

Contents

1. Systems with Lebesgue Sampling	1
<i>Karl Johan Åström, Bo Bernhardsson</i>	
1.1 Introduction	2
1.2 Examples of Systems with Lebesgue Sampling	2
1.3 A Simple Example	4
1.4 A First Order System	6
1.5 Conclusions	11
1.6 References	12
2. Acoustic Attenuation Employing Variable Wall Admittance . . .	15
<i>H. T. Banks, K. M. Furati, K. Ito, N. S. Luke, C. J. Smith</i>	
2.1 Introduction	16
2.2 Problem Formulation	16
2.3 Frequency Domain and Approximation	17
2.4 Instantaneous Total Energy and Damping	21
2.5 Computational Results	22
2.6 Concluding Remarks	26
2.7 References	26
3. Some Remarks on Linear Filtering Theory for Infinite Dimensional Systems	27
<i>Alain Bensoussan</i>	
3.1 Introduction	28
3.2 Linear Random Functionals	28
3.3 Description of the Model and Statement of the Problem	30
3.4 Obtaining the Best Estimate	34
3.5 Final Form. Decoupling Theory	38
3.6 References	39
4. A Note on Stochastic Dissipativeness	41
<i>Vivek S. Borkar, Sanjoy K. Mitter</i>	
4.1 Introduction	42
4.2 Notation and Definitions	42
4.3 Connections to Ergodic Control	46
4.4 References	49
5. Internal Model Based Design for the Suppression of Harmonic Disturbances	51
<i>Christopher I. Byrnes, David S. Gilliam, Alberto Isidori, Yutaka Ikeda, Lorenzo Marconi</i>	
5.1 Introduction	52
5.2 The Case of a SISO System	53
5.3 A Numerical Example of Take-Off and Landing	57
5.4 Remarks on the Internal Model Principle	62

5.5	The Case of a MIMO System	63
5.6	References	69
6.	Conditional Orthogonality and Conditional Stochastic Realization	71
	<i>Peter E. Caines, R. Deardon, H. P. Wynn</i>	
6.1	Introduction	72
6.2	Main Results	73
6.3	References	84
7.	Geometry of Oblique Splitting Subspaces, Minimality, and Hankel Operators	85
	<i>Alessandro Chiuso, Giorgio Picci</i>	
7.1	Introduction	86
7.2	Oblique Projections	87
7.3	Notations and Basic Assumptions	89
7.4	Oblique Markovian Splitting Subspaces	92
7.5	Acausality of Realizations with Feedback	100
7.6	Scattering Representations of Oblique Markovian Splitting Subspaces	105
7.7	Stochastic Realization in the Absence of Feedback	109
7.8	Reconciliation with Stochastic Realization Theory	120
7.9	Conclusions	124
7.10	References	124
8.	Linear Fractional Transformations	127
	<i>Harry Dym</i>	
8.1	A Problem	128
8.2	A Solution	128
8.3	An Application	129
8.4	References	133
9.	Structured Covariances and Related Approximation Questions	135
	<i>Tryphon T. Georgiou</i>	
9.1	Introduction	136
9.2	Structured Covariances	136
9.3	Sample Covariances and the Approximation Problem	137
9.4	Concluding Remarks	139
9.5	References	139
10.	Risk Sensitive Identification of ARMA Processes	141
	<i>László Gerencsér, György Michaletzky</i>	
10.1	Weighted Recursive Prediction Error Identification	142
10.2	A Risk-Sensitive Criterion	144
10.3	The Minimization of $J(K)$	146
10.4	Alternative Expressions for $J(K)$	149
10.5	Multivariable Systems	154
10.6	Bibliography	157
11.	Input Tracking and Output Fusion for Linear Systems	159
	<i>Xiaoming Hu, Ulf Jönsson, Clyde F. Martin</i>	
11.1	Introduction	160

11.2	Autonomous Linear Systems	160
11.3	Exact Input Tracking	163
11.4	Output Fusion for Input Tracking	166
11.5	Concluding Remarks	171
11.6	References	172
12.	The Convergence of the Extended Kalman Filter	173
	<i>Arthur J. Krener</i>	
12.1	Introduction	174
12.2	Proof of the Main Theorem	177
12.3	Conclusions	181
12.4	References	182
13.	On the Separation of Two Degree of Freedom Controller and Its Application to H_∞ Control for Systems with Time Delay . .	183
	<i>Yohei Kuroiwa, Hidenori Kimura</i>	
13.1	Introduction	184
13.2	System Description and Compensator Structure	185
13.3	Application of H_∞ Control to Systems with Time Delay	186
13.4	Conclusion	189
14.	The Principle of Optimality in Measurement Feedback Control for Linear Systems	193
	<i>Alexander B. Kurzhanski</i>	
14.1	Introduction	194
14.2	The Basic Problem and the Cost Functional	194
14.3	Guaranteed (Set-Membership) Estimation	195
14.4	Control Synthesis for the Set-Valued Control System	198
14.5	Solution through Duality Techniques	199
14.6	References	202
15.	Linear System Identification as Curve Fitting	203
	<i>Lennart Ljung</i>	
15.1	Introduction	204
15.2	Curve Fitting	204
15.3	Linear Dynamic Models	207
15.4	Fitting the Frequency Function Curve by Local Methods	210
15.5	Fitting the Frequency Function by Parametric Methods	211
15.6	Conclusions	214
15.7	References	214
16.	Optimal Model Order Reduction for Maximal Real Part Norms	217
	<i>A. Megretski</i>	
16.1	Introduction	218
16.2	Maximal Real Part Model Reduction	219
16.3	H-Infinity Modeling Error Bounds	223
16.4	Minor Improvements and Numerical Experiments	224
17.	Quantum Schrödinger Bridges	227
	<i>Michele Pavon</i>	
17.1	Introduction: Schrödinger's Problem	228
17.2	Elements of Nelson-Föllmer Kinematics of Finite Energy Diffusions	229

