUIF Campaign	54
<i>F. Millard and G. Toupance</i>	
Transport at Resolved and Unresolved Scales in the CTM MOCAGE	59
<i>M. Amodei, B. Josse, E.-Y. Nho-Kim, P. Simon and V.-H. Peuch</i>	
Numerical Modelling of Pollution Dispersion in 3D Atmospheric Boundary Layer	69
<i>L. Beneš, T. Bodnár, Ph. Fraunié and K. Kozel</i>	
Recent Advances in CAMx Air Quality Modelling.....	79
<i>R. E. Morris, G. Yarwood and A. Wagner</i>	
Applying Model Calculations to Estimate Future Urban Air Quality with Respect to the Requirements of the EU Directives on NO ₂ and PM ₁₀	89
<i>L. H. Slørdal</i>	
Numerical Modeling of the Atmospheric Transport of Toxic Pollutants in the Northern Hemisphere.....	101
<i>M. A. Sofiev, M. V. Galperin</i>	

Exchange of Sulphur Pollution Between Bulgaria and Greece	111
<i>D.Syrakov, C.Zerefos, M.Prodanova, K.Ganev, N.Miloshev</i>	

Emission Modeling and Related Issues

Biogenic Emissions Contribution on Air Quality at Regional Scale	123
<i>C. Sarrat, F. Solmon, D. Guédalia and R. Rosset</i>	
The Dependence of Tropospheric Hydroxyl Content on the Alignment.....	141
Between the NO _x and CO Total Emissions ...	
<i>A. A. Kiselev and I. L. Karol</i>	
Numerical Simulation of NO _x and CO Mass Budgets as Integral Part of an Experimental Evaluation of Modelled Emission Data for the City of Augsburg (Germany)	149
<i>H-J. Panitz and K. Nester</i>	
Chemistry and Dispersion of Pollutants from a Rural Motorway: Measurements and Modelling	159
<i>D. Lansley and P. Seakins</i>	
Model Study of Distribution and Intensity of Methane Fluxes in West Siberia and Russian Arctic	169
<i>S. V. Jagovkina, I. L. Karol, V. A. Zubov, V. E. Lagun, A. I. Reshetnikov and E. V. Rozanov</i>	
A Reactive Plume Model for the NO-NO ₂ Transformation Close to the Stack Emission	177
<i>C. Philippe, A. Coppalle and P. Plion</i>	
Modeling of Traffic-Induced Emission Inventories in Urban Areas. Effect of Roadway Network Aggregation Levels Traffic Management and Technology	187
<i>M. El-Fadel, H. Sbayti and I. Kaysi</i>	

Numerical Algorithms

Advection Experiments with DMI-HIRLAM-TRACER	205
<i>J. Chenevez</i>	
Parallel Processing and Non-uniform Grids in Global Air Quality Modelling	215
<i>P. J. F. Berkvens and M. A. Botchev</i>	
A New Algorithm for Two-Way Nesting in Global Models: Principles and Applications	225
<i>M. Krol, W. Peters, P. Berkvens and M. Botchev</i>	

Some Reduction Techniques for Simplifying Atmospheric Chemical Kinetics	235
<i>R. Djouad and B. Sportisse</i>	
The Estimation of Intrinsic Low Dimensional Manifold Dimension in Atmospheric Chemical Reaction Systems	245
<i>A. S. Tomlin, L. Whitehouse and R. Lowe</i>	
Modelling Photochemical Air Pollution in Hungary Using an Adaptive Grid Model	264
<i>I. Lagzi, A.S. Tomlin, T. Turányi, L. Haszpra, M. Berzins and R. Mészáros</i>	

Aerosol Modeling

Development and Testing of an Aerosol Module for Regional/Urban Scales	277
<i>A. Arvanitis, N. Moussiopoulos and S. Kephelopoulos</i>	
Evaluation of the Equilibrium, Dynamic, and Hybrid Aerosol Modeling Approaches in a One-Dimensional Lagrangian Trajectory Model	289
<i>B. Koo and S. N. Pandis</i>	
Initial Results from Long-Range Transport of Particulate Matter in Europe.....	298
<i>S. Tsyro, L. Pirjola, M. Kulmala, D. Simpson and L. Tarrason</i>	
Modeling Aerosol Dynamics: A Stochastic Algorithm.....	308
<i>E. Debry, B. Jourdain and B. Sportisse</i>	
Adjoint Data Assimilation for Aerosol Dynamic Equations	319
<i>A. Sandu, D. Daescu and G. R. Carmichael</i>	
Particulate Air Quality over Europe in the Growing Season of 1995 and 2010 as Simulated with the MADE/EURAD Model	332
<i>H. Hass, B. Schell, I. J. Ackermann and C. Kessler</i>	

Dynamical Aspects

Use of Wind Tunnel Measurements for Mathematical Model Comparison and Validation	341
<i>A. Corti, M. Zanobini and E. Canepa</i>	
Influence of Underlying Surface Forest Fraction to the Meso-Scale Wind Fields and Dispersion Conditions.....	355
<i>M. Kaasik</i>	

Simulations of Roof Pitch and Symmetry Effects on Urban Canyon Circulations Using a 2D Lattice Boltzmann Model	361
<i>L. F. de la Fuente, D. M. Causon, D.M. Ingram, C.G. Mingham and D.W. Raper</i>	

