

INDEX

- Age, 3, 38, 45, 48-9, 51, 54-55, 57, 60, 63, 65, 67-69, 71, 73-75, 77-79, 88, 91, 95, 100, 102-103, 107-108, 114, 117, 119, 126-127, 138-142, 152-153, 166, 171-172, 184
- Alma-Ata, Declaration of, 25
- Antonovsky, Aaron, 1, 10-15, 18, 20-21, 24, 26, 29-32, 34-36, 42-43, 47, 49, 95-97, 99, 101, 111, 114-115, 119, 124
- Bureaucracy – as delimiter of public participation in policymaking, 130-131, 136, 181, 184-185
- Biomedical paradigm, 2, 21, 38, 91, 97, 131, 151, 166, 173, 191
- Clinical health (see also positive health), 95-96, 98-101, 105-109, 111-115, 117, 128-129, 131, 134, 140-142, 147, 151, 157, 165-169, 171-172, 175, 190
- Communicative Action (Theory of), 1, 18-20, 24, 122-123, 176, 179-193
- Complexity, 26-27, 29-40, 42, 44, 96
- Definitional dimension, 6-11, 14-16, 18-19
- Determinism, 40; versus notion of a free will, 33
- Diet (see also nutrition and energy: quality of supply/demand), 5, 36, 47, 90, 93, 98-99, 108, 111-112, 149
- Domestic status, 100, 102-104, 108
- Dubos, René J., 1, 3, 10, 14-18, 22-24, 33, 37-38, 41-42, 44-45, 65-66, 100, 173
- Empowerment, 10, 25-26, 40, 43-44, 66, 81-82, 85, 112, 146-147, 172
- Energy – free energy, 32, 36-37 ; entropy, 26-33, 36-37, 95 ; quality of supply/demand, 32, 35-39; opportunity for export of, 36-39 ; aesthetic, 38-39
- Ethics, 16, 83, 150; as delimiter of public participation in policy formulation, 148, 183-184
- Ethnicity, 45, 48, 88, 91-92, 115
- Etiological resource types, 13, 20, 24
- Evidence – on role and meaning within health professionalism, 17, 137, 151, 167, 183, 189-190, 193
- Exercise (see also physical activity), 34, 46, 47, 55-56, 72, 75, 90, 93, 96, 108, 111-112, 117, 145, 149
- Gender (see also sex: biological), 3, 45, 48, 51-52, 54-55, 60, 63, 65, 67-69, 71, 73, 77, 79, 88, 91, 95, 100, 102-104, 106-107, 113, 119, 126-127, 142-144, 153-154, 171-172
- Generalized Resistance Deficits (GRD's), 20
- Generalized Resistance Resources (GRR's), 12, 20, 30
- Generalized Resistance Resources/Deficits (GRR/RD's), 11, 15, 21, 30
- Genetics, 13, 16, 22, 23, 33, 49, 57, 60, 62-63, 76-77, 84-85, 99, 112, 114, 133-135, 137, 139-140, 149, 151-152, 157, 164-166, 168, 186
- Habermas, Jürgen, 1, 6-7, 17-19, 24, 120, 122-123, 150, 153, 155, 157, 167, 176, 178-180
- HARDiness, 35
- Health professionalism, ix, xii-xiii, 1-6, 9, 13, 17-18, 24, 44, 163, 166-167, 169, 171, 174-182, 184, 186-189, 191-193
- Health Promotion, 2, 4, 9-10, 13, 18, 21-23, 25-26, 43, 46-47, 66, 77, 81-83, 85, 92-94, 98, 119-120, 122-125, 128-129, 131-133, 135, 138, 141-142, 144, 146-147, 150-151, 157-158, 163, 173-174, 180, 190; structural versus behavioral, 35, 62
- Humanism, 192-193
- Humanitarianism, 192-193

- Iatrogenesis, 4, 119
- Immune function, 35, 41, 77
- Interests – as delimiter of public participation in policy formulation, 121, 136, 155, 177, 181, 185-186
- Jakarta Declaration of Health Promotion, 4, 25, 81
- Kingdon, John, 120-122, 124, 150-156, 158, 165, 189, 191
- Social learning, 15, 44, 97
- Meditation, 34
- Newspapers (see also press), 81-94
- Nutrition (see also see also diet and energy: quality of supply/demand), 34, 36, 40, 52, 55-56, 72, 75, 90
- Ontogenesis, 42, 97-98
- Ottawa Charter of Health Promotion, 4, 25, 46, 81, 191
- Participation, 4-5, 10, 19-20, 22-23, 25-44, 46-48, 51, 53, 61, 66, 79, 81-82, 85, 93, 96, 97, 99, 103, 112-113, 119-158, 175, 178-181, 189
- Pathogenesis/pathogenic model, xii, 20, 30, 41, 77, 95-97, 119
- Perturbations (minimal and structural), 27, 28, 77
- Phenomena-labeled-as-health (PLAH), 5-6, 8-10, 12, 15-17, 19-24; empirically-operationalizable (EO-PLAH), 19-24, 96, 169; non-empirically operationalizable (NEO-PLAH), 19-20, 23-24, 96, 169
- Phylogenesis, 40, 42, 97-98, 111, 131
- Physical activity (see also exercise), 34-35, 40-41, 97-98
- Policy – most influential primary prevention and health promoting policies in The Netherlands 1985-2001, 127-128, 159-162; policy legacies as delimiters of public participation in policy formulation, 184-185
- Positivism, 1-5, 9-10, 17-18, 21, 24, 169
- Poverty, 33, 77-78, 138, 146
- Predisposition – physiological, 31, 32, 33-34, 41; psychological, 31-32, 34-35
- Press (see also newspapers), xiii, 81-94, 169, 170
- Referential contexts (of objectivity, intersubjectivity, and subjectivity), 6-24
- Resources (biochemical, ideological, and environmental), 9-15, 17, 21-24; as delimiter of public participation in policy formulation, 182-183
- Salutology, 1, 17-24
- Science – as delimiter of public participation in policy formulation, 183
- Self-Efficacy, 13, 21, 35, 78, 148
- Sense-of-Coherence (SOC), 11-12, 30-31, 34-35, 40-41, 114
- Sex – biological, 142, 144, 153, 166, 184
- Smoking (and smoking status), x, xii, 3, 13, 17, 21, 34, 40, 45-47, 51-52, 54-55, 63, 65-68, 75-79, 90, 93, 98, 102-103, 107-108, 111-114, 118, 126-127, 147-150, 155-156, 166, 172-173, 183, 192
- Social entrepreneurship, 43-44
- Social support, 37, 41
- Socioeconomic status (SES), 3, 13, 22, 38, 45, 49, 51, 82, 91-92, 95, 100, 102-104, 107-108, 114-115, 126-127, 144-147, 154-155, 170, 172; average neighborhood income (ANI) as a proxy for, 75-78
- Stress, 11, 15, 30-31, 34-36, 42, 47, 57-58, 71-74, 76-77, 79, 114, 117, 137, 183
- Thermodynamics – basis for fundamental model of health etiology, 26-32; and life, 29; and disease, 29
- Urban environments, 13, 38-39
- Validity claims, 17-24, 123
