

Contents

1. Introduction	1
1.1 A new theory	1
1.2 (Un)employment	3
1.3 Work organization and macroeconomic equilibrium	5
1.4 Skill bias and skill requirements	7
1.5 Other sources of unemployment	9
1.6 Main result and organization of the book	10
2. The basic model	13
2.1 Endowment, technology, demand and market structure	13
2.1.1 Labor supply	14
2.1.2 Organization technology	15
2.1.3 Production technology	17
2.1.4 Demand in the goods market	18
2.1.5 Firm behavior and equilibrium	18
2.2 Prices and production in the monopolistic competition equilibrium (stage 2)	20
2.2.1 The goods market	21
2.2.2 The labor market	23
2.3 The equilibrium provision of work places (stage 1)	27
2.4 The macroeconomic equilibrium: Summary and discussion	29
2.4.1 Equilibrium employment	29
2.4.2 The ratio of non-production labor to labor in production	32
2.4.3 Equilibrium prices and wages	32
3. Unemployability and involuntary unemployment	35
3.1 Equilibrium employment vs. efficient level of employment	36
3.2 Unemployment under wage rigidity	39
3.3 Market power of firms and rents for firm owners	43
3.3.1 The role of market power in a zero profit equilibrium	44
3.3.2 The role of rents for firm-owners	45
3.4 Employment when firms have uncertain expectations	48
3.4.1 Unanticipated shocks	48

3.4.2	Macroeconomic equilibrium and the state of long-term expectations	51
4.	Equilibrium reorganization of work and aggregate level of employment	57
4.1	Employment under different organization technologies and the available range of abilities	59
4.2	Central coordination versus decentralized communication	63
4.2.1	Central coordination	63
4.2.2	Decentralized communication	65
4.3	The adoption of organization technologies by firms.....	67
4.4	Equilibrium employment after reorganization	69
4.4.1	Equilibrium with dominating reorganization technology	71
4.4.2	Equilibrium with non-dominating reorganization technology	72
4.5	Job creation, job destruction and lean management	76
4.5.1	Is reorganization harmful for employment?	76
4.5.2	Is reorganization successful in bringing down the ratio of non-production to production work?	77
4.5.3	Some remarks on the role of shareholder orientation and globalization for the reorganization of work	79
5.	Skilled and unskilled labor	85
5.1	Skilled labor as a limiting factor	87
5.2	Extension of the basic model to two types of labor	90
5.2.1	Endowment and technology	90
5.2.2	Monopolistic competition at stage 2	93
5.2.3	The firms' provision of work places at stage 1	95
5.2.4	Aggregate employment and wages implied by the behavior of firms	96
5.3	Employment and skill structure of jobs in the macroeconomic equilibrium	97
5.4	The role of skill supply and technological change for the employment of unskilled labor	99
5.4.1	Supply of skilled labor and (un-)employment of unskilled labor	100
5.4.2	The impacts of technological change	102
5.5	(Un)employment of skilled and unskilled labor when high-skilled workers have the power to acquire a rent	105
5.5.1	Rigidity of the relative wage of skilled labor	106
5.5.2	Rents of non-production workers	111
6.	Capital and the provision of work places	117
6.1	Introducing capital into the basic model	118

6.2	Employment and interest rate in the macroeconomic equilibrium	121
6.3	Comparative-static analysis of the macroeconomic equilibrium	125
6.3.1	Equilibrium employment and interest rate as functions of capital supply	126
6.3.2	The effects of a change in the non-production requirements of organizing work	126
6.3.3	Size of the labor force and return on capital	132
6.4	The macroeconomic equilibrium when capital supply is elastic	134
6.4.1	Equilibrium in a perfect capital market	134
6.4.2	The impact of capital market imperfections on employment	135
6.5	Capital mobility and employment	137
6.5.1	Equilibrium in a small open economy	138
6.5.2	International equilibrium with and without capital mobility	140
7.	Investment and savings. Supply-side vs. demand-side macroeconomic equilibria	151
7.1	The relationship between investment, savings and other macroeconomic variables	153
7.1.1	Macroeconomic relationships in a monopolistic competition equilibrium (stage 2)	153
7.1.2	Relationships between macroeconomic variables in a two-stage equilibrium	154
7.1.3	Equilibrium accumulation	155
7.2	Supply side vs. demand side in the equilibrium at stage 2 ...	157
7.2.1	Full utilization of capacity	157
7.2.2	Underutilization of capacity when macroeconomic activity is constrained by effective demand	158
7.3	Equilibrium accumulation and equilibrium provision of jobs when firms are supply oriented	161
7.4	Equilibrium employment and equilibrium accumulation when firms have pessimistic demand expectations	165
7.4.1	Demand-determined two-stage equilibrium	165
7.4.2	Investment and savings in a demand-determined equilibrium	169
8.	Summary	177
A.	Appendix to Chapter 2	189
B.	Appendix to Chapter 6	191
