Preface to the Second Edition	<i>xxiii</i>
Preface to the First Edition	<i>xxv</i>

Part One

Fundamentals ... 1

Chapter 1

Getting Started ... 3

Robotics Invention System	4
Software	5
NQC Quick Start	6
Using BricxCC	7
Using MacNQC	8
Using NQC for Windows	9
The START Program	11
The View Button	13
Attaching Motors	14
Debugging	15
Moving On	16

Chapter 2

The RCX . . . 17

The Hardware	17
Firmware	19
Tasks and Subroutines	19
Output Ports	20
Sensors	22
Boolean Values	22
Sensor Modes	24
Sensor Types	26
Other Capabilities	31
Sound	31
Keeping Time	31
Variables	32
Datalog	32
Automatic Power Down	32
Conclusion	33

Chapter 3

Introduction to NQC . . . 35

A Simple Program	35
Controlling Outputs	38
Miscellaneous Commands	40
Using #define	41
Using Sensors	43
Using Variables	45
Expressions	46
Conditions	48
Control Structures	50
Using Tasks	52
Functions	53
Displaying Values	58
Events	61
Conclusion	64

Chapter 4

Construction . . . 65

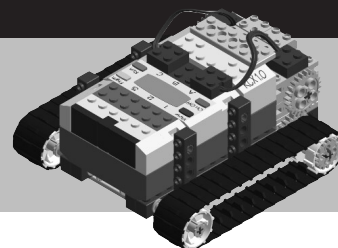

Structures	65
Frames	65
Long Beams	67
Vertical Beams	68
Bracing	69
Wide Beams	70
Basic Gears	71
Gear Reduction	71
Speed and Torque	72
Compound Gear Trains	74
Distances Between Gears	75
Specialized Gears	76
Crown and Bevel Gears	77
Worm Gear	77
The Rack	79
The Differential	80
The Clutch Gear	81
Pulleys and Belts	81
Ratchets	84
A Simple Ratchet	84
The Ratchet Splitter	85
Levers	86
Conclusion	89

Part Two

Robots ... 91

Chapter 5

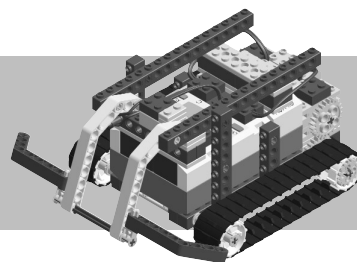

Tankbot ... 93

Construction	93
Driving Straight	98
Turning	100
Conclusion	104

Chapter 6

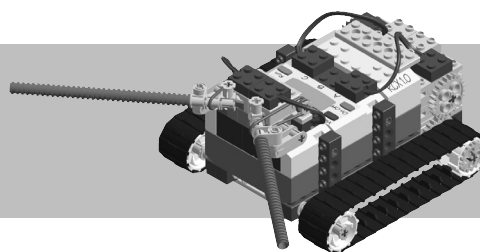

Bumpbot ... 105

A Simple Approach	105
A Better Bumper	108
A Better Program	113
Conclusion	116

Chapter 7

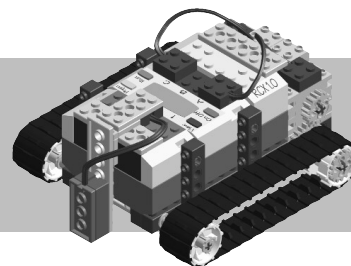

Bugbot . . . 117

Construction	117
RCX Code Blocks	122
An Event-Based Experiment	124
A Condition-Based Experiment	125
Multiple Watchers	126
Synchronous Behavior	131
Stuck in a Corner	134
Tuning the Corner Detector	140
Conclusion	142

Chapter 8

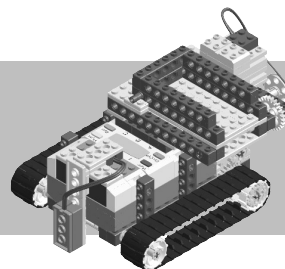

Linebot . . . 143

Construction	143
Seeing the Line	146
Feedback	147
Following the Line	149
Dynamic Thresholds	151
Improved Line Following	155
Conclusion	160

Chapter 9

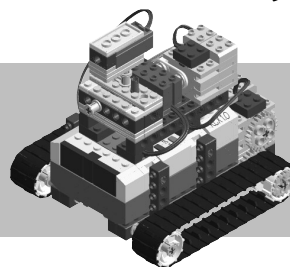

Dumpbot . . . 161

Construction	161
Delivering Cargo	166
Conclusion	169

Chapter 10

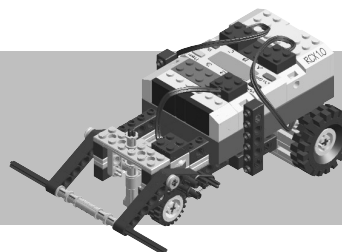

Scanbot . . . 171

Construction	172
Looking and Steering	176
Improving the Scanbot Program	183
Using Scanbot When Space Is Limited	191
Conclusion	195

