
Contents

Preface	v
Contents of Volume II.....	xi
Contributors	xvii
PART I. INTRODUCTION	
1 Characteristic Genetic Alterations in Lung Cancer Ignacio I. Wistuba and Adi F. Gazdar	3
PART II. ETIOLOGY AND CLASSIFICATION OF LUNG TUMORS	
2 Clinical and Biological Relevance of Recently Defined Categories of Pulmonary Neoplasia Edward Gabrielson	31
3 Molecular Epidemiology of Human Cancer Risk: <i>Gene–Environment Interactions and p53 Mutation Spectrum in Human Lung Cancer</i> Kirsi Vähäkangas	43
4 Neuroendocrine Phenotype of Small Cell Lung Cancer Judy M. Coulson, Marta Ocejó-García, and Penella J. Woll	61
5 AIDS-Associated Pulmonary Cancers Kushagra Katariya and Richard J. Thurer	75
PART III. MOLECULAR ABNORMALITIES IN LUNG CANCER	
A. DETECTION OF ALTERATIONS IN THE CELL CYCLE	
6 Abrogation of the RB-p16 Tumor Suppressor Pathway in Human Lung Cancer Joseph Geradts	89
7 Sensitive Detection of Hypermethylated p16 ^{INK4a} Alleles in Exfoliative Tissue Material Marcus Schuermann and Michael Kersting	101
B. DETECTION OF ALTERATIONS IN SIGNAL TRANSDUCTION PATHWAYS	
8 Role of Receptor Tyrosine Kinases in Lung Cancer Gautam Maulik, Takashi Kijima, and Ravi Salgia	113
9 Relationship of EGFR Signal-Transduction Modulation by Tyrosine Kinase Inhibitors to Chemosensitivity and Programmed Cell Death in Lung Cancer Cell Lines Wendong Lei, Patrick P. Koty, and Mark L. Levitt	127

10	Detection of the Transcripts and Proteins for the Transforming Growth Factor- β Isoforms and Receptors in Mouse Lung Tumorigenesis Using <i>In Situ</i> Hybridization and Immunohistochemistry in Paraffin-Embedded Tissue Sections Sonia B. Jakowlew and Jennifer Mariano	145
11	Alterations in the Expression of Insulin-Like Growth Factors and Their Binding Proteins in Lung Cancer Carrie M. Coleman and Adda Grimberg	167
12	Screening of Mutations in the ras Family of Oncogenes by Polymerase Chain Reaction-Based Ligase Chain Reaction Alfredo Martínez, Teresa A. Lehman, Rama Modali, and James L. Mulshine	187
13	Assays for Raf-1 Kinase Phosphorylation and Activity in Human Small Cell Lung Cancer Cells Rajani K. Ravi and Barry D. Nelkin	201
14	γ -Glutamylcysteine Synthetase in Lung Cancer: <i>Effect on Cell Viability</i> Kristiina Järvinen, Ylermi Soini, and Vuokko L. Kinnula	211
15	Localization of Cyclooxygenase-2 Protein Expression in Lung Cancer Specimens by Immunohistochemical Analysis Sarah A. Wardlaw and Thomas H. March	223
16	Non-RI Protocols for L-myc Allelotyping and Deletion Mapping of Chromosome 1p in Primary Lung Cancers Keiko Hiyama, Ciro Mendoza, and Eiso Hiyama	231
	C. DETECTION OF ALTERED CELL SURFACE MARKERS	
17	Intercellular Adhesion Molecules (ICAM-1, VCAM-1, and LFA-1) in Adenocarcinoma of Lung: <i>Technical Aspects</i> Armando E. Fraire, Bruce A. Woda, Louis Savas, and Zhong Jiang	243
18	MUC1 Expression in Lung Cancer Eva Szabo	251
19	Altered Surface Markers in Lung Cancer: <i>Lack of Cell-Surface Fas/APO-1 Expression in Pulmonary Adenocarcinoma May Allow Escape from Immune Surveillance</i> Yoshihiro Nambu and David G. Beer	259