17.3	Schrödinger Bridges	231
17.4	Elements of Nelson's Stochastic Mechanics	232
17.5	Quantum Schrödinger Bridges	233
17.6	Collapse of the Wavefunction	235
17.7	Conclusion and Outlook	235
17.8	References	236
18.	Segmentation of Diffusion Tensor Imagery	239
	<i>Eric Pichon, Guillermo Sapiro, Allen Tannenbaum</i>	
18.1	Introduction	240
18.2	Active Contours and Diffusion Tensor Imaging	241
18.3	Conclusions	245
18.4	Bibliography	246
19.	Robust Linear Algebra and Robust Aperiodicity	249
	<i>Boris T. Polyak</i>	
19.1	Introduction	250
19.2	Matrix Norms and Preliminaries	250
19.3	Solution Set of Perturbed Linear Algebraic Equations	252
19.4	Nonsingularity Radius	254
19.5	Real Pseudospectrum	255
19.6	Aperiodicity Radius	258
19.7	Conclusions	258
19.8	References	259
20.	On Homogeneous Density Functions	261
	<i>Stephen Prajna, Anders Rantzer</i>	
20.1	Introduction	262
20.2	Preliminaries	262
20.3	Homogeneous Density Functions for Homogeneous Systems	265
20.4	Perturbations by Higher and Lower Order Terms	272
20.5	Conclusions	273
20.6	References	273
21.	Stabilization by Collocated Feedback	275
	<i>Olof J. Staffans</i>	
21.1	Introduction	276
21.2	Infinite-Dimensional Linear Systems	277
21.3	Passive and Conservative Scattering and Impedance Systems	280
21.4	Flow-Inversion	284
21.5	The Diagonal Transform	289
21.6	References	291
22.	High-Order Open Mapping Theorems	293
	<i>Héctor J. Susmann</i>	
22.1	Introduction	294
22.2	Preliminaries	298
22.3	The Finite-Dimensional Theorem	301
22.4	The Infinite-Dimensional Theorem	303
22.5	Second-Order Open Mapping Theorems	308
22.6	References	315

23. New Integrability Conditions for Classifying Holonomic and Nonholonomic Systems	317
<i>Tzyh-Jong Tarn, Mingjun Zhang, Andrea Serrani</i>	
23.1 Introduction	318
23.2 Previous Work on Integrability Conditions	318
23.3 New Integrability Conditions	323
23.4 Applications of the New Conditions	329
23.5 Conclusions	330
23.6 References	331
24. On Spectral Analysis Using Models with Pre-specified Zeros . .	333
<i>Bo Wahlberg</i>	
24.1 Introduction and Problem Formulation	334
24.2 Orthonormal Rational Functions	336
24.3 Least Squares Estimation	338
24.4 The Covariance Extension Problem	341
24.5 Conclusion and Future Work	343
24.6 References	343
25. Balanced State Representations with Polynomial Algebra . . .	345
<i>Jan C. Willems, Paolo Rapisarda</i>	
25.1 Introduction	346
25.2 The System Equations	347
25.3 The Controllability and Observability Gramians	348
25.4 Balanced State Representation	351
25.5 Comments	353
25.6 Appendix	355
25.7 References	357
26. Nonconvex Global Optimization Problems: Constrained Infinite-Horizon Linear-Quadratic Control Problems for Discrete Systems	359
<i>V.A. Yakubovich</i>	
26.1 Introduction	360
26.2 A Method for Solving Constrained Linear-Quadratic Problems (Abstract Theory)	360
26.3 Linear-Quadratic Deterministic Infinite-Horizon Constrained Optimization Problem	365
26.4 Linear-Quadratic Stochastic Infinite-Horizon Optimization Problem with White-Noise Disturbance	372
26.5 Appendix. (Discrete KYP-Lemma.) The Frequency-Domain Method to Solve Discrete Lur'e-Riccati Equations	378
26.6 References	381
