Preface	ix
---------------	----

Part I: The philosophy of substructural logics

Chapter 1. The role of structural rules in sequent calculi.....	3
1. The "inferential approach" to logical calculus.....	3
1.1 Structural rules, operational rules, and meaning.....	5
1.2 Discovering the effects of structural rules.....	11
2. Reasons for dropping structural rules.....	15
2.1 Reasons for dropping structural rules altogether.....	15
2.2 Reasons for dropping (or eliminating) the cut rule.....	17
2.3 Reasons for dropping the weakening rules.....	21
2.4 Reasons for dropping the contraction rules.....	25
2.5 Reasons for dropping the exchange rules.....	28
2.6 Reasons for dropping the associativity of comma.....	30
3. Ways of reading a sequent.....	30
3.1 The truth-based reading.....	31
3.2 The proof-based reading.....	31
3.3 The informational reading.....	32
3.4 The "Hobbesian" reading.....	34

Part II: The proof theory of substructural logics

Chapter 2. Basic proof systems for substructural logics.....	41
1. Some basic definitions and notational conventions.....	42
2. Sequent calculi.....	44
2.1 The calculus LL	44
2.2 Adding the empty sequent: the dialethic route.....	49
2.3 Adding the lattice-theoretical constants: the bounded route.....	49
2.4 Adding contraction: the relevant route.....	50
2.5 Adding weakening: the affine route.....	55
2.6 Adding restricted structural rules.....	57
2.7 Adding the exponentials.....	65
3. Hilbert-style calculi.....	68
3.1 Presentation of the systems.....	68
3.2 Derivability and theories.....	73
3.3 Lindenbaum-style constructions.....	81

4. Equivalence of the two approaches.....	83
---	----

Chapter 3. Cut elimination and the decision problem.....	87
---	-----------

1. Cut elimination.....	87
1.1 Cut elimination for LK	87
1.2 Cut elimination for calculi without the contraction rules.....	94
1.3 Cut elimination for calculi without the weakening rules.....	97
1.4 Cases where cut elimination fails.....	99
2. The decision problem.....	100
2.1 Gentzen's method for establishing the decidability of LK	101
2.2 A decision method for contraction-free systems.....	105
2.3 A decision method for weakening-free systems.....	106
2.4 Other decidability (and undecidability) results.....	111

Chapter 4. Other formalisms.....	115
---	------------

1. Generalizations of sequent calculi.....	116
1.1 N -sided sequents.....	116
1.2 Hypersequents.....	121
1.3 Dunn-Mints calculi.....	127
1.4 Display calculi.....	130
1.5 A comparison of these frameworks.....	136
2. Proofnets.....	137
3. Resolution calculi.....	145
3.1 Classical resolution.....	146
3.2 Relevant resolution.....	149
3.3 Resolution systems for other logics.....	153

Part III: The algebra of substructural logics

Chapter 5. Algebraic structures.....	159
---	------------

1. $*$ -autonomous lattices.....	161
1.1 Definitions and elementary properties.....	161
1.2 Notable $*$ -autonomous lattices.....	165
1.3 Homomorphisms, ℓ -filters, ℓ -ideals, congruences.....	171
1.4 Principal, prime and regular ℓ -ideals.....	181
1.5 Representation theory.....	186
2. Classical residuated lattices.....	187
2.1 Maximal, prime, and primary ℓ -ideals.....	188
2.2 Subdirectly irreducible c.r. lattices.....	190
2.3 Weakly simple, simple and semisimple c.r. lattices.....	192

Part IV: The semantics of substructural logics

Chapter 6. Algebraic semantics	201
1. <i>Algebraic soundness and completeness theorems</i>	202
1.1 Calculi without exponentials.....	203
1.2 Calculi with exponentials.....	209
2. <i>Totally ordered models and the single model property</i>	213
3. <i>Applications</i>	219
Chapter 7. Relational semantics	221
1. <i>Semantics for distributive logics</i>	222
1.1 Routley-Meyer semantics: definitions and results.....	223
1.2 Applications.....	235
2. <i>Semantics for nondistributive logics</i>	239
2.1 General phase structures.....	240
2.2 General phase semantics.....	250
2.3 The exponentials.....	252
2.4 Applications.....	254
Appendix A: Basic glossary of algebra and graph theory.....	257
Appendix B: Other substructural logics.....	271
1. Lambek calculus.....	271
2. Ono's subintuitionistic logics.....	277
3. Basic logic.....	281
Bibliography.....	289
Index of subjects.....	301
