

Contents

Dedication	v
Preface	vii
1 Human Aging: Present and Future	1
<i>Demographics</i>	1
<i>Infectious Diseases of the Aging</i>	5
<i>Limits on Life Expectancy and Future Prospects</i>	7
<i>Theories of Senescence</i>	11
<i>Chapter Summary</i>	14
<i>References</i>	15
2 Aging and Altered Resistance to Infection	19
<i>Relatively Common Bacterial Infections of Aging Humans</i>	20
<i>Selected Examples of Age-Associated Susceptibility</i> <i>to Bacterial Infections</i>	24
<i>Bacterial Interactions with Mucosal Surfaces</i>	28
<i>Antibiotic Resistance and Bacterial Variation</i>	39
<i>Viral Infections in Aging Humans</i>	42
<i>Protozoan Parasites in Aging Subjects</i>	47
<i>Fungal Infections in Aging Subjects</i>	50
<i>Chapter Summary</i>	51
<i>References</i>	53
3 Senescence of Natural /Innate Resistance to Infection	61
<i>Pattern Recognizing Receptors of Innate Immunity</i>	62
<i>Phagocytic Cells: Monocytes/Macrophages</i>	72
<i>Microbial Evasion of Phagocytic Destruction</i>	80
<i>Age-Related Changes in Macrophages</i>	81
<i>Phagocytic Cells: Neutrophils</i>	96
<i>Natural Killer/Lymphokine-Activated Killer Cells</i>	105
<i>Chapter Summary</i>	115
<i>References</i>	117
4 Aging of Adaptive /Acquired Immunity	135
<i>Aging of the Thymus and Thymus-Derived (T) Cells</i>	136
<i>The Functions and Diversity of Peripheral T Cells</i>	145
<i>Summary: Known and Cognizable Effects of Aging T Cells</i>	172
<i>Differentiation, Functions, and Aging of B Cells</i>	183

Chapter Summary..... 195

References..... 197

5 Nutrition, Longevity, and Integrity
of the Immune System213

RCI-Mediated Delay of Immunosenescence 214

How Does RCI Promote Life-Span Extension? 217

Dietary Restriction vs Malnutrition 218

References..... 221

Epilogue225

Index 233
