## PART I GENETIC SELECTIONS

1 Genetic Complementation Protocols <b>Jessica L. Sneeden and Lawrence A. Loeb</b> .....	3
2 Use of Pol I-Deficient <i>E. coli</i> for Functional Complementation of DNA Polymerase <b>Manel Camps and Lawrence A. Loeb</b> .....	11
3 Selection of Novel Eukaryotic DNA Polymerases by Mutagenesis and Genetic Complementation of Yeast <b>Ranga N. Venkatesan and Lawrence A. Loeb</b> .....	19
4 Autogene Selections <b>Jijumon Chelliserrykattil and Andrew D. Ellington</b> .....	27
5 Selection for Soluble Proteins via Fusion with Chloramphenicol Acetyltransferase <b>Volker Sieber</b> .....	45
6 Prosides: A Phage-Based Method for Selecting Thermostable Proteins <b>Andreas Martin, Franz X. Schmid, and Volker Sieber</b> .....	57
7 Minimization of Proteins by Random Fragmentation and Selection <b>Gary W. Rudgers and Timothy Palzkill</b> .....	71

## PART II SCREENS FOR ENZYMES

8 Evaluating a Screen and Analysis of Mutant Libraries <b>Oriana Salazar and Lianhong Sun</b> .....	85
9 Screening Mutant Libraries in <i>Saccharomyces cerevisiae</i> <b>Thomas Bulter, Volker Sieber, and Miguel Alcalde</b> .....	99
10 Solid-Phase Screening Using Digital Image Analysis <b>Alexander V. Tobias and John M. Joern</b> .....	109
11 Screening for Thermostability <b>Patrick C. Cirino and Radu Georgescu</b> .....	117
12 High-Throughput Screening of Mutant $\alpha$ -Amylase Libraries for Increased Activity at 129°C <b>Holger Berk and Robert J. Lebbink</b> .....	127

13	High-Throughput Carbon Monoxide Binding Assay for Cytochromes P450 <b>Christopher R. Otey</b> .....	137
14	High-Throughput Screen for Aromatic Hydroxylation <b>Christopher R. Otey and John M. Joern</b> .....	141
15	Colorimetric Screen for Aliphatic Hydroxylation by Cytochrome P450 Using <i>p</i> -Nitrophenyl-Substituted Alkanes <b>Edgardo T. Farinas</b> .....	149
16	High-Throughput Screens Based on NAD(P)H Depletion <b>Anton Glieder and Peter Meinhold</b> .....	157
17	High-Throughput Tetramethylbenzidine (TMB) Screen for Peroxidases <b>Radu Georgescu</b> .....	171
18	Screen for Oxidases by Detection of Hydrogen Peroxide with Horseradish Peroxidase <b>Lianhong Sun and Makoto Yagasaki</b> .....	177
19	Colorimetric Dehydrogenase Screen Based on NAD(P)H Generation <b>Kimberly M. Mayer</b> .....	183
20	Colorimetric Assays for Screening Laccases <b>Miguel Alcalde and Thomas Bulter</b> .....	193
21	pH Sensing Agar Plate Assays for Esterolytic Enzyme Activity <b>Karl E. Griswold</b> .....	203
22	A pH-Indicator-Based Screen for Hydrolytic Haloalkane Dehalogenase <b>Huimin Zhao</b> .....	213
23	Detection of Aromatic $\alpha$ -Hydroxyketones with Tetrazolium Salts <b>Michael Breuer and Bernhard Hauer</b> .....	223
24	Selection of Heat-Stable <i>Clostridium cellulovorans</i> Cellulases After In Vitro Recombination <b>Koichiro Murashima and Roy H. Doi</b> .....	231
25	Screening and Selection Strategies for Disulfide Isomerase Activity <b>Ronald Lafond, Xiaoming Zhan, and George Georgiou</b> .....	239
26	An Overview of High-Throughput Screening Systems for Enantioselective Enzymatic Transformations <b>Manfred T. Reetz</b> .....	259
27	Select Protocols of High-Throughput <i>ee</i> -Screening Systems for Assaying Enantioselective Enzymes <b>Manfred T. Reetz</b> .....	283

28 Directed Evolution of the Substrate Specificities of a Site-Specific Recombinase and an Aminoacyl-tRNA Synthetase Using Fluorescence-Activated Cell Sorting (FACS)  
**Stephen W. Santoro and Peter G. Schultz**..... 291

29 Calmodulin-Tagged Phage and Two-Filter Sandwich Assays for the Identification of Enzymatic Activities  
**Christian Heinis, Julian Bertschinger, and Dario Neri** ..... 313

30 High-Throughput FACS Method for Directed Evolution of Substrate Specificity  
**Mark J. Olsen, Jongsik Gam, Brent L. Iverson, and George Georgiou** ..... 329

31 Improving Protein Folding Efficiency by Directed Evolution Using the GFP Folding Reporter  
**Geoffrey S. Waldo** ..... 343

Index ..... 361
