Preface v

Contributors xi

PART I: TISSUE TECHNIQUES

1 Morphology and Molecular Properties of Cellular Components
of Normal Cerebral Vessels
Sukriti Nag 3

2 Studies of Cerebral Vessels by Transmission Electron Microscopy
and Morphometry
Sukriti Nag 37

3 Freeze-Fracture Studies of Cerebral Endothelial Tight Junctions
Hartwig Wolburg, Stefan Liebner, and Andrea Lippoldt 51

4 Studies of Cerebral Endothelium by Scanning
and High-Voltage Electron Microscopy
Albert S. Lossinsky and Richard R. Shivers 67

5 Detection of Endothelial/Lymphocyte Interaction in Spinal Cord
Microvasculature by Intravital Videomicroscopy
Britta Engelhardt, Peter Vajkoczy, and Melanie Laschinger 83

PART II: BLOOD–BRAIN BARRIER PERMEABILITY TECHNIQUES

6 Pathophysiology of Blood–Brain Barrier Breakdown
Sukriti Nag 97

7 Pial Vessel Permeability to Tracers Using Cranial Windows
William G. Mayhan 121

8 Blood–Brain Barrier Permeability Using Tracers
and Immunohistochemistry
Sukriti Nag 133

9 Ultracytochemical Studies of the Compromised Blood–Brain Barrier
Sukriti Nag 145

10 Immunogold Detection of Microvascular Proteins
in the Compromised Blood–Brain Barrier
Eain M. Cornford, Shigeyo Hyman, and Marcia E. Cornford 161

11 Measurement of Blood–Brain and Blood–Tumor Barrier
Permeabilities with [¹⁴C]-Labeled Tracers
Kamlesh Asotra, Nagendra Ningaraj, and Keith L. Black 177

PART III: BLOOD–BRAIN BARRIER TRANSPORT TECHNIQUES

12	A Review of Blood–Brain Barrier Transport Techniques Quentin R. Smith	193
13	<i>In Situ</i> Brain Perfusion Technique Quentin R. Smith and David D. Allen	209
14	Brain Efflux Index Method: <i>Characterization of Efflux Transport Across the Blood–Brain Barrier</i> Hiroyuki Kusuvara, Tetsuya Terasaki, and Yuichi Sugiyama	219
15	Transport Studies Using Membrane Vesicles Darryl R. Peterson and Richard A. Hawkins	233
16	Drug Transport Studies Using Quantitative Microdialysis Haiqing Dai and William F. Elmquist	249
17	Single-Pass Dual-Label Indicator Method: <i>Blood-to-Brain Transport of Glucose and Short-Chain Monocarboxylic Acids</i> Michelle A. Puchowicz, Kui Xu, and Joseph C. LaManna	265
18	Protein Transport in Cerebral Endothelium: <i>In Vitro Transcytosis of Transferrin</i> Laurence Fenart and Roméo Cecchelli	277
19	Transport Across the Choroid Plexuses In Vivo and In Vitro Nathalie Strazielle and Jane Elizabeth Preston	291

PART IV: IN VITRO TECHNIQUES

20	An Overview of In Vitro Techniques for Blood–Brain Barrier Studies Andreas Reichel, David J. Begley, and N. Joan Abbott	307
21	Isolation and Characterization of Human Brain Endothelial Cells Katerina Dorovini-Zis, Rukmini Premeya, and Hanh Huynh	325
22	Human Brain Microvessel Endothelial Cell and Leukocyte Interactions Jacqueline Shukaliak-Quandt, Donald Wong, and Katerina Dorovini-Zis	337
23	Development and Characterization of Immortalized Cerebral Endothelial Cell Lines Pierre-Olivier Couraud, John Greenwood, Françoise Roux, and Pete Adamson	349
24	Isolation and Characterization of Retinal Endothelial Cells David A. Antonetti and Ellen B. Wolpert	365
25	Isolation and Characterization of Cerebral Microvascular Pericytes Paula Dore-Duffy	375

PART V: MOLECULAR TECHNIQUES

26	Molecular Biology of the Blood–Brain Barrier William M. Pardridge	385
----	---	-----

27	Blood–Brain Barrier Genomics Ruben J. Boado	401
28	Dynamic In Vitro Model of the Blood–Brain Barrier: <i>Gene Profiling Using cDNA Microarray Analysis</i> Matteo Marroni, Kelly M. Kight, Mohammed Hossain, Luca Cucullo, Shailesh Y. Desai, and Damir Janigro	419
29	Phage Display Technology for Identifying Specific Antigens on Brain Endothelial Cells Jamshid Tanha, Arumugam Muruganandam, and Danica Stanimirovic	435
30	mRNA Detection in Cerebral Vessels by Nonradioactive <i>In Situ</i> Hybridization David Zagzag and Wai Chan	451
31	Proteomics of Brain Endothelium: <i>Separation of Proteins by Two-Dimensional Gel Electrophoresis and Identification by Mass Spectrometry</i> Reiner F. Haseloff, Eberhard Krause, and Ingolf E. Blasig	465
32	Immunoblot Detection of Brain Vascular Proteins Christian T. Matson and Lester R. Drewes	479
33	Immunohistochemical Detection of Endothelial Proteins Sukriti Nag	489
PART VI: GENETICALLY ALTERED MICE		
34	Cerebral Vascular Function in Genetically Altered Mice Frank M. Faraci	505
35	Generation of Transgenic Mice by Pronuclear Injection Annette Damert and Heike Kusserow	513
36	Mouse Genome Modification Richard Rozmahel	529
	Index	545
