Introduction	1
<i>Claude E. Barfield, Günter Heiduk and Paul J.J. Welfens</i>	
A. Telecommunications, Internet, Innovation and Growth in Europe.....	9
<i>Paul J.J. Welfens and Andre Jungmittag</i>	
1. Telecommunications, Internet and Transatlantic Growth	
Differentials.....	9
1.1 Telecommunications and the Internet	9
1.2 Telecommunications and Technological Dynamics.....	10
1.3 Taking Stock: Transatlantic Growth Differential.....	13
2. Theoretical Analysis.....	17
2.1 ICT Dynamics and Growth	17
2.2 Perspectives on Inflation and Growth	29
3. Innovation, ICT Dynamics and Growth: Theoretical and Empirical	
Aspects	33
3.1 Basic Theoretical Issues.....	33
3.2 Empirical Links Between Innovations and Output	36
3.3 ICT as a General Purpose Technology?.....	40
4. The Role of Telecommunications and the Internet for Trade and	
Growth.....	41
4.1 Telecommunications, Innovation and Economic Growth in	
Germany 1960 - 1990	41
4.2 Growth and Employment Effects of an Internet Flat Rate in	
Germany.....	44
4.3 Telecommunications and Foreign Trade.....	48
5. Some Long-Term Aspects	51
Appendix: Methodological Issues in Growth Statistics	54
B. Is the IT Revolution Possible in Japan?	67
<i>Yukio Noguchi</i>	
1. Introduction	67
2. The Present State of IT Utilization in Japan	68
3. The Government IT Policy	71
4. Social Factors Prevent the IT Revolution	73
5. The Traditional Companies Still Dominate the Economy	75
6. The Reform of the 1940 System.....	77
Annex: Tables	80
C. The Internet and Evolving Patterns of International Trade	85
<i>Caroline L. Freund and Diana Weinhold</i>	
1. Introduction	85
2. Brief Review of a Theoretical Framework for Empirical Tests.....	86
3. Specification of the Gravity Equation of Trade.....	87
4. Data	88
5. Discussion of the Results.....	90

6. Sensitivity Analysis and Alternative Explanations.....	99
7. Conclusions	101
D. Internet Dynamics, Trade and Globalization (Some Comments on the paper by Caroline L. Freund and Diana Weinhold).....	105
<i>Thomas Gries</i>	
1. General Comments	105
2. Comments on "Internet Increased Trade"	105
3. Comments on "Internet Distance Trade"	106
E. Internet and Culture.....	109
<i>Marieke de Mooij</i>	
1. The Convergence Thesis	109
2. Meta-Analysis of Consumption and Consumer Behaviour	111
3. Hofstede's Dimensions of National Culture	113
4. With Increased Wealth Cultural Values Become Manifest	114
5. Culture and Consumption.....	114
6. Convergence-Divergence: A Pattern	115
7. Communication Technology: Increasing Influence of Culture	120
8. The Communication Means of the New Economy.....	122
9. The Internet in Europe.....	124
10. Business Application.....	127
11. Conclusions	128
F. E-Commerce: A Paradise for Bargain Hunters?	131
<i>Christiane Jäcker</i>	
G. E-Finance: Causing Major Upheavals in the Spatial Organization of the Financial Sector?	135
<i>Nicole Pohl</i>	
1. E-Finance: Technological Revolution, Paradigm Shift or Hype?	135
2. The Role of International Financial Centers.....	137
3. New Technological Developments and the Role of E-Finance	139
3.1 Online Banking.....	141
3.2 Investment Houses: Traditional, Online or Hybrid.....	141
3.3 Alternative Trading Systems and the Competition Between Floor Trading and Electronic Trading.....	142
3.4 Cooperation and Alliances of Stock Exchanges	143
3.5 Implications for International Financial Centers: Expectations and Perceptions	144
4. Financial Centers as Information and Interaction Centers.....	146
4.1 Delineating the Argument.....	146
4.2 Open Questions	150
5. Further Reasons for Agglomeration: Labor Markets and Institutions.....	157
5.1 Labor Markets.....	157
5.2 Institutions	159
6. Information Strategies and the Special Characteristics of Centers	159

