
Contents

Preface	v
Contributors	x
1 The Pathogenesis of Disease Due to Nontypeable <i>Haemophilus influenzae</i> Gail G. Hardy, Simone M. Tudor, and Joseph W. St. Geme, III	1
2 The Pathogenesis of Disease Due to Type b <i>Haemophilus influenzae</i> Ruth Aubrey and Christoph Tang	29
3 General Methods for Culturing <i>Haemophilus influenzae</i> Grant Poje and Rosemary J. Redfield	51
4 Transformation of <i>Haemophilus influenzae</i> Grant Poje and Rosemary J. Redfield	57
5 Diagnosis of Infection Alex van Belkum and Loek van Alphen	71
6 Characterization of Plasmids Ioanna D. Dimopoulou, Mohd-Zain Zaini, and Derrick W. Crook	93
7 Protein Characterization by Two-Dimensional Gel Electrophoresis Phillip Cash and J. Simon Kroll	101
8 Monitoring Gene Expression Using DNA Arrays Tahir R. Ali, Ming-Shi Li, and Paul R. Langford	119
9 Gene Expression Technology Xavier de Bolle and Christopher D. Bayliss	135
10 The Genome Sequence of <i>Haemophilus influenzae</i> Derek W. Hood	147
11 Structural Profiling of Short-Chain Lipopolysaccharides from <i>Haemophilus influenzae</i> Elke K. H. Schweda and James C. Richards	161
12 Mutagenesis of <i>H. influenzae</i> Mark A. Herbert	185

13 Transposon Tn10
Stefan Schlör, Gabriele Kemmer, and Joachim Reidl 211

14 In Vivo Expression of Bacterial Genes During Human Infections
Martin Handfield, Trevor Seifert, and Jeffrey D. Hillman 225

15 ELISA
**Joyce S. Plested, Philip A. Coull,
and Margaret Anne J. Gidney 243**

16 Opsonophagocytosis Assay Using Flow-Cytometry
Joyce S. Plested and Philip A. Coull 263

17 In Vitro Models of Infection I—Human Respiratory Tissue
Organ Culture
Andrew M. Middleton, Paula Keig, and Robert Wilson 277

18 In Vitro Models of Infection II—Human Umbilical Vein
Endothelial Cells (HUVECs) System
Mumtaz Virji and Darryl J. Hill 297

19 Animal Models 315

Index 322
