

Contents

1. INTRODUCTION	1
1 Motivating example	1
2 An overview of the book	4
3 How to read the book	6
4 Historical remarks	12
2. PRELIMINARY NOTIONS	15
1 Basic algebraic structures	15
2 Model theoretic background	25
3 Subobjects and regular subobjects	30
4 Finitely presented algebras	32
5 Principal congruences	36
6 The amalgamation property	40
7 Exercises	44
3. MODEL COMPLETIONS	49
1 r -Heyting categories	49
2 Model completions and fp algebras	60
3 Exercises	71
4. HEYTING ALGEBRAS	73
1 Basic definitions	73
2 Finitely presented Heyting algebras	78
3 Duality for Heyting algebras	82
4 A combinatorial result	88
5 Properties of \mathbf{M}_H and Ψ_H	91

6	Second order extensions of IpC	95
7	Quantifier-elimination	98
8	\mathbf{M}_H is not exact	101
9	Some applications	104
10	Projective Heyting algebras	106
11	Exercises	109
5.	DUALITY FOR MODAL ALGEBRAS	115
1	Frames, evaluations and games	115
2	The category of finite \mathbf{S} -frames	125
3	The category \mathbf{M}_S	133
4	Finitely presented \mathbf{S} -algebras	143
5	Duality	147
6	Regularity of monomorphisms	148
7	Combinatorial Conditions	153
8	Exercises	159
6.	MODEL COMPLETIONS IN MODAL LOGIC	163
1	Negative results	163
2	Diagonalizable algebras	166
3	Varieties of interior algebras	169
4	Exercises	176
7.	ALGEBRAICALLY CLOSED MODELS	181
1	FLEA's	181
2	Grothendieck Topologies on algebras	182
3	$Sh(\mathbf{T}^f, \mathbf{J}^f)$ as a classifying topos	185
4	Models in Set	188
5	The case of Heyting algebras	193
6	Existentially closed algebras	198
7	Exercises	199
8.	OPEN PROBLEMS	203
9.	APPENDIX	207
1	Glossary of basic categorical notions	207
2	Internal algebras in categories	222
3	Grothendieck topologies	224

4	Sheaves	225
5	Associated sheaf functor	226
6	Properties of Grothendieck toposes	227
7	Classifying toposes	229

Sheaves, Games, and Model Completions
A Categorical Approach to Nonclassical Propositional
Logics

Ghilardi, S.; Zawadowski, M.

2002, IX, 245 p., Hardcover

ISBN: 978-1-4020-0660-9
