

Contents

Preface	v
1 Introduction	1
1.1 Overview of Multimedia Data Hiding	2
1.2 Book Organization	6
1.2.1 Fundamental Issues and Solutions	6
1.2.2 Algorithm and System Designs	7
1.2.3 Attacks and Countermeasures	10
I Fundamental Issues	13
2 Preliminaries	15
2.1 Data Hiding Framework	15
2.2 Key Elements and A Layered View	16
3 Basic Embedding Mechanisms	19
3.1 Two Basic Embedding Mechanisms	21
3.1.1 Probability of Detection Errors	24
3.2 Embedding Capacity	27
3.2.1 Capacity for Type-I Embedding	28
3.2.2 Capacity of Type-II Embedding	28
3.2.3 Capacity Comparison for Type-I & Type-II	30
3.2.4 Extensions and Discussions	32
3.3 Techniques for Embedding Multiple Bits	34

3.3.1	Modulation and Multiplexing Techniques	34
3.3.2	Comparison	36
3.4	Chapter Summary	39
3.5	Appendix - Derivations of Type-II Embedding Capacity . . .	40
4	Handling Uneven Embedding Capacity	43
4.1	Quantitative Model for Uneven Embedding Capacity	45
4.2	Constant Embedding Rate (CER)	45
4.2.1	Backup Embedding	47
4.2.2	Equalizing Embedding Capacity Via Shuffling	48
4.2.3	Practical Considerations	52
4.2.4	Discussions	53
4.3	Variable Embedding Rate (VER)	53
4.3.1	Conveying Additional Side Information	54
4.4	Outline of Examples	55
4.5	Chapter Summary	55
4.6	Appendix - Generating Shuffling Table From A Key	56
4.7	Appendix - Analysis of Shuffling	57
4.7.1	Joint Probability of Histogram	57
4.7.2	Mean and Variance of Each Bin	58
4.7.3	More About $E[\frac{m_r}{N}]$	60
4.7.4	Approximations for Hypergeometric Distribution . . .	61
4.7.5	More About $Var[\frac{m_r}{N}]$	64
II	Algorithm and System Designs	65
5	Data Hiding in Binary Image	67
5.1	Proposed Scheme	69
5.1.1	Flippable Pixels	69
5.1.2	Embedding Mechanism	71
5.1.3	Uneven Embedding Capacity and Shuffling	72
5.2	Applications and Experimental Results	76
5.2.1	“Signature in Signature”	76
5.2.2	Invisible Annotation for Line Drawings	76
5.2.3	Tamper Detection for Binary Document	77
5.3	Robustness and Security Considerations	78
5.3.1	Analysis and Enhancement of Robustness	79
5.3.2	Security Considerations	82
5.4	Chapter Summary	85
5.5	Appendix - Details of Determining Flippability Scores	86
5.6	Appendix - Recovering Images After Printing & Scanning . .	90
6	Multilevel Data Hiding for Image and Video	95
6.1	Multi-level Embedding	96

6.2	Multi-level Image Data Hiding	98
6.2.1	Spectrum Partition	99
6.2.2	System Design	102
6.2.3	Refined Human Visual Model	105
6.2.4	Experimental Results	111
6.3	Multi-level Video Data Hiding	111
6.3.1	Embedding Domain	111
6.3.2	Variable vs. Constant Embedding Rate	114
6.3.3	User Data vs. Control Data	116
6.3.4	System Design and Experimental Results	117
6.4	Chapter Summary	119
7	Data Hiding for Image Authentication	123
7.1	Review of Prior Art	125
7.2	Framework for Authentication Watermark	126
7.3	Transform-domain Table Lookup Embedding	127
7.3.1	Considerations for Imperceptibility & Security	129
7.3.2	Estimating Embedded Data and Changes	132
7.4	Design of Embedded Data	133
7.4.1	Visually Meaningful Pattern	133
7.4.2	Content-based Features	133
7.5	Experimental Results	135
7.6	Extensions	138
7.7	Chapter Summary	140
8	Data Hiding for Video Communications	141
8.1	Transcoding by Downsizing Using Data Hiding	142
8.1.1	Overview of Proposed Approach	142
8.1.2	Embedding Subblock Motion Information	143
8.1.3	Advantages of Data Hiding	144
8.1.4	Experimental Results	145
8.2	Error Concealment and Data Hiding	147
8.2.1	Related Works	147
8.2.2	Proposed Techniques	149
8.3	Chapter Summary	150
III	Attacks and Countermeasures	151
9	Attacks on Known Data Hiding Algorithms	153
9.1	Block Replacement Attack on Robust Watermark	154
9.1.1	Existing Attacks on Robust Watermarks	155
9.1.2	Attack via Block Replacement	155
9.1.3	Analysis and Countermeasures	157
9.2	Countermeasures Against Geometric Attacks	159

9.2.1	Basic Idea of RST Resilient Watermarking	161
9.2.2	Embedding and Detection Algorithms	162
9.2.3	Implementation Issues	164
9.2.4	Experimental Results	168
9.2.5	Summary	172
9.3	Double Capturing Attack on Authentication Watermark . . .	175
9.3.1	Proposed Attack	175
9.3.2	Countermeasures Against Proposed Attack	176
10	Attacks on Unknown Data Hiding Algorithms	179
10.1	Introduction	179
10.1.1	SDMI Attack Setup	180
10.1.2	Comments on Attack Setup	181
10.2	Attacks and Analysis on SDMI Robust Watermarks	183
10.2.1	General Approaches to Attacks	183
10.2.2	Attacks on Watermark-C	184
10.2.3	Attacks on Watermark A, B & F	188
10.2.4	Remarks	191
10.3	Attacks and Analysis on SDMI Fragile Watermarks	192
11	Conclusions and Perspectives	195
	References	197
	Index	215
