Part I PROPOSITIONAL **BI**

1. INTRODUCTION TO PART I	3
1 A Proof-theoretic Introduction	3
2 A Semantic Introduction	6
2.1 Algebraic and Topological Semantics	6
2.2 Categorical Semantics	6
2.3 Kripke Semantics	7
3 Towards Classical Propositional BI	10
4 Logical Relations	11
5 Computational Models	11
2. NATURAL DEDUCTION FOR PROPOSITIONAL BI	13
1 Introduction	13
2 A Natural Deduction Calculus	13
3 The $\alpha\lambda$ -calculus	19
4 Normalization and Subject Reduction	25
5 Structural Variations on BI and $\alpha\lambda$	28

5.1	Affinity and Relevance	28
5.2	Dereliction	30
5.3	Non-commutativity	30
5.4	More Combinators	31
3.	ALGEBRAIC, TOPOLOGICAL, CATEGORICAL	33
1	An Algebraic Presentation	33
2	A Topological Presentation	35
3	A Categorical Presentation	36
3.1	Day's Construction	45
3.2	Conservativity	46
3.3	Structural Variations	47
4.	KRIPKE SEMANTICS	51
1	Kripke Models of Propositional BI	51
2	Soundness and Completeness for BI without \perp	55
3	Kripke Models Revisited	65
5.	TOPOLOGICAL KRIPKE SEMANTICS	67
1	Topological Kripke Models of Propositional BI with \perp	67
2	Soundness and Completeness for BI with \perp	71
3	Grothendieck Sheaf-theoretic Models	76
6.	PROPOSITIONAL BI AS A SEQUENT CALCULUS	89
1	A Sequent Calculus	89
2	Cut-elimination	89
3	Equivalence	93
4	Other Proof Systems	95
7.	TOWARDS CLASSICAL PROPOSITIONAL BI	97
1	Introduction	97
2	An Algebraic View	98
3	A Proof-theoretic View	100
4	A Forcing Semantics	102
5	Troelstra's Additive Implication	103

8. BUNCHED LOGICAL RELATIONS	107
1 Introduction	107
2 Kripke $\alpha\lambda$ -models	107
2.1 Kripke $\alpha\lambda$ -models and DCCs	115
3 Bunched Kripke Logical Relations	116
9. THE SHARING INTERPRETATION, I	121
1 Introduction	121
2 Proof-search and (Propositional) Logic Programming	122
3 Interference in Imperative Programs	129
4 Petri Nets	134
5 CCS-like Models	136
6 A Pointers Model	138
 Part II PREDICATE BI	
10. INTRODUCTION TO PART II	147
1 A Proof-theoretic Introduction to Predicate BI	147
2 Kripke Semantics for Predicates and Quantifiers	151
3 Fibred Semantics and Dependent Types	154
4 Computational Interpretations	156
11. THE SYNTAX OF PREDICATE BI	157
1 The Syntax of Predicate BI	157
2 Variations on Predication	162
12. NATURAL DEDUCTION & SEQUENT CALCULUS	163
1 Propositional Rules	163
2 Quantifier Rules	168
3 Strong Normalization and Subject Reduction	172
4 Predicate BI as a Sequent Calculus	174
13. KRIPKE SEMANTICS FOR PREDICATE BI	179
1 Predicate Kripke Models	179
2 Elementary Soundness and Completeness for Predicate BI	186

14. TOPOLOGICAL KRIPKE SEMANTICS FOR PREDICATE BI	201
1 Topological Kripke Models of Predicate BI with \perp	201
2 Soundness and Completeness for predicate BI with \perp	202
15. RESOURCE SEMANTICS, TYPE THEORY & FIBRED CATEGORIES	207
1 Predicate BI	207
2 Logical Frameworks	209
3 The $\lambda\Lambda$ -calculus	213
4 Context Joining	219
5 Multiple Occurrences	219
6 Variable Sharing	221
7 Equality	223
8 Basic Properties	223
9 The Propositions-as-types Correspondence	225
10 Kripke Resource Semantics for $\lambda\Lambda$	227
11 Kripke Resource $\lambda\Lambda$ -structure	228
12 Kripke Resource Σ - $\lambda\Lambda$ -model	234
13 Soundness and Completeness	243
14 A Class of Set-theoretic Models	253
15 Towards Systematic Substructural Type Theory	256
16. THE SHARING INTERPRETATION, II	263
1 Logic Programming in Predicate BI	263
2 ML with References in RLF	267
Bibliography	271
Index	283

The Semantics and Proof Theory of the Logic of
Bunched Implications

Pym, D.J.

2002, XLIX, 290 p., Hardcover

ISBN: 978-1-4020-0745-3
