1	Seafoods: Quality, Technology and Nutraceutical Applications – an Overview	1
	CESARETTIN ALASALVAR	
2	The Killing of Quality: The Impact of Slaughter Procedures on Fish Flesh	7
	DAVE ROBB	
2.1	Introduction	7
2.2	What is Quality?	7
2.3	Fish Muscle Structure and Physiology	8
2.4	Slaughter Procedures	10
2.5	Effects of Slaughter Activity and Stress on the Quality of the Fish	11
2.6	Conclusions	14
	References	15
3	Practical Evaluation of Fish Quality	17
	CESARETTIN ALASALVAR, TONY GARTHWAITE, ABDULLAH ÖKSÜZ	
3.1	Introduction	17
3.2	Extended Shelf Life	18
3.3	Evaluation of Fish Freshness and Quality	20
3.3.1	Sensory Methods	20
3.3.2	Non-Sensory Methods	22
3.3.3	Systematic Methods	22
3.4	Practical Methods of Evaluation of Fish Freshness	22
3.4.1	Materials and Methods	22
3.4.2	Freshness Assessment of Cultured Sea Bream Stored in Ice	23
3.4.2.1	TFRU Sensory Assessment Scheme	23
3.4.2.2	K Value Assessment	24
3.4.2.3	Texture Assessment	26
3.4.3	Freshness Assessment of Cultured Rainbow Trout Stored in Ice	27
3.5	Conclusions	29
	References	29

4	Eating Quality of Deep-Water Fish Species and their Products . .	33
	MARTINE BRENNAN, RONAN GORMLEY	
4.1	Introduction	33
4.2	Materials and Methods	34
4.2.1	Catching and Storage of the Fish	34
4.2.2	Concentrations of Heavy Metals and Micro-Organisms	34
4.2.3	Colour and Toughness of Flesh	34
4.2.4	Sensory Evaluation	35
4.2.5	Preparation of Fish Products	35
4.2.5.1	Nuggets	35
4.2.5.2	Fish-Cakes	35
4.3	Results and Discussion	36
4.3.1	Concentrations of Heavy Metals and Micro-Organisms	36
4.3.2	Fish Appearance	37
4.3.3	Fish Texture	37
4.3.4	Sensory Analysis of Fillets	38
4.3.5	Sensory Analysis of Fish Products	38
4.3.6	Problems for Processors	40
4.4	Conclusions	40
	References	41
5	Quality Control by Instrumental Texture Measurements	43
	PAUL NESVADBA	
5.1	Introduction	43
5.2	Difficulties in Measuring Texture of Fish	44
5.3	Sensory and Instrumental Tests for Texture of Fish	45
5.3.1	Sensory Tests of Texture as an Attribute of Quality	45
5.3.2	Instrumental Tests for Texture of Fish and Fish Products	46
5.3.3	Connection Between Sensory and Instrumental Tests	49
5.4	Modelling of Viscoelastic Properties in Terms of Lumped Parameters	49
5.4.1	Oscillatory Measurements	51
5.4.2	Creep and Relaxation Measurements	52
5.5	Instrumental Texture Measurements of the Quality of Fish	53
5.6	Conclusions	56
	References	56
6	Measurement of the Fish Content in Fish Products	59
	KEVIN D. HARGIN	
6.1	Introduction	59
6.2	Legislative Position	60
6.3	Problems in Measuring Fish Content	61
6.3.1	Total protein content	63
6.4	Code of Practice	67
6.5	Conclusions	70
	References	71

