| Preface | v |
| Contributors | ix |

I. NEUROINFLAMMATORY MECHANISMS

| | | |
|---|---|-----|
| 1 | Microglia: <i>Roles of Microglia in Chronic Neurodegenerative Diseases</i> | 3 |
| | Paul L. Wood | |
| 2 | Apoptosis vs Nonapoptotic Mechanisms in Neurodegeneration | 29 |
| | Kurt A. Jellinger | |
| 3 | Role(s) of Mitogen and Stress-Activated Kinases in Neurodegeneration | 89 |
| | Christopher C. J. Miller, Steven Ackerley, Janet Brownlees, Andrew J. Grierson, and Paul Thornhill | |
| 4 | Roles of Chemokines and Their Receptors in Neuroinflammation | 99 |
| | Andrzej R. Glabinski and Richard M. Ransohoff | |
| 5 | Neurotoxic Mechanisms of Nitric Oxide | 117 |
| | Kathleen M. K. Boje | |
| 6 | Chronic Intracerebral LPS as a Model of Neuroinflammation | 137 |
| | Gary L. Wenk and Beatrice Hauss-Wegrzyniak | |
| 7 | Peroxisome Proliferator-Activated Receptor Gamma Agonists: <i>Potential Therapeutic Agents for Neuroinflammation</i> | 151 |
| | Gary E. Landreth, Sophia Sundararajan, and Michael T. Heneka | |
| 8 | Neuroinflammation-Mediated Neurotoxin Production in Neurodegenerative Diseases: <i>Potential of Nitrones as Therapeutics</i> | 171 |
| | Robert A. Floyd and Kenneth Hensley | |

II. STROKE AND TBI

| | | |
|----|---|-----|
| 9 | Inflammation and Potential Anti-Inflammatory Approaches in Stroke | 189 |
| | Jari Koistinaho and Juha Yrjänheikki | |
| 10 | Neuroinflammation as an Important Pathogenic Mechanism in Spinal Cord Injury | 215 |
| | Yuji Taoka and Kenji Okajima | |
| 11 | Type IV Collagenases and Blood-Brain Barrier Breakdown in Brain Ischemia | 237 |
| | Yvan Gasche, Jean-Christophe Copin, and Pak H. Chan | |

III. ALZHEIMER'S DISEASE

- 12 Neuroinflammatory Environments Promote Amyloid- β
Deposition and Posttranslational Modification 249
*Craig S. Atwood, Mark A. Smith, Ralph N. Martins,
Rudolph E. Tanzi, Alex E. Roher, Ashley I. Bush,
and George Perry*
- 13 Microglial Responses in Alzheimer's Disease: *Recent Studies
in Transgenic Mice and Alzheimer's Disease Brains*..... 267
Douglas G. Walker and Lih-Fen Lue
- 14 The Amyloid Hypothesis of Cognitive Dysfunction 283
Dave Morgan and Marcia N. Gordon
- 15 The Cerebellum in AD: *A Case for Arrested
Neuroinflammation?* 295
Paul L. Wood
- 16 The Neuroinflammatory Components of the Trimethyltin
(TMT) Model of Hippocampal Neurodegeneration 301
G. Jean Harry and Christian Lefebvre d'Hellencourt
- 17 Inflammation and Cyclo-Oxygenase in Alzheimer's Disease:
Experimental Approaches and Therapeutic Implications 331
*Patrick Pompl, Tara Brennan, Lap Ho,
and Giulio Maria Pasinetti*

IV. MULTIPLE SCLEROSIS

- 18 Experimental Autoimmune Encephalomyelitis 345
Hans-Peter Hartung and Bernd C. Kieseier
- 19 Neuroimmunologic Mechanisms in the Etiology of Multiple
Sclerosis 359
Claudia F. Lucchinetti, W. Brück, and Hans Lassmann
- 20 In Vivo Imaging of Neuroinflammation in Neurodegenerative
Diseases 379
*Annachiara Cagnin, Alexander Gerhard,
and Richard B. Banati*

V. PARKINSON'S AND HUNTINGTON'S DISEASES

- 21 Inflammatory Mechanisms in Parkinson's Disease 391
Joseph Rogers and Carl J. Kovelowski
- 22 Neuroinflammatory Components of the 3-Nitropropionic Acid
Model of Striatal Neurodegeneration 405
Hideki Hida, Hiroko Baba, and Hitoo Nishino

Index 417