7. Conclusion.....	161
Appendix: Tables	164
H. E-Finance: Causing Major Upheavals in the Spatial Organization of the Financial Sector? (Some Comments on Paper by Nicole Pohl)	171
<i>Thomas P. Gehrig</i>	
1. Introduction	171
2. What Does Theory Tell Us?	172
3. What Do Empirical Observations Tell Us?	173
4. How Does the Internet Affect Spatial Financial Activities?.....	175
I. How Will the Internet Change the Japanese Financial Perspective?	179
<i>Mariko Fujii</i>	
1. Introduction	179
2. Current State of the Development of Electronic Financial Services in Japan.....	179
2.1 Securities Businesses on the Internet	180
2.2 E-Banking	182
2.3 Challenges to the Development of Electronic Financial Transactions	186
2.3.1 Internet Access.....	186
2.3.2 System Security	186
2.3.3 Growth Potential for Online Brokers	187
3. Impacts of Electronic Financial Transactions on Market Structure.....	189
3.1 Direct Effects: Transaction Costs.....	189
3.2 Possibility of Changing Market Structure: Cooperation and Competition.....	190
4. Policy Implications and Concluding Remarks.....	192
4.1 Policy Challenges.....	192
4.2 Implications for the Banking Business.....	193
J. How Will the Internet Change the Japanese Financial Perspective? (Some Comments on Paper by Mariko Fujii)	195
<i>Christian Thygesen</i>	
K. Internet Dynamics and Expansion of European Financial Markets: Issues from a Behavioral Finance Perspective	199
<i>Matthias Bank</i>	
1. Introduction	199
2. Recent Trends in the Internet and the Internet Economy	200
3. The Expansion of the European Financial Markets	202
3.1 European Financial Markets as a Source of Risk Capital for SMEs	202
3.2 Mergers, Acquisitions and Corporate Debt Markets	207
4. An Assessment of the Recent Developments	208
4.1 Shortcomings in the Valuation of Internet-Related Firms.....	209

4.2	The Behavioral Finance Approach (BFA)	211
4.3	A Behavioral Finance Interpretation for the Internet Bubble	212
5.	Conclusions	213
L.	Competition in Telecommunications and Internet Services:	
	A Dynamic Perspective	217
	<i>Günter Knieps</i>	
1.	The Internet as the Prime Driver of Convergence of the Telecommunications, Media and Information Technology (IT) Sectors	217
2.	Internet Periphery Versus Internet Service Provision	218
3.	Access to the Internet	220
4.	Internet Backbones	223
4.1	Long Distance Network Capacity (Communications Bandwidth)	224
4.2	Internet Backbone Services	224
4.3	Organization of Interconnectivity: Transit and Peering	224
M.	Persistence of Monopolistic Bottlenecks in Telecommunications and Internet Services (Some Comments on a Paper by Günter Knieps)	229
	<i>Torsten J. Gerpott</i>	
1.	Summary of Key Conclusions of Knieps	229
2.	Availability of Competing (Internet) Access Technologies	230
3.	Competitive Intensity on the German (Internet) Backbone Bandwidth Market	231
N.	Regulatory Economics and the Internet	235
	<i>Friedhelm Dommermuth and Christoph Mertens</i>	
1.	Introduction	235
2.	Market Trends and the Importance of the Internet	235
2.1	Importance of the Internet	235
2.2	Development of Internet Usage / Development of Broadband Internet	236
2.3	Internet Service Provider Trends	237
2.4	Convergence	238
3.	RegTP Determinations	238
3.1	Wholesale Metered Access for ISPs	238
3.2	Wholesale Unmetered Internet Access	239
3.3	DSL	240
3.4	Line Sharing	240
3.5	Internet Telephony	241
4.	Impact of the Internet on the PSTN/ISDN	243
5.	Questions Arising from Regulatory Practice and Emerging Trends	245
5.1	Should RegTP Regulate the Internet?	245
5.2	Is Regulation of the Wholesale Service Enough?	246
5.3	Regulatory Implications	246
6.	Conclusion	248

