Preface	xi
List of Contributors	xiii
1. Introduction	1
C. Cocklin, I. Bowler and C. Bryant	
1.1 Change and transition in the countryside	1
1.2 Rural systems and sustainability	3
1.3 Confronting the challenge	6
Part I: Interpreting sustainability	
2. Developing indicators of 'sustainability'	13
W. Smith	
2.1 Introduction	13
2.2 Why is it so hard to establish good indicators?	14
2.3 Components of sustainability	16
2.4 Indicators and decision making for sustainability	19
2.5 Collecting data for indicators of sustainability	21
2.6 Looking for frameworks for indicators	22
2.7 From concept to action on sustainability	25
2.8 A critical review	26
2.9 Human needs, social capital and science	29
2.10 Conclusion	31
3. Nature, society and sustainability	35
G. M. Robinson	
3.1 Introduction	35
3.2 Defining sustainable development	36
3.3 Sustainability, nature and development	40
3.4 Malthus, Marx and sustainability	42
3.5 'Green' movements and sustainability	44
3.6 Environmental 'citizenship' and sustainable rural development: a case study of Canada's Atlantic Coastal Action Programme	49
3.7 Conclusion	53

4. The 'wild', the market and the native: indigenous issues in wildlife utilisation and management	59
--	----

M. Langton

4.1 Introduction	59
4.2 A new global market: the 'wild', the native and the market	60
4.3 The role of indigenous people in biodiversity conservation	61
4.4 Arguments about indigenous use of wildlife and sustainability	64
4.5 Reconceptualising indigenous relationships with the natural world	67
4.6 Indigenous responses to the pressures of development	73
4.7 Recognition of traditional resource rights and sustainability	75
4.8 Conclusion	78

Part II: Globalisation, restructuring and sustainability

5. Globalisation, food regimes and rural networks	81
---	----

R. Le Heron

5.1 Introduction	81
5.2 Food regimes, food chains and networking	82
5.3 Situated networking and learning challenges: New Zealand examples	85
5.4 Conclusion	92
6. Restructuring, regulation and sustainability	97

N. Lewis, W. Moran and C. Cocklin

6.1 Introduction	97
6.2 Regulation	98
6.3 Re-regulation and restructuring	100
6.4 Resiting and rescaling of regulation	102
6.5 Restructuring and sustainability	104
6.6 Sustainability and restructuring: beyond the environmental impulse	107
6.7 'Institutional thickness' and social sustainability	108
6.8 Governance	109

6.9	Governance and sustainability in the New Zealand wine industry	110
6.10	Conclusion	115
7.	Enterprises and commodity chains	123
M. Troughton		
7.1	Introduction	123
7.2	From subsistence to commercial agriculture	124
7.3	The development of agribusiness	130
7.4	Responses and alternatives	137
7.5	Conclusion: the question of sustainability	141
Part III: Environmental imperatives		
8.	Conservation and sustainability	147
M. Tilzey		
8.1	Introduction	147
8.2	Principles and concepts	147
8.3	The dynamics of conservation in the modern era	150
8.4	The preservationist phase	152
8.5	The regulatory phase	157
8.6	Post-materialist and sustainability phases	159
8.7	Conclusion	166
9.	Sustainable farming systems	169
I. Bowler		
9.1	Introduction	169
9.2	The limits to sustainable development in productivist agriculture	171
9.3	Emergent features of sustainable agriculture?	174
9.4	Developing sustainable farming systems	180
9.5	Conclusion	183
10.	Planning for sustainable rural land use systems	189
H. van Lier		
10.1	Introduction	189

10.2	Land-use planning and sustainability	189
10.3	The need for land-use planning	191
10.4	Spatial concepts	195
10.5	An elaborated example of the ecological network	200
10.6	Conclusion	207

Part IV: Rurality, community and development

11.	Rural population and services	211
-----	-------------------------------	-----

A. Joseph

11.1	Introduction	211
11.2	Long cycles of change	212
11.3	Short cycles of change	214
11.4	The rural elderly in the open society	216
11.5	Conclusion: prospects for the sustainability of rural communities and lifestyles	218

12.	Sustainable rural communities and rural development	225
-----	---	-----

R. Epps

12.1	Introduction	225
12.2	Globalisation, technological change and rural communities	228
12.3	The circumstances facing towns and regional centres	229
12.4	Enhancing the sustainability of rural communities: economic growth theory	231
12.5	Theories of rural and regional economic growth	232
12.6	Government policy approaches to stimulating rural economies	233
12.7	Ecological theory and the stability of rural businesses	238
12.8	Linkages to the urban-industrial complex	239
12.9	Urban-rural migration	241
12.10	New firm establishment	241
12.11	Conclusion	242

13.	Urban and rural interactions and rural community renewal	247
-----	--	-----

C. Bryant

13.1	Introduction	247
------	--------------	-----

13.2	An actor-based framework for analysing rural community sustainability	248
13.3	Urban and rural interactions	249
13.4	Sustainable communities	254
13.5	Rural community renewal and sustainability	256
13.6	Conclusion	265
14.	Conclusion	271
C. Bryant, I. Bowler and C. Cocklin		
	Index	275

The Sustainability of Rural Systems

Geographical Interpretations

Bowler, I.; Bryant, C.R.; Cocklin, C. (Eds.)

2002, XIII, 282 p., Hardcover

ISBN: 978-1-4020-0513-8
