Contents

Preface ..... *vii*

A Complete Course in Heart Sounds and Murmurs on CD ..... *Inside Back Cover*

1 The Checklist in History Taking *1*

Advantages of a Checklist *1*
Reminder List History *2*
Etiologies *3*
Follow-Up Questions *7*
New York Heart Association Functional and Therapeutic Classification *14*

2 Cardiac Clues from Physical Appearance *17*

Skin *17*
Congenital and Acquired Facies *20*
Eyes *22*
Edema *25*
Extremities *26*
Chest and Respiration *27*

3 Arterial Pulses and Pressures *29*

Method of Arm Palpation *29*
Rates of Rise and Pulse Volume *30*
Pulsus Bisferiens *37*
Palpation of the Leg Pulses *38*
Estimating Systolic Blood Pressure by Palpation Alone *39*
Accurate Blood Pressure Measurement *40*
Korotkoff Sounds *41*
Chest Piece Placement and Choice *42*
Equipment Sources of Error *43*
Systolic Pressure Measurement *44*
Diastolic Blood Pressure Recording *45*
Accuracy of Blood Pressure Recording *46*

Summary of How to Take Arm Blood Pressures by Listening for Korotkoff Sounds *48*
Pseudohypertension *49*
Pulsus Alternans *49*
Blood Pressure and Pulses in the Legs *51*
Pulsus Paradoxus *55*
Capillary Pulsation *58*
Abdominal Aortic Aneurysm (AAA) *58*
How to Tell Cardiac Function by Blood Pressure Response to a Valsalva Maneuver *58*

4 Jugular Pressure and Pulsations 63

Venous Pressure by Jugular Inspection *63*
How to Use the Internal Jugulars as a Manometer *65*
Method of Obtaining an Accurate Measurement of Venous Pressure *66*
How to Tell Jugular from Carotid Pulsations *68*
The Abdominal Compression Test (Hepatojugular Reflux) *70*
Jugular Pulse Contours *73*

5 Inspection and Palpation of the Chest 89

Ventricular Enlargement from Examination of the Chest *89*
Cardiac Dilatation Signs in the Left Lateral Decubitis Position *94*
Right Ventricular Enlargement *96*
Left-Sided Causes of Left Parasternal Movement *99*
X-ray Evaluation of Cardiac Size *101*
Diagnosis of Ventricular Hypertrophy by Physical Examination of the Precordium *103*

6 The Stethoscope 111

The Bell Chest Piece *111*
The Smooth Diaphragm *113*
The Tubing *114*
Air Leaks and Ear Tips *115*
Summary of Good Stethoscope Characteristics 116

7 Diagramming and Grading Heart Sounds and Murmurs 117

The Auscultogram *117*
Grading of Heart Sounds and Murmurs *119*

8 The First Heart Sound (S_1) 121

Physiology of the First Sound Components *121*
The M_1 Plus Aortic Ejection Sound as the Cause of a Split S_1 *123*
The Pulmonary Ejection Sound *125*
Loudness of the M_1 *129*

9 The Second Heart Sound (S_2) 133

Physiology and Nomenclature for the S_2 *133*
Explanation of Normal Splitting Sequence of S_2 *134*
Physiology of the Normally Moving Split *136*
Loudness of the Components of S_2 *137*
The Widely Split S_2 *143*
The A_2–P_2 in Pulmonary Stenosis *144*
ASDs with Narrow Splits *146*
Differential Diagnosis of the Fixed Split *147*
The Narrowly Split S_2 *148*
The S_2 Split in Pulmonary Hypertension *149*
The Reversed or Paradoxically Split S_2 *150*

10 The Opening Snap 155

Mechanism and Timing *155*
Relation Between the 2–OS Interval and the Severity of Mitral Stenosis *156*
The Loudness of the Opening Snap *159*
How to Tell an A_2–P_2 from an A_2–OS *160*

11 The Third Heart Sound (S_3) 163

Nomenclature *163*
Timing *163*
Mechanism of Production *165*
The Physiological S_3 *166*
Loudness of the S_3 *167*
The Exaggerated Physiological S_3 *169*
The Pathological S_3 *170*
The Physiological Versus the Pathological S_3 *170*
The Right Versus the Left Ventricular S_3 *171*
The S_3 Versus the Opening Snap *172*

12 The Fourth Heart Sound (S_4) 175

Nomenclature *175*
Mode of Production *175*
Recognizing the Rhythm of the S_4 Gallop *177*
The Physiological S_4 *177*
The Pathological S_4 *178*
Loudness and Audibility of the S_4 *180*
Differentiation of the S_4 from the S_3 *181*
Differentiation of an S_4–S_1 from a Split S_1 (M_1–A_1 or M_1–T_1) *182*
Severity of Cardiac Dysfunction and Presence of an S_4 *183*
The S_4–S_1 Interval and Severity of Dysfunction *184*
Summation and Augmented Gallops *184*
The Pacemaker S_4-Like Click *186*

13 Ejection Murmurs 187

Physical Causes *187*
Characteristics of the Ejection Murmur *188*
Types of Ejection Murmurs *193*
Systolic Flow Murmurs *193*
Aortic Stenosis Ejection Murmurs *200*
Pulmonary Stenosis Ejection Murmurs *206*
The Effect of Respiration on PS Ejection Murmurs *208*
Thoracic, Subclavian, Carotid, and Thyroid Artery Flow Murmurs *209*

14 Systolic Regurgitant Murmurs 213

The Effect of a Sudden Long Diastole on Left-Sided Regurgitant Murmurs *214*
Mitral Regurgitation Murmurs *215*
Effect of Drugs and Maneuvers on Systolic Regurgitant Murmurs *223*
The Prolapsed Mitral Valve Syndrome (Barlow's Syndrome) *225*
Tricuspid Regurgitation (TR) Murmurs *229*
The Cardiorespiratory Murmur *230*
VSD Murmurs *231*
Continuous Murmurs *234*

15 Diastolic Murmurs 243

Diastolic Atrioventricular Valve Murmurs *243*
Tricuspid Diastolic Flow Murmurs *253*
Tricuspid Stenosis (TS) Diastolic Murmurs *253*
Diastolic Semilunar Valve Murmurs *254*
Pulmonary Regurgitation Murmurs *258*
Pericardial Friction Rubs *259*

16 Abdominal Murmurs 265

Normal Abdominal Murmurs *265*
Abnormal Abdominal Murmurs *265*

Glossary 267
Index 287