7	Functional Properties of Fish Proteins	73
	RACHEL GOODBAND	
7.1	Introduction	73
7.2	Proteins of Fish Muscle	73
7.3	Supply Chain and Protein Functionality	75
7.4	Effect of Freezing	76
7.5	Use of High Pressure to Prevent Frozen Deterioration	78
7.5.1	Principles of High Hydrostatic Pressure Processing	79
7.5.2	Effect of Hydrostatic Pressure on Myofibrillar Proteins	79
7.5.3	Stabilisation of Cod Muscle Against Frozen Deterioration by the Application of High Hydrostatic Pressure	79
7.6	Conclusions	82
	References	82
8	Binding and Texture Modification Using Transglutaminase . . .	83
	ANGELA MUMBY	
8.1	Introduction	83
8.2	Properties of Transglutaminase	83
8.3	Activa EB for Binding	84
8.4	Activa WM for Texture	86
8.5	Conclusions	87
9	Histamine Toxicity and Scombroid Fish Poisoning: a Review . .	89
	PANOS MAVROMATIS, PETER QUANTICK	
9.1	Introduction	89
9.2	What is Histamine?	90
9.3	Health Aspects of Histamine	90
9.3.1	Allergic Reactions and Role of Histamine	90
9.3.2	Histamine in Humans	91
9.3.2.1	Symptoms	91
9.3.3	Mechanism of Toxicity	92
9.3.4	Synthesis of Indigenous Histamine	93
9.3.5	Histamine Receptors and Their Role	93
9.3.6	Role of Histamine Receptors and their Agonists and Antagonists	94
9.3.6.1	Histamine Agonists	94
9.3.6.2	Histamine Antagonists	94
9.3.7	Antihistamines	95
9.4	Scombroid Poisoning and Histamine in Fish	95
9.4.1	Controlling Histamine Formation	97
9.4.2	Permissible Limits for Histamine in Fish	98
9.4.3	Outbreaks and Epidemiology	98
9.5	Conclusions	99
	References	99

10	Analysis of Seafood Aroma/Odour by Electronic Nose Technology and Direct Analysis	105
	JOHN M. GRIGOR, BRENDEN J. THEAKER, CESARETTIN ALASALVAR, WILLIAM T. O'HARE, ZULFIQUR ALI	
10.1	Introduction	105
10.2	Flavour Active Compounds	106
10.2.1	Development of Desirable Fresh Flavour	106
10.2.2	Loss of Freshness and Spoilage	107
10.2.3	Pre and Post Harvest Taints	107
10.3	Analysis of Seafood Aroma by Sensor Array Technology	108
10.3.1	High Temperature Sensors	109
10.3.1.1	MOS Sensors	109
10.3.1.2	MOSFET Sensors	109
10.3.2	Ambient Temperature Sensors	109
10.3.2.1	Conducting Polymer Sensors	109
10.3.2.2	BAW and SAW Sensors	110
10.3.3	Pattern Recognition	110
10.3.4	Applications	112
10.3.5	Advantages and Disadvantages of Electronic Nose Technology	114
10.4	Direct Approach to the Analysis of Seafood Aroma	114
10.4.1	Identification and Quantitation of Aroma Compounds	114
10.4.2	Extraction and Concentration of Important Aroma Compounds	115
10.4.2.1	Traditional Extraction Techniques (Distillation and Solvent Extraction)	116
10.4.2.2	Headspace Sampling Techniques	116
10.4.2.3	Model Systems and Direct Sampling	118
10.5	Conclusions	118
	References	118
11	Improved Utilisation of Fish and Shellfish Waste	123
	TONY TAYLOR, CESARETTIN ALASALVAR	
11.1	Introduction	123
11.2	Recovery of Fish Flesh	125
11.2.1	Whitening of Mince Using Titanium Dioxide	126
11.2.2	Whitening of Flaps Using Hydrogen Peroxide	128
11.3	Extraction and Purification of Enzymes	129
11.3.1	Extraction of Enzymes from Shellfish Waste	130
11.3.2	Extraction and Purification of Hyaluronoglucosidase (EC 3.2.1.35)	131
11.4	Intermediate Moisture Animal Feed (Pig Feed)	133
11.4.1	Product Development	133
11.5	Conclusions	135
