

## TABLE OF CONTENTS

Preface	ix
Acknowledgements	xv
CHAPTER 1    How Do People Learn?	1
CHAPTER 2    The Neurological Basis of Self-Regulation	27
CHAPTER 3    Brain Maturation, Intellectual Development and Descriptive Concept Construction	57
CHAPTER 4    Brain Maturation, Intellectual Development and Theoretical Concept Construction	79
CHAPTER 5    Creative Thinking, Analogy and a Neural Model of Analogical Reasoning	99
CHAPTER 6    The Role of Analogies and Reasoning Skill in Theoretical Concept Construction and Change	119
CHAPTER 7    Intellectual Development During the College Years: Is There a Fifth Stage?	135
CHAPTER 8    What Kinds of Scientific Concepts Exist?	159
CHAPTER 9    Psychological and Neurological Models of Scientific Discovery	183
CHAPTER 10   Rejecting Nature of Science Misconceptions By Preservice Teachers	211
CHAPTER 11   Implications for The Nature of Knowledge and Instruction	225
References	261
Index	277

The Neurological Basis of Learning, Development and  
Discovery

Implications for Science and Mathematics Instruction

Lawson, A.E.

2003, XVI, 285 p., Hardcover

ISBN: 978-1-4020-1180-1