Chapter 11

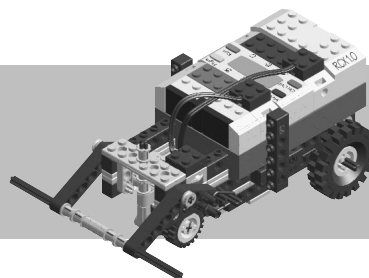

Tribot . . . 197

The Swivel Wheel	197
Construction	198
Programming	202
Variations	204

Chapter 12

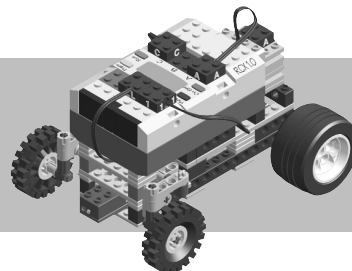

Onebot . . . 205

Driving with One Motor	205
Construction	206
Programming	210
Conclusion	211

Chapter 13

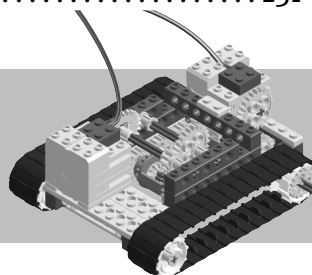

Steerbot . . . 213

Rack and Pinion Steering	213
Chassis Construction	214
Programming	220
Asynchronous Steering	226
Conclusion	231

Chapter 14

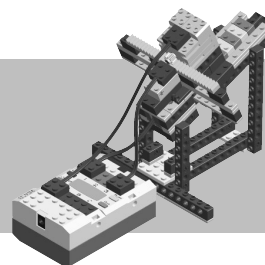

Diffbot . . . 233

Dual-Differential Drive	234
Constructing the Remote	239
Programming the Remote	242
Conclusion	246

Chapter 15

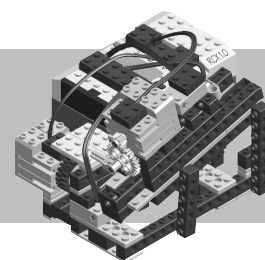

Brick Sorter . . . 247

Construction	247
Programming	254
Sorting	257
Conclusion	257

Chapter 16

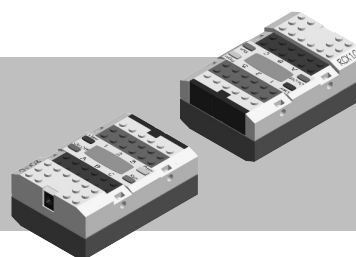

Vending Machine . . . 259

Construction	259
Theory of Operation	267
Programming in RCX Code	267
Programming in NQC	269
Testing	277
Conclusion	278

Chapter 17

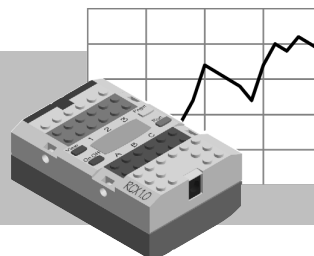

Communication . . . 279

Reprogrammed Vending Machine	280
Candy Dispenser	284
Delivery Truck	288
Programming Delivery Truck in RCX Code	289
Programming Delivery Truck in NQC	290
Testing	293
Conclusion	294

Chapter 18

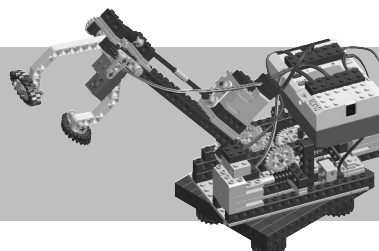

Using the Datalog . . . 295

Datalog Basics	295
Logging Transactions	297
Keeping Track of the Television	302
Watching Water Freeze	306
Conclusion	312

Chapter 19

Roboarm . . . 313

The Base	314
The Arm	318
The Body	325
Basic Operations	333
Starting Position	335
The Test Mat	338
Cleaning Up	339
Lining Up	342
Conclusion	348

Part Three

Appendixes . . . 349

Appendix A:

MINDSTORMS Sets . . . 351

Retail Base Sets	352
Retail Expansion Sets	354
Educational Sets	356
Accessories	357

Appendix B:

Supplementary Parts . . . 359

Appendix C:

Programming Tools . . . 363

RCX Code	363
NQC	364
ROBOLAB	365
MindScript and LASM	365
Custom Firmware	366

Appendix D:
NQC Quick Reference . . . 367

The NQC Language 367
The NQC API 370

Appendix E:
Online Resources . . . 381

General Information 381
Shopping 382
Programming Tools and Advanced Topics 382

Afterword 381

Index 384
