

ACKNOWLEDGEMENTS

The majority of the papers in this collection had their origin in the 2001 Australasian Association for History, Philosophy, and Social Studies of Science annual conference, held at the University of Melbourne, where streams of papers on the themes of scientific realism and commonsense were organised. It soon became apparent that many of the papers in these streams were of unusually high quality and that there was a strong case for organising a new volume of the *Australasian Studies in History and Philosophy of Science* series based on these papers. The collection was further strengthened when Herman De Regt, Harold Kincaid and Keith Hutchison were invited to submit papers relevant to the combined themes of the collection.

All of the papers in this collection have been anonymously refereed and have been considerably revised from their original form. Thanks to Rod Home, the General Editor of the *Australasian Studies* series and to Stephen Gaukroger, who will assume the General Editorship of the series in 2003, for their encouragement and support in having this volume approved for publication. Thanks also to Howard Sankey who has been a constant source of good advice about the editing process. And thanks to Stephen Ames, Alan Chalmers, Wayne Christensen, Brian Ellis, Frank Jackson, Cathy Legg, Steve Matthews, Don Ross, David Spurrett, John Sutton and Neil Thomason for their invaluable assistance.
