List of Authors	IX
Acknowledgements	XI
GENERAL INTRODUCTION	1
<i>Daniel Courgeau</i>	
1. Opposition between holism and individualism	4
2. How are the two approaches linked?	12
3. A plurality of aggregation levels and a plurality of time scales	18
4. Towards a recomposition and a multilevel synthesis	19
5. Outline of this volume	21
 Chapter 1 Multilevel modelling of educational data	 25
<i>Harvey Goldstein</i>	
1. Fundamentals : units and levels	26
2. The basic multilevel model	28
3. Cross-classified models	30
4. The multiple membership model	33
5. Types of response	39
6. Final thoughts about new insights	40
 Chapter 2 From the macro-micro opposition to multilevel analysis in demography	 43
<i>Daniel Courgeau</i>	
1. Introduction	44
2. The aggregate period approach	46
3. Cohort analysis	57
4. Event history analysis	64
5. Contextual and multilevel analysis	74
6. Conclusion	84
 Chapter 3 Potentialities and limitations of multilevel analysis in public health and epidemiology	 93
<i>Ana V. Diez Roux</i>	
1. Introduction	94
2. The presence of multiple levels : conceptual and methodological implications	97

3. Multilevel analysis	102
4. Multilevel analysis in public health and epidemiology	106
5. Challenges raised by the use of multilevel analysis in epidemiology	108
6. Limitations and complementary approaches	112
 Chapter 4 Exploring small area population structures with census data	 121
<i>Marc Tranmer, David Steel, Ed Fieldhouse</i>	
1. Introduction	122
2. The concept of multilevel models for geographically based data	123
3. Census data availability	125
4. Some previous examples of multilevel modelling with census data	130
5. Estimating and explaining population structures with census data	132
6. Investigating small area variations using SAR with recently added area classifications	142
7. Further topics	151
8. Conclusion	153
 Chapter 5 Organisational levels and time scales in economics	 157
<i>Bernard Walliser</i>	
1. Introduction	158
2. Frozen time	159
3. Spread out time	161
4. Sequential time	163
5. Adaptive time	164
6. Individualism versus holism	166
7. Economic epistemological positions	168
8. Micro and macro-analysis	170
9. From theoretical to empirical analysis	171
 Chapter 6 Causal analysis, systems analysis, and multilevel analysis: Philosophy and epistemology	 175
<i>Robert Franck</i>	
1. Introduction. Object of this chapter	176
2. The causal principle	178
3. Multicausal models	180
4. The Stoic Principle of causality	184
5. Non-causal determinations	187
6. The notion of reciprocal action	188

7. The nature of levels	190
8. Factors and systems	192
9. A social philosophy	194
10. Conclusion. Causal analysis, systems analysis, and multilevel analysis	195
GENERAL CONCLUSION	199
<i>Daniel Courgeau</i>	
1. Experimental versus non-experimental approach	199
2. Probability: Objectivist, subjectivist and logicist approach	203
3. A better definition of levels and a better inter- connection between them	208
4. Towards a fuller theory	210
