Preface .....	v
Contributors .....	xi

## PART I. BASIC CONCEPTS IN ONCOGENE RESEARCH

<b>1</b>	Genetic Basis of Cancer Progression .....	3
	<i>Susan J. Done and Jeremy A. Squire</i>	
<b>2</b>	The Molecular Basis of Chromosomal Instability in Human Cancer Cells .....	19
	<i>Daniel P. Cahill</i>	
<b>3</b>	Signal Transduction Networks: <i>Ras as a Paradigm</i> .....	35
	<i>Frank McCormick</i>	
<b>4</b>	Oncogenic Receptor Tyrosine Kinases .....	47
	<i>Mark H. Kirschbaum, Mina D. Marmor, and Yosef Yarden</i>	
<b>5</b>	Ras-Mediated Deregulation of Gene Expression and Contribution to Oncogenesis .....	77
	<i>Gretchen A. Murphy and Channing J. Der</i>	
<b>6</b>	The Interplay Between Tumor Suppressor Genes and Oncogenes in Tumorigenesis .....	101
	<i>Eric C. Holland</i>	
<b>7</b>	Genetic Basis of Altered Responsiveness of Cancer Cells to Their Microenvironment .....	113
	<i>Amato J. Giaccia</i>	

## PART II. THE FUNCTIONAL IMPACT OF ONCOGENE EXPRESSION ON CANCER CELLS— THERAPEUTIC IMPLICATIONS

<b>8</b>	Deregulation of Cell Cycle Progression by Oncogenic Transformation .....	133
	<i>Marcelo L. Rodriguez-Puebla, Adrian M. Senderowicz, and Claudio J. Conti</i>	
<b>9</b>	Oncogenes as Regulators of Cell Survival: <i>The Role of Oncogenes and Tumor Suppressor Genes in the Induction of Resistance to Anoikis and Hypoxia</i> .....	153
	<i>Kirill Rosen and Jorge Filmus</i>	
<b>10</b>	Oncogenes and Tumor Angiogenesis .....	171
	<i>Janusz Rak and Robert S. Kerbel</i>	
<b>11</b>	Oncogenes as Therapeutic Targets to Prevent Metastasis .....	219
	<i>Ann F. Chambers and Hemanth J. Varghese</i>	
<b>12</b>	The Impact of Oncogenes on Tumor Maintenance .....	229
	<i>Senji Shirasawa and Takehiko Sasazuki</i>	

13	Primary and Secondary Events in Oncogene-Driven Tumor Development: <i>Lessons from Transgenic Model Systems</i> .....	245
	<b>Michaela Herzig and Gerhard Christofori</b>	
PART III. ONCOGENES AS TARGETS FOR ANTICANCER THERAPY IN VIVO		
14	Targeting Oncogenes in Hematopoietic Malignancies .....	297
	<b>Michael E. O'Dwyer and Brian J. Druker</b>	
15	Clinical Evaluation of Agents Targeting Epidermal Growth Factor Receptor (EGFR) in Cancer .....	313
	<b>Edward H. Lin and James L. Abbruzzese</b>	
16	Inhibition of the HER-2/neu Oncogene: <i>A Translational Research Model for the Development of Future Targeted Therapies</i> .....	331
	<b>Gottfried E. Konecny, Jane Arboleda, Dennis J. Slamon, and Mark Pegram</b>	
17	Farnesyltransferase Inhibitors as Anticancer Agents .....	353
	<b>Adrienne D. Cox</b>	
18	Targeting Oncogenic Signaling Pathways in Human Astrocytomas .....	363
	<b>Gelareh Zadeh and Abhijit Guha</b>	
19	Targeting Oncogenes in Pediatric Malignancies .....	383
	<b>Giannoula Klement and Robert S. Kerbel</b>	
20	Inhibiting Signal Transduction as an Approach to Radiosensitizing Tumor Cells .....	409
	<b>Eric J. Bernhard, Anjali K. Gupta, Elizabeth Cohen-Jonathan, Ruth J. Muschel, Stephen M. Hahn, and W. Gillies McKenna</b>	
21	Oncogenes as Targets for Cancer Vaccines .....	433
	<b>Samir N. Khleif and Joseph A. Lucci, III</b>	
22	<i>Bcl-2</i> Antisense Oligonucleotides Therapy for Cancer: <i>Targeting the Mitochondria</i> .....	453
	<b>Finbarr E. Cotter and Dean A. Fennell</b>	
Index	.....	469