<i>D. DETECTION OF ALTERATIONS IN THE APOPTOTIC PATHWAY</i>	
20	Prognostic Relevance of Angiogenic, Proliferative, and Apoptotic Factors in Lung Carcinomas: A Case Review Manfred Volm and Reet Koomägi 269
21	Morphological Assessment of Apoptosis in Human Lung Cells Lori D. Dwyer-Nield, David Dinsdale, J. John Cohen, Margaret K. T. Squier, and Alvin M. Malkinson 283
22	[D-Arg ⁶ , D-Trp ^{7,9} , N ^{me} Phe ⁸]-Substance P (6-11) Activates JNK and Induces Apoptosis in Small Cell Lung Cancer Cells via an Oxidant-Dependent Mechanism Alison MacKinnon and Tariq Sethi 299
23	Isolation of Cells Entering Different Programmed Cell Death Pathways Using a Discontinuous Percoll Gradient Patrick P. Koty, Haifan Zhang, Wendong Lei, and Mark L. Levitt 309
<i>E. DETECTION OF ALTERATIONS IN LUNG CELL-DIRECTED ANGIOGENESIS</i>	
24	Angiogenesis, Metastasis, and Lung Cancer: An Overview Amir Onn and Roy S. Herbst 329
25	Matrix Metalloproteinase Expression in Lung Cancer Melissa Lim and David M. Jablons 349
26	Vascular Endothelial Growth Factor Expression in Non-Small Cell Lung Cancer Kenneth J. O'Byrne, Jonathan Goddard, Alexandra Giatromanolaki, and Michael I. Koukourakis 357
27	Regulation of Angiostatin Mobilization by Tumor-Derived Matrix Metalloproteinase-2 Marsha A. Moses and Michael S. O'Reilly 375
28	In Vitro and In Vivo Assays for the Proliferative and Vascular Permeabilization Activities of Vascular Endothelial Growth Factor (VEGF) and Its Receptor Seiji Yano, Roy S. Herbst, and Saburo Sone 391
<i>F. DETECTION OF ALTERATIONS IN DNA REPLICATION AND REPAIR</i>	
29	Detection of Telomerase Activity in Lung Cancer Tissues Keiko Hiyama and Eiso Hiyama 401
30	Analysis of Alterations in a Base-Excision Repair Gene in Lung Cancer Nandan Bhattacharyya and Sipra Banerjee 413

PART IV. LUNG CANCER MODEL SYSTEMS

A. ANIMAL MODELS FOR LUNG CANCER

- 31 Induction of Lung Cancer by Passive Smoking
in an Animal Model System
Hanspeter Witschi 441
- 32 Metastatic Orthotopic Mouse Models of Lung Cancer
Robert M. Hoffman 457
- 33 Lung-Specific Expression of Mutant p53 as a Mouse Model
for Lung Cancer
Kam-Meng Tchou-Wong and William N. Rom 465
- 34 Use of Nucleotide Excision Repair-Deficient Mice as a Model
for Chemically Induced Lung Cancer
David L. Cheo and Errol C. Friedberg 481

B. ANIMAL MODELS FOR TUMOR METASTASES TO THE LUNG

- 35 Nude Mouse Lung Metastases Models of Osteosarcoma
and Ewing's Sarcoma for Evaluating New Therapeutic Strategies
Shu-Fang Jia, Rong-Rong Zhou, and Eugenie S. Kleinerman 495
- 36 Tumor-Specific Metastasis to Lung
Using Reporter Gene-Tagged Tumor Cells
**Lloyd A. Culp, Wen-Chang Lin, Nanette Kleinman,
Julianne L. Holleran, and Carson J. Miller** 507

C. MODELS FOR DEVELOPMENT OF TARGETED THERAPEUTICS

- 37 Cultures of Surgical Material from Lung Cancers: A Kinetic Approach
**Bruce C. Baguley, Elaine S. Marshall,
and Timothy I. Christmas** 527
- 38 The Hollow Fiber Assay
**Leslie-Ann M. Hall, Candice M. Krauthauser,
Roseanne S. Wexler, Andrew M. Slee, and Janet S. Kerr** 545
- Index 567
