

Contents

<i>Preface</i> T.Y. Lin, Y.Y. Yao and L.A. Zadeh	V
PART 1: GRANULAR COMPUTING – A NEW PARADIGM	
<i>Some Reflections on Information Granulation and its Centrality in Granular Computing, Computing with Words, the Computational Theory of Perceptions and Precisiated Natural Language</i> L.A. Zadeh	3
PART 2: GRANULAR COMPUTING IN DATA MINING	
<i>Data Mining Using Granular Computing: Fast Algorithms for Finding Association Rules</i> T.Y. Lin and E. Louie	23
<i>Knowledge Discovery with Words Using Cartesian Granule Features: An Analysis for Classification Problems</i> J.G. Shanahan	46
<i>Validation of Concept Representation with Rule Induction and Linguistic Variables</i> S. Tsumoto	91
<i>Granular Computing Using Information Tables</i> Y.Y. Yao and N. Zhong	102
<i>A Query-Driven Interesting Rule Discovery Using Association and Spanning Operations</i> J.P. Yoon and L. Kerschberg	125

PART 3: DATA MINING

<i>An Interactive Visualization System for Mining Association Rules</i>	145
J. Han, N. Cercone and X. Hu	
<i>Algorithms for Mining System Audit Data</i>	166
W. Lee, S.J. Stolfo and K.W. Mok	
<i>Scoring and Ranking the Data Using Association Rules</i>	190
B. Liu, Y. Ma and C.K. Wong	
<i>Finding Unexpected Patterns in Data</i>	216
B. Padmanabhan and A. Tuzhilin	
<i>Discovery of Approximate Knowledge in Medical Databases Based on Rough Set Model</i>	232
S. Tsumoto	

PART 4: GRANULAR COMPUTING

<i>Observability and the Case of Probability</i>	249
C. Alsina, J. Jacas and E. Trillas	
<i>Granulation and Granularity via Conceptual Structures: A Perspective From the Point of View of Fuzzy Concept Lattices</i>	265
R. Bělohlávek	
<i>Granular Computing with Closeness and Negligibility Relations</i>	290
D. Dubois, A. Hadj-Ali and H. Prade	
<i>Application of Granularity Computing to Confirm Compliance with Non-Proliferation Treaty</i>	308
A. Fattah, V. Pouchkarev, A. Belenki, A. Ryjov and L.A. Zadeh	

<i>Basic Issues of Computing with Granular Probabilities</i> G.J. Klir	339
<i>Multi-dimensional Aggregation of Fuzzy Numbers Through the Extension Principle</i> G. Mayor, A.R. de Soto, J. Suñer and E. Trillas	350
<i>On Optimal Fuzzy Information Granulation</i> A. Ryjov	364
<i>Ordinal Decision Making with a Notion of Acceptable: Denoted Ordinal Scales</i> R.R. Yager	398
<i>A Framework for Building Intelligent Information-Processing Systems Based on Granular Factor Space</i> F. Yu and C. Huang	414

PART 5: ROUGH SETS AND GRANULAR COMPUTING

<i>GRS: A Generalized Rough Sets Model</i> X. Hu, N. Cercone, J. Han and W. Ziarko	447
<i>Structure of Upper and Lower Approximation Spaces of Infinite Sets</i> D.S. Malik and J.N. Mordeson	461
<i>Indexed Rough Approximations, A Polymodal System, and Generalized Possibility Measures</i> S. Miyamoto	474
<i>Granularity, Multi-valued Logic, Bayes' Theorem and Rough Sets</i> Z. Pawlak	487
<i>The Generic Rough Set Inductive Logic Programming (gRS-ILP) Model</i> A. Siromoney and K. Inoue	499
<i>Possibilistic Data Analysis and Its Similarity to Rough Sets</i> H. Tanaka and P. Guo	518

Data Mining, Rough Sets and Granular Computing

Lin, T.Y.; Yao, Y.Y.; Zadeh, L.A. (Eds.)

2002, IX, 537 p., Hardcover

ISBN: 978-3-7908-1461-3

A product of Physica-Verlag Heidelberg
