CHAPTER 1: INTRODUCTION

1.1	The Invisible Truth of Classical Physics	1
1.2	Historiographic Orientation	5
	1.2.1 The Horizon of the Scientific Revolution (5); 1.2.2 Mechanics in the Eighteenth Century (9); 1.2.3 Three Controversies over the Concept of Force (15)	
1.3	The Place of Philosophy in this Book.....	21
	1.3.1 History of Science or Philosophy of Science? (21); 1.3.2 A Working Definition of Metaphysics (22); 1.3.3 Explicit and Implicit Metaphysics (26); 1.3.4 Substance and Structure: Basic Concepts of Metaphysical Change (28)	

PART A. THE UNITY OF THE CONCEPT OF FORCE

CHAPTER 2: FORCE LIKE WATER

2.1	A Brief Archeology of the Concept of Force in the Seventeenth Century	32
2.2	Quantity and Quality	35
	2.2.1 The Distinction according to Aristotle (35); 2.2.2 Scholastic Considerations (37); 2.2.3 Quantification of the Concept of Force (39)	
2.3	The Point of Departure: Dead and Living Force.....	41
	2.3.1 Galileo (42); 2.3.2 Descartes (47); 2.3.3 Impact, Lifting and Weight (50)	
2.4	Impetus: The Goal Attained.....	51
2.5	A Related Distinction: Inertia and Resistance	52
	2.5.1 Impetus, Living Force, and Inertia (52); 2.5.2 Galileo's Concept of Inertia (54); 2.5.3 Descartes's Concept of Inertia (56); 2.5.4 Newton's Concept of Inertia (57)	
2.6	The Unity of Newton's Concept of Force.....	59
	2.6.1 Instantaneous and Continuous Forces (59); 2.6.2 A Practical Example (62); 2.6.3 Force like Water (65)	
2.7	Conclusion	68

CHAPTER 3: LEIBNIZ: FORCE AS THE ESSENCE OF SUBSTANCE

3.1	Introduction	70
	3.1.1 Leibniz's Influence on the Eighteenth Century (70); 3.1.2 Leibniz's Significance for Mechanics (73); 3.1.3 The Structure of this Chapter (74);	
3.2	Leibniz's Early Concept of Force	75
	3.2.1 Leibniz's Criticism of Descartes (75); 3.2.2 The Measure of Force (77); 3.2.3 Force as the Contens and Cause of Transference (80)	
3.3	Leibniz's Differentiation of the Concept of Force	81
	3.3.1 Aristotelianism and Atomism (81); 3.3.2 From Moving Force to True Unity (83); 3.3.3 A Further Analysis of the True Unities (87); 3.3.4 Force as the Essence of True Unity (89)	
3.4	Leibniz's Concept of Mechanical Force	91
	3.4.1 Fundamental and Derivative Forces (91); 3.4.2 Active and Passive Forces (93); 3.4.3 Conservation of Living Force (94); 3.4.4 The Integration of Dead Force (95)	
3.5	Conclusion: Similarities between Newton's and Leibniz's Concepts of Mechanical Force	99

PART B. TOWARDS A NEW METAPHYSICS

CHAPTER 4: FROM CAUSE TO PHENOMENON

4.1	Introduction	104
4.2	Between Leibniz and d'Alembert: A Change in the Definition of the Problem.....	105
	4.2.1 Atomism and Conservation Theories (105); 4.2.2 Experimental Modes of Response (107); 4.2.3 The Importance of d'Alembert in the <i>Vis Viva</i> Controversy (109)	
4.3	Causality in Mechanics.....	111
	4.3.1 D'Alembert's Purification of Metaphysics (111); 4.3.2 Final Causes (113); 4.3.3 Mechanical Causes (114); 4.3.4 Necessity and Contingency (117)	
4.4	D'Alembert's Foundation of Mechanics	118
	4.4.1 D'Alembert's Method (118); 4.4.2 The Subject of Mechanics: Moving Matter (120); 4.4.3 The Principles of Statics and Dynamics (121); 4.4.4 Mechanics as a Science of Structure (126)	
4.5	D'Alembert's Conception of Force	126
	4.5.1 Property, Function and Cause (129); 4.5.2 The Measure of Living Force (131); 4.5.3 D'Alembert's Transformation of the Concept of Force (132)	
4.6	Conclusion: Structuralization and Instrumentalization.....	132

