

# CONTENTS

---

Preface .....	v
Contributors .....	ix
PART I. HISTORICAL PERSPECTIVES	
1 Dietary Fatty Acids, COX-2 Blockade, and Carcinogenesis .....	3
<b>Rashida A. Karmali</b>	
2 Historical Aspects of COX-2: <i>Cloning and Characterization</i> <i>of the cDNA, Protein and Gene</i> .....	13
<b>Harvey R. Herschman</b>	
PART II. EPIDEMIOLOGY OF NSAIDs AND CANCER	
3 Epidemiology of Nonsteroidal Anti-Inflammatory Drugs and Colorectal Cancer .....	35
<b>Michael J. Thun and S. Jane Henley</b>	
4 Epidemiology of Breast Cancer and Nonsteroidal Anti-Inflammatory Drugs: <i>Extension of the Dietary</i> <i>Fat Hypothesis of Breast Cancer</i> .....	57
<b>Randall E. Harris</b>	
PART III. ANIMAL MODELS OF CARCINOGENESIS	
5 Role of Synthetic and Naturally Occurring Cyclooxygenase Inhibitors in Colon Cancer Prevention .....	71
<b>Bandaru S. Reddy and Chinthalapally V. Rao</b>	
6 Chemoprevention of Breast Cancer by Nonsteroidal Anti-Inflammatory Drugs and Selective COX-2 Blockade in Animals .....	85
<b>Hussein M. Abou-Issa, Galal A. Alshafie, and Randall E. Harris</b>	
7 The Role of Cyclooxygenase-2 in the Prevention and Therapy of Lung Cancer .....	99
<b>Hildegard M. Schuller</b>	
8 Nonsteroidal Anti-Inflammatory Drugs, Prostaglandins, and <i>Apc</i> -Driven Intestinal Tumorigenesis .....	117
<b>Jay Whelan and Michael F. McEntee</b>	
9 Cyclooxygenase-1 and Cyclooxygenase-2 Knockout Mice Provide Insights into Beneficial and Adverse Effects of Nonsteroidal Anti-Inflammatory Drugs .....	147
<b>Robert Langenbach</b>	
PART IV. MOLECULAR BIOLOGY OF COX-2	
10 Cyclooxygenase-2, Prostaglandins, and Colorectal Carcinogenesis .....	159
<b>Rajnish A. Gupta and Raymond N. DuBois</b>	

<b>11</b>	Regulation of Expression and Potential Carcinogenic Role of Cyclooxygenase-2 .....	171
	<b><i>Byeong-Churl Jang and Timothy Hla</i></b>	
<b>12</b>	Cyclooxygenase-2 and Cancer .....	185
	<b><i>Alane T. Koki, Kathleen M. Leahy, Janet M. Harmon, and Jaime L. Masferrer</i></b>	
<b>13</b>	Interactions of Cyclooxygenase and Aromatase Pathways in Normal and Malignant Breast Cells .....	205
	<b><i>Jeanette A. Richards and Robert W. Brueggemeier</i></b>	
<b>14</b>	Association of COX-2 and PPARs in Carcinogenesis and Chemoprevention .....	225
	<b><i>Tong-Chuan He</i></b>	
<b>15</b>	Carcinogenesis Involving Cyclooxygenase and Lipoyxygenase ...	245
	<b><i>Linda C. Hsi and Thomas E. Eling</i></b>	

#### PART V. CLINICAL APPLICATIONS

<b>16</b>	The Development of Drugs that Target Cyclooxygenase-2 .....	259
	<b><i>Timothy Maziasz, K. Nasir Khan, John Talley, James Gierse, and Karen Seibert</i></b>	
<b>17</b>	Chemoprevention of Cancer by NSAIDs and Selective COX-2 Blockade .....	279
	<b><i>Gary J. Kelloff, Vernon E. Steele, and Caroline C. Sigman</i></b>	
<b>18</b>	Potential for Inhibitors of Cyclooxygenase-2 to Enhance Tumor Radioresponse .....	301
	<b><i>Randy Burd, Hak Choy, and Adam Dicker</i></b>	
<b>19</b>	Potential Role of NSAIDs and COX-2 Blockade in Cancer Therapy .....	313
	<b><i>William F. Anderson, Asad Umar, Jaye L. Viner, and Ernest T. Hawk</i></b>	
<b>20</b>	Cyclooxygenase-2 Blockade in Cancer Prevention and Therapy: <i>Widening the Scope of Impact</i> .....	341
	<b><i>Randall E. Harris</i></b>	
	Index .....	367

COX-2 Blockade in Cancer Prevention and Therapy

Harris, R.E. (Ed.)

2003, X, 371 p., Hardcover

ISBN: 978-1-58829-010-6

A product of Humana Press
