|-----------------------|----|
| Preface .....         | v  |
| Acknowledgments ..... | ix |
| Contributors .....    | xv |

## PART I. OPTIMIZING THE USAGE OF MODELS OF RENAL DISEASE

|   |    |
|---|----|
| 1 Standards of Animal Care in Biological Experiments<br><i>Ellen M. Levee</i> .....           | 3  |
| 2 Models of Polycystic Kidney Disease<br><i>Poornima Upadhya</i> .....                        | 13 |
| 3 Rat Models of the Metabolic Syndrome<br><i>Stevan P. Tofovic and Edwin K. Jackson</i> ..... | 29 |
| 4 Models of Glomerulonephritis<br><i>Raghu V. Durvasula and Stuart J. Shankland</i> .....     | 47 |

## PART II. CHOICES OF IMAGING TECHNIQUES IN STUDIES OF RENAL DISEASE

|   |     |
|---|-----|
| 5 Functional Studies of the Kidney with Magnetic Resonance Imaging<br><i>Hani B. Marcos, Yantian Zhang, and Peter L. Choyke</i> ..... | 69  |
| 6 Use of Radionuclides to Study Renal Function<br><i>Yiyan Liu and M. Donald Blaufox</i> .....  | 79  |
| 7 Intravital Videomicroscopy<br><i>Tokunori Yamamoto and Fumihiko Kajiya</i> .....  | 119 |
| 8 Confocal and Two-Photon Microscopy<br><i>János Peti-Peterdi and P. Darwin Bell</i> .....  | 129 |
| 9 Atomic Force Microscopy in Renal Physiology<br><i>Robert M. Henderson</i> .....   | 139 |
| 10 Freeze-Fracture Analysis of Renal-Epithelial Tight Junctions<br><i>Hiroyuki Sasaki</i> .....                                       | 155 |

## PART III. STUDIES OF RENAL DEVELOPMENT

|  |     |
|--|-----|
| 11 Organ Culture of Intact Metanephric Kidneys<br><i>Simon J. M. Welham and Adrian S. Woolf</i> .....                                      | 169 |
| 12 The Ureteric Bud: <i>Tissue-Culture Approaches to Branching Morphogenesis and Inductive Signaling</i><br><i>Alan O. Perantoni</i> ..... | 179 |

- 13 Studies of Cell Lineage in the Developing Kidney  
**Maria Luisa S. Sequeira Lopez and R. Ariel Gomez** ..... 193
- 14 Transient Transfection Assays for Analysis of Signal Transduction  
in Renal Cells  
**Robin L. Maser, Brenda S. Magenheimer, Christopher A. Zien,  
and James P. Calvet** ..... 205

#### **PART IV. APPROACHES TO STUDY MOLECULAR MECHANISMS OF DISEASE**

- 15 The Study of Gene Polymorphisms:  
*How Complex Is Complex Genetic Disease?*  
**Sylvia Bähring, Atakan Aydin, and Friedrich C. Luft** ..... 221
- 16 Laser-Capture Microdissection  
**Laura Barisoni and Robert A. Star** ..... 237
- 17 Serial Analysis of Gene Expression  
**M. Ashraf El-Meanawy, Shrinath Barathan, Patrick S. Hayden,  
Sudha K. Iyengar, Jeffrey R. Schelling, and John R. Sedor** ..... 257
- 18 RNA Labeling and Hybridization of DNA Microarrays  
**Erwin P. Böttinger, Akiva Novetsky, and Jiri Zavadil** ..... 275
- 19 Gene-Expression Analysis of Microdissected Renal Biopsies  
**Clemens D. Cohen and Matthias Kretzler** ..... 285
- 20 The Use of SELDI ProteinChip® Array Technology  
in Renal Disease Research  
**Eric Fung, Deb Diamond, Anja Hviid Simonsen,  
and Scot R. Weinberger** ..... 295

#### **PART V. TECHNICAL MEANS TO ASSESS FUNCTIONAL CORRELATES OF DISEASE**

- 21 Clearance Studies in Genetically Altered Mice  
**William T. Noonan and John N. Lorenz** ..... 315
- 22 Long-Term Blood-Pressure Monitoring in Unrestrained Animals  
**Karen A. Griffin, Isam Abu-Amarah, and Anil K. Bidani** ..... 329
- 23 In Vitro Studies on Renin Release  
**Boye L. Jensen, Ulla G. Friis, and Ole Skøtt** ..... 341
- 24 Mitochondrial Function  
**Joel M. Weinberg and Pothana Saikumar** ..... 351
- 25 Detection of Cysteine S-Nitrosylation and Tyrosine 3-Nitration  
in Kidney Proteins  
**Mark Crabtree, Gang Hao, and Steven S. Gross** ..... 373
- 26 Products of Arachidonic Acid Metabolism  
**Mairead A. Carroll, John C. McGiff, and Nicholas R. Ferreri** ..... 385

27 Methods for Measurements of Heme Oxygenase (HO)  
Isoforms-Mediated Synthesis of Carbon Monoxide  
and HO-1 and HO-2 Proteins  
**Nader G. Abraham, Houli Jiang, Michael Balazy,  
and Alvin I. Goodman ..... 399**

28 The Juxtamedullary Nephron Preparation  
**Daniel Casellas and Leon C. Moore..... 413**

29 Tubuloglomerular Feedback  
**Volker Vallon and Jurgen Schnermann ..... 429**

30 Microdissected Perfused Vessels  
**Thomas L. Pallone ..... 443**

31 Renal Microperfusion Techniques  
**Charles S. Wingo, I. David Weiner, and Shen-Ling Xia ..... 457**

32 How to Design a Clinical Trial  
**Bryan M. Curtis, Brendan J. Barrett, and Patrick S. Parfrey ..... 475**

Conclusion  
**Michael S. Goligorsky ..... 491**

Index ..... 495