A Study on Synoptically Influenced Local Wind Circulation in Complex Terrain and Its Application to Air Quality Modeling	372
<i>S-M. Lee, H. J. S. Fernando and J. C. R. Hunt</i>	

A Langevin Approach to the Diffusion Equation	380
<i>B. Spagnolo and P. Barrera</i>	

Sensitivity Analysis

Air Quality Simulations over Europe Using the CAMx-RSM-MM5 System: Sensitivity to Meteorology and Initial Concentrations	391
<i>R. San José, J. L. Pérez, I. Salas, J. I. Pérez, A. Martín, R. Suárez and R. M. González</i>	

Sensitivity Studies with the Adjoint of a Chemistry Transport Model for the Boundary Layer	400
<i>H. Schmidt</i>	

Multiphase Chemistry Modeling

Mechanism Development for Tropospheric Multiphase Chemistry with CAPRAM	413
<i>B. Ervens and H. Herrmann</i>	

The Role of Variable Droplet Size-Resolution in Aqueous-Phase Atmospheric Chemistry Modeling	422
<i>K. M. Fahey and S. N. Pandis</i>	

Three-Dimensional Calculation of Photolysis Frequencies in the Presence of Clouds	431
<i>A-L. Brasseur, R. Ramaroson, A. Delannoy, W. Skamarock and M. Barth</i>	

Modeling of Atmospheric Multiphase Chemistry: Numerical Integration and Sensitivity Analysis	444
<i>R. Djouad, B. Sportisse, N. Audiffren and I. Charpentier</i>	

Data Assimilation and Inverse Modeling

Identification of Chemical Species Emission with Variational Assimilation of Restricted Artificial Observations Using a Reduced Urban Chemistry Transport Scheme.....	457
<i>S. Massart, J-P. Argaud, A. Piacentini and O. Thual</i>	
Data Assimilation with a Multi-scale Chemistry Transport Model and Validation.....	467
<i>N. Blond, R. Vautard</i>	
Adjoint Sensitivity Analysis Applied to the Adaptive Location of the Observations	476
<i>D. N. Daescu and G. R. Carmichael</i>	
Modelling the UTLS Region with a Comprehensive Multi-scale CTM and Using Data Assimilation	489
<i>H. Teyssède, M.-L. Cathala, P. Simon, J. Paillex and V.-H. Peuch</i>	
Some Remarks Concerning Inverse Modeling and Data Assimilation for Slow-Fast Atmospheric Chemical Kinetics	499
<i>D. Quélo, B. Sportisse, J-P. Berroir and I. Charpentier</i>	

Statistical Methods

Modelling of Meteorological Factor Impacts on Urban Air Pollution Species by Fuzzy Logic Approach.....	513
<i>O. M. Pokrovsky and R. H. F. Kwok</i>	
Non-parametric Short-Term Prediction of Ozone Concentration in Berlin: Preconditions and Justification	527
<i>P. Haase, U. Schlink and M. Richter</i>	
Ozone Modeling in an Urban Atmosphere Using Artificial Neural Network. Hybrid Hidden Markov Model / Multi-layer Perceptron The NEUROZONE Model	537
<i>J. Rynkiewicz, A. L. Dutot A.L. and F. Steiner</i>	
Forecasting Ozone Peaks Using Self-organizing Maps and Fuzzy Logic.....	544
<i>P-Y. Glorennec</i>	

Poster Session

Idealised Numerical Simulations of Aerodynamic Roughness Length Effects on Sea Breeze Characteristics	553
<i>M. T. Prtenjak</i>	

A Neural Prediction Model for the Maximum Daily Ozone Concentration	557
<i>G. Nunnari and A. Nucifora</i>	
INTERNET Operational Air Quality Modelling: Bilbao (Spain) and Leicester (UK).....	560
<i>R. San José, I. Salas, J.L. Pérez, A. Martín, J.I. Pérez and R.M. González</i>	
Numerical Modelling of Atmospheric Particles Dispersion over an Heterogenous Landscape.....	562
<i>H. Foudhil, Y. Brunet and Caltagirone</i>	
A Study on the Aerosol Dispersion Model Implemented in ISC3 Code of US-EPA.....	565
<i>I. Ciucci, M. Mazzini and S. Strinati</i>	
Use of Computed Trajectories in Aerobiology and Air Pollution Studies	571
<i>D. Schneiter, R. Gehrig and D. Ruffieux</i>	
Application of Artificial Neural Network in Forecasting of Air Pollution in a Large Industrial Urban Area	574
<i>E. Krajny, L. Osródka and M. Wojtylak</i>	
Surface Exchanges in the Multiscale Chemistry and Transport Model MOCAGE	578
<i>M. Michou, F. Brocheton, A. Dufour and V-H. Peuch</i>	
A Combined Modelling System for the Simulation of the Transport and Dispersion in Coastal Areas	582
<i>C. Mangia, I. Schipa, P. Martano, M. Miglietta and U. Rizza</i>	
Parameter Selection for Pollutant Emission Modeling by Neural Networks. Application to a Re-heating Furnace	584
<i>A. Ionescu, L. Oukhellou, Y. Candau and P. Lelouër</i>	
Optimization of an Urban Air Monitoring Network	586
<i>A. Ionescu and Y. Candau</i>	
Volatile Organic Compounds Source Apportionment in the City of Rome	588
<i>R. Fusco and P. Buttini</i>	
Samaa: A Software Adapted to Air Pollution Scenarios Modelling	591
<i>C. Gueguen</i>
