<i>Foreword</i>	<i>xiii</i>
<i>About the Author</i>	<i>xv</i>
<i>About the Technical Reviewers</i>	<i>xvii</i>
<i>Acknowledgments</i>	<i>xix</i>
<i>Introduction</i>	<i>xxi</i>
<i>What This Book Covers</i>	<i>xx</i>
<i>Who This Book Is For</i>	<i>xxii</i>
<i>Downloading the Application Code</i>	<i>xxiii</i>
Chapter 1 Understanding Application Architecture: An Overview	1
<i>Introducing Single-Tier Architecture</i>	<i>2</i>
<i>Introducing Two-Tier Architecture</i>	<i>2</i>
<i>Introducing N-Tier Architecture</i>	<i>6</i>
<i>Understanding Application Layers</i>	<i>7</i>
<i>Developing Enterprise Applications with .NET</i>	<i>15</i>
<i>Summary</i>	<i>22</i>
Chapter 2 Building an N-Tier Application	23
<i>Making Design Choices</i>	<i>23</i>
<i>Setting Up IIS</i>	<i>25</i>
<i>Setting Up the Microsoft .NET IDE</i>	<i>35</i>
<i>Summary</i>	<i>42</i>

Chapter 3	Creating the Application Infrastructure	43
Designing the Physical Application Architecture		43
Creating the Shared Objects		54
Creating the Stored Procedures		57
Creating the Data-Centric Object		60
Creating the User-Centric Business Objects		67
Creating Collection Classes		77
Creating the User Interface		85
Adding Some Basic Functionality		95
Summary		121
Chapter 4	Handling Errors with Class	123
Understanding Visual Basic 6 Error Handling Structures		123
Understanding VB .NET Error Handling Structure		124
Using the .NET Exception Class		126
Determining What Happened		127
Storing Error Information		127
Setting Up the Database		129
Creating the LogError Classes		130
Handling Errors in the Northwind Application		149
Summary		157
Chapter 5	Building Business Objects	159
Exploring Business Rule Types		159
Reporting Business Rule Violations		160
Creating Your First Rule		161
Working with .NET Exception Classes		161
Creating the Error Classes		164
Creating the BusinessErrors Class		165
Adding Business Rules to the Data-Centric Object		166
Adding Business Rules to the User-Centric Object		171
Displaying Business Rules to the User		180
Responding to Object Changes in the User Interface		186
Handling Edit Cancellations		191
Summary		193

Chapter 6	<i>Creating the Windows User Interface</i>	195
	<i>Building a Dynamic Menu Structure</i>	196
	<i>Implementing Cut, Copy, and Paste Functionality</i>	212
	<i>Implementing Select All Functionality</i>	217
	<i>Implementing Find Functionality</i>	218
	<i>Adding a Toolbar</i>	222
	<i>Implementing a StatusBar</i>	225
	<i>Summary</i>	235
Chapter 7	<i>Revisiting Objects and Rules</i>	237
	<i>Determining Object Relationships</i>	238
	<i>Building the Territory Classes</i>	240
	<i>Creating the Territory User Interface</i>	258
	<i>Summary</i>	271
Chapter 8	<i>Reusing Code</i>	273
	<i>Reducing Redundant Code</i>	273
	<i>Consolidating the User-Centric Classes</i>	276
	<i>Adding a Configuration File</i>	282
	<i>Creating Enterprise Templates</i>	284
	<i>Summary</i>	306
Chapter 9	<i>Understanding Server-Side Business Rules</i>	307
	<i>Creating the Employee Stored Procedures</i>	308
	<i>Determining the Business Rules</i>	314
	<i>Building the Employee Objects</i>	316
	<i>Testing the Employee Maintenance Function</i>	400
	<i>Summary</i>	402

Chapter 10 Using Reflection	403
Understanding Attribute Classes	404
Setting Up the Scenario	405
Setting Up the Project	406
Creating the Attribute Class	407
Creating the ComputerList Class	408
Examining Property Attributes in Code	410
Implementing Business Rules Using Custom Attributes	420
Summary	437
 Chapter 11 Implementing Web Services and the UDDI	 439
What Are Web Services?	439
Setting Up a Web Service Project	441
Creating the GetAllEmployees Web Service	444
Invoking a Web Service with Internet Explorer	446
Creating the GetEmployeeDetails Web Service	448
Consuming a Web Service	452
Using the WSDL Utility	465
Using .NET Server 2003 UDDI	467
Accessing the UDDI Programmatically	474
Summary	484
 Chapter 12 Creating a Web Forms Interface	 485
Targeting Corporate Intranets	485
Targeting Corporate Extranets	485
Setting Up the Application	487
Accessing the Database	497
Building the Logon Page	503
Creating the Employee List Page	508
Updating the Employee List Web Page	510
Creating the Employee Details Page	513
Referencing Your Objects Directly	517
Implementing Editing Capabilities	523
Summary	539

Chapter 13 Globalizing and Localizing	
Your Application	541
Introducing Globalization	542
Exploring Resource Creation Tools	544
Exploring Languages Supported by the .NET Framework	548
Building the NorthwindTraders Resource Files	550
Creating the Satellite Assemblies	554
Accessing Cultural Information in Code	555
Localizing ASP.NET Applications	558
Summary	563
 Appendix A Adding Support for	
Unicode Characters	565
 Appendix B Recommended Reading	571
Remoting	571
Object-Oriented Design/UML	571
Security	571
ADO.NET/Databases	572
Design Patterns	572
Regular Expressions	572
Globalization and Localization	572
Business Rules	572
.NET Framework (Intermediate Language)	572
Visual Basic .NET Primer	573
Web Services and UDDI	573
General .NET Web Sites	573
 Index	575