CHAPTER 5: FROM EFFICIENT TO FINAL CAUSES: THE ORIGIN OF THE PRINCIPLE OF LEAST ACTION

5.1	Introduction	134
5.1.1	The Greatest Possible Scandal at Court (134); Intermezzo: The Mathematical Formulation of the Principle of Least Action (136); 5.1.2 The Significance of the Principle of Least Action for Mechanics (137)	
5.2	Maupertuis's Newtonian Background	140
5.2.1	From Soldier to Scholar (140); 5.2.2 Maupertuis's Defense of Newton's Theory of Attraction (141); 5.2.3 The Expedition to the Pole (144)	
5.3	The Birth of the Principle of Least Action, in Maupertuis and Euler	145
5.3.1	Minimal Principles in Statics (145); 5.3.2 The Principle of Least Action in Optics (149); 5.3.3 Extending the Principle of Least Action to Mechanics (153); 5.3.4 Euler's Response to Maupertuis's "Law of Rest" (155)	
5.4	The First Steps of the Principle of Least Action	159
5.4.1	Maupertuis's "Lois du mouvement" (1746) (159); 5.4.2 Euler's Insights (163); 5.4.3 Euler's Foundation of the Laws of Collisions (167)	
5.5	Conclusion: Teleology and Structure Metaphysics	170

PART C. BETWEEN METAPHYSICS AND MECHANICS

CHAPTER 6: THE CONCEPT OF FORCE IN THE 1779 BERLIN ESSAY COMPETITION

6.1	Introduction	174
6.2	The Berlin Academy's Philosophical Competitions	174
6.2.1	An Innovation for the Academic World (175); 6.2.2 The Status of the Philosophical Competition at about 1779 (177)	
6.3	The Significance of the Competition on the Foundation of Force	180
6.3.1	Parisian Arrogance (180); 6.3.2 Formulation and Analysis of the Question (181); 6.3.3 Comparison with Wolff's Concept of Force (185)	
6.4	The Competition Essays	189
6.4.1	General (189); 6.4.2 Selection (189)	
6.5	Overview of the Selected Essays	192
6.5.1	The Prize-Winning Essay (Pap de Fagaras) (192); 6.5.2 Essay I-M726 (193); 6.5.3 Essay I-M729 (195); 6.5.4 Essay I-M731 (Rehberg) (196); 6.5.5 Essay I-M733 (198); 6.5.6 Essay I-M734 (Hißmann) (200); 6.5.7 Essay I-M736 (201)	
6.6	Conclusion: Divergence of Metaphysics and Mechanics	203

Annex to Chapter 6: The Original Formulation of the Berlin Academy's Competition Question for 1779	206
--	-----

CHAPTER 7: LAGRANGE'S CONCEPT OF FORCE

7.1	Introduction	207
7.2	Lagrange's Mathematical Reduction of Mechanics.....	208
	7.2.1 The 'Peak of Perfection' (208); 7.2.2 The Early Meaning of the Principle of Least Action for Lagrange (210)	
7.3	Lagrange's 'True Metaphysics'	216
	7.3.1 A Puzzling Remark (216); 7.3.2 Lagrange's Concept of Metaphysics (216); 7.3.3 Recognition and Rejection of Metaphysics (218)	
7.4	Lagrange's Analytic Foundation of Mechanics	218
	7.4.1 "Recherches sur la libration de la lune" (1764) (218); 7.4.2 The <i>Mécanique analytique</i> (221)	
7.5	Conclusion: Force and Structure in Lagrange's Thought	224

CHAPTER 8: METAPHYSICS CONCEALED

8.1	Exposition: A Paradox in the History of Science	229
8.2	Development: The Significance of Metaphysical Premises.....	230
8.3	Climax: The Concept of Mechanical Force between Substance and Structure	232
8.4	Resolution: Separation and Transformation around 1780.....	235
8.5	Epilogue: History and Metaphysics in Modern Natural Science	236

Bibliography	241

LIST OF ILLUSTRATIONS

Figure 2.1	Galileo's analogy between the effect of an impact and that of the pressure of a weight.....	43
Figure 2.2	Galileo's analogy of the process of impact with a mechanical tool.....	44
Figure 2.3	Galileo's analogy between the dynamic problem of an impact and a static situation	46
Figure 2.4	Descartes's comparison of raising a weight with and without a pulley	48
Figure 2.5	Descartes's distinction of action and power	49
Figure 2.6	Illustration of Newton's proof of Kepler's law	64
Figure 2.7	Metaphor of the action of force with water streaming out of a barrel.....	69
Figure 3.1	Schematic presentation of Leibniz's structure of substances	89
Figure 3.2	Impetus arises from infinitely many infinitely small conatuses	97
Figure 3.3	Parallels between Newton's and Leibniz's concept of force	101
Figure 3.4	Metaphor of the action of force with the pouring of water from one barrel into another	102
Figure 4.1	The principle of composite motion.....	124
Figure 5.2	Lever subject to a central force working at an infinite distance	148
Figure 5.1	A particle in motion under the influence of external central forces	136
Figure 5.3	System with one degree of freedom	149
Figure 5.4	System with two degrees of freedom	149
Figure 5.5	Euler's analogy with a static system of springs.....	166
Figure 7.1	Variation δ and differential d of $y(x)$	209
Figure 7.2.	The equilibrium of forces according to the principle of virtual velocities.....	219

What was Mechanical about Mechanics
The Concept of Force between Metaphysics and
Mechanics from Newton to Lagrange

Boudri, J.C.

2002, XVI, 280 p., Hardcover

ISBN: 978-1-4020-0233-5