O. The Regulation, Deregulation, and Nonregulation of Telecommunications and the Internet in the United States.....	249
<i>Donald K. Stockdale</i>	
1. Background and Overview	249
1.1 Antitrust versus Regulation: A Two-Pronged Approach to Regulating Firms.....	249
1.2 Reconsidering Industry-Specific Regulation.....	250
2. Regulation and Deregulation of Telecommunications	251
2.1 The Communications Act of 1934	251
2.2 The Introduction of Competition into the Long-Distance Market	253
2.2.1 Opening the Long-Distance Market to Competition.....	253
2.2.2 Regulatory Responses to the Introduction of Competition	254
2.3 The Introduction of Competition into Local Telephone Markets..	260
2.3.1 The Local Competition Provisions	260
2.3.2 Deregulation	263
3. The Non-Regulation of Enhanced Services and the Internet.....	265
3.1 The Non-Regulation of Enhanced Services	265
3.2 The Non-Regulation of the Internet	268
4. Summary and Conclusions	269
P. Deregulation of Telecommunications and Non-Regulation of the Internet in Japan.....	275
<i>Koichiro Agata</i>	
1. Introduction	275
2. Actors on the Internet Market.....	275
3. Deregulation of Telecommunications in Japan	277
3.1 Concrete Actors.....	277
3.2 Stages of the Telecommunications Deregulation.....	277
3.3 Further Discussions and Reforms	279
4. Non-regulation of Internet Content in Japan	280
4.1 Concrete Actors.....	280
4.2 Process of Discussions	281
4.3 Pending Issues.....	282
5. Perspectives	285
Q. Electronic Commerce and the Gats Negotiations.....	289
<i>Claude E. Barfield</i>	
1. Introduction	289
2. Classification	289
3. Taxation.....	292
4. Scope: Modes of Supply.....	293
5. E-Commerce: The Impact of Regulation.....	297
6. Intellectual Property Issues.....	300
6. Privacy & Security	302

R. Electronic Commerce and the GATS Negotiations (Some Comments on a Paper by Claude E. Barfield).....	305
<i>Harald Sander</i>	
1. Introduction	305
2. Issues in E-Commerce and Trade.....	306
3. Towards an Informed Debate on E-Commerce	308
S. The Internet and Society	311
<i>William H. Dutton</i>	
1. Technological Determinism and Conflicting Visions of the Internet....	311
2. Limitations of the "Social Impacts of ICTs" Approach	312
2.1 An Over-simplified View of the Processes Determining Societal Outcomes	312
2.2 Narrowness of the "Information Age" Thesis.....	313
2.3 Bias Towards Long-term Analyses of Staged Development	314
2.4 Failure to Acknowledge that Technology is Intrinsically Social ..	314
3. The Internet and Society: The Crucial Role of Tele-Access	315
3.1 "Communicative Power" and the Politics of Information.....	315
3.2 Key Dimensions of Tele-Access.....	315
3.3 Social Factors Shaping Choices and their Implications for Access	316
4. Encompassing Studies of Influence, Control and Management	317
4.1 Influence and the Mass Media	317
4.2 Technology, Expertise, and Social Control.....	318
4.3 Management Strategies Related to ICT Use	319
5. The Interaction of Strategies within a Broader Ecology of Games	319
T. The Internet and Society (Some Comments on Paper by William H. Dutton).....	323
<i>Guenter Heiduk</i>	
U. Knowledge, Work Organisation and Economic Growth.....	327
<i>Elena Arnal, Wooseok Ok and Raymond Torres</i>	
1. Introduction	327
2. The Changing Nature of Work	328
2.1 The Diffusion of New Work Practices and New Forms of Work	328
2.1.1 How Prevalent are New Work Practices Among Firms?....	329
2.1.2 Telework: An Emerging Form of Work	331
2.2 A Higher Demand for Knowledge-Intensive Employment.....	334
2.2.1 Emerging Labour and Skill Shortages	335
2.2.2 A Shift Towards Knowledge-Intensive Employment.....	336
2.3 Employee Tenure: Overall Stability Which Masks Important Underlying Changes.....	341
3. New Work Practices, Skills and Economic Growth.....	346
3.1 New Work Practices and Growth.....	347
3.1.1 Findings form the Existing Literature.....	348
3.1.2 Empirical Evidence.....	349
3.2 Links Between Skills and Economic Growth	355

4. Policy Issues	358
4.1 Mobilising Labour Supply	358
4.2 Equipping Workers with the Appropriate Skills	359
4.2.1 Education in New Technology.....	360
4.2.2 Vocational and on the-Job Training.....	361
4.2.3 Looking at Migration in a New Light.....	364
4.3 Enhancing Employment Adjustment: the Role of Collective Bargaining and Government Regulation.....	365
5. Concluding Remarks.....	369
Annex I: Survey on New Work Practices Used in the Study	371
Annex II: Tables.....	372
V. The Quest for Global Leadership in the Internet Age: A European Perspective (Luncheon Speech).....	377
<i>Sigmar Mosdorf</i>	
List of Figures	381
List of Tables.....	383
List of Contributors.....	387

Internet, Economic Growth and Globalization
Perspectives on the New Economy in Europe, Japan and
the USA

Barfield, C.E.; Heiduk, G.S.; Welfens, P.J.J. (Eds.)

2003, XI, 391 p., Hardcover

ISBN: 978-3-540-00286-4
