

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Historical Survey	2
1.2	Patterns in Nonlinear Optical Resonators	4
1.2.1	Localized Structures: Vortices and Solitons	6
1.2.2	Extended Patterns	8
1.3	Optical Patterns in Other Configurations	11
1.3.1	Mirrorless Configuration	11
1.3.2	Single-Feedback-Mirror Configuration	12
1.3.3	Optical Feedback Loops	12
1.4	The Contents of this Book	15
	References	19
<b>2</b>	<b>Order Parameter Equations for Lasers</b>	33
2.1	Model of a Laser	34
2.2	Linear Stability Analysis	36
2.3	Derivation of the Laser Order Parameter Equation	41
2.3.1	Adiabatic Elimination	41
2.3.2	Multiple-Scale Expansion	46
	References	48
<b>3</b>	<b>Order Parameter Equations for Other Nonlinear Resonators</b>	51
3.1	Optical Parametric Oscillators	51
3.2	The Real Swift–Hohenberg Equation for DOPOs	52
3.2.1	Linear Stability Analysis	52
3.2.2	Scales	53
3.2.3	Derivation of the OPE	54
3.3	The Complex Swift–Hohenberg Equation for OPOs	55
3.3.1	Linear Stability Analysis	56
3.3.2	Scales	57
3.3.3	Derivation of the OPE	57
3.4	The Order Parameter Equation for Photorefractive Oscillators	59
3.4.1	Description and Model	59
3.4.2	Adiabatic Elimination and Operator Inversion	60

3.5	Phenomenological Derivation of Order Parameter Equations .....	61
	References .....	63
<b>4</b>	<b>Zero Detuning: Laser Hydrodynamics and Optical Vortices .....</b>	<b>65</b>
4.1	Hydrodynamic Form .....	65
4.2	Optical Vortices .....	67
4.2.1	Strong Diffraction .....	68
4.2.2	Strong Diffusion .....	71
4.2.3	Intermediate Cases .....	72
4.3	Vortex Interactions .....	74
	References .....	79
<b>5</b>	<b>Finite Detuning: Vortex Sheets and Vortex Lattices .....</b>	<b>81</b>
5.1	Vortices “Riding” on Tilted Waves .....	82
5.2	Domains of Tilted Waves .....	84
5.3	Square Vortex Lattices .....	87
	References .....	90
<b>6</b>	<b>Resonators with Curved Mirrors .....</b>	<b>91</b>
6.1	Weakly Curved Mirrors .....	92
6.2	Mode Expansion .....	93
6.2.1	Circling Vortices .....	94
6.2.2	Locking of Transverse Modes .....	95
6.3	Degenerate Resonators .....	97
	References .....	102
<b>7</b>	<b>The Restless Vortex .....</b>	<b>103</b>
7.1	The Model .....	103
7.2	Single Vortex .....	105
7.3	Vortex Lattices .....	108
7.3.1	“Optical” Oscillation Mode .....	109
7.3.2	Parallel translation of a vortex lattice .....	110
7.4	Experimental Demonstration of the “Restless” Vortex .....	111
7.4.1	Mode Expansion .....	111
7.4.2	Phase-Insensitive Modes .....	113
7.4.3	Phase-Sensitive Modes .....	114
	References .....	115
<b>8</b>	<b>Domains and Spatial Solitons .....</b>	<b>117</b>
8.1	Subcritical Versus Supercritical Systems .....	117
8.2	Mechanisms Allowing Soliton Formation .....	118
8.2.1	Supercritical Hopf Bifurcation .....	119

8.2.2	Subcritical Hopf Bifurcation .....	120
8.3	Amplitude and Phase Domains .....	122
8.4	Amplitude and Phase Spatial Solitons .....	123
	References .....	124
<b>9</b>	<b>Subcritical Solitons I: Saturable Absorber .....</b>	<b>125</b>
9.1	Model and Order Parameter Equation .....	125
9.2	Amplitude Domains and Spatial Solitons .....	127
9.3	Numerical Simulations .....	129
9.3.1	Soliton Formation .....	129
9.3.2	Soliton Manipulation: Positioning, Propagation, Trapping and Switching .....	132
9.4	Experiments .....	133
	References .....	138
<b>10</b>	<b>Subcritical Solitons II: Nonlinear Resonance .....</b>	<b>139</b>
10.1	Analysis of the Homogeneous State. Nonlinear Resonance .....	139
10.2	Spatial Solitons .....	141
10.2.1	One-Dimensional Case .....	141
10.2.2	Two-Dimensional Case .....	144
	References .....	146
<b>11</b>	<b>Phase Domains and Phase Solitons .....</b>	<b>147</b>
11.1	Patterns in Systems with a Real-Valued Order Parameter ...	147
11.2	Phase Domains .....	148
11.3	Dynamics of Domain Boundaries .....	150
11.3.1	Variational Approach .....	150
11.3.2	Two-Dimensional Domains .....	152
11.4	Phase Solitons .....	155
11.5	Nonmonotonically Decaying Fronts .....	157
11.6	Experimental Realization of Phase Domains and Solitons .....	160
11.7	Domain Boundaries and Image Processing .....	163
	References .....	166
<b>12</b>	<b>Turing Patterns in Nonlinear Optics .....</b>	<b>169</b>
12.1	The Turing Mechanism in Nonlinear Optics .....	169
12.2	Laser with Diffusing Gain .....	171
12.2.1	General Case .....	172
12.2.2	Laser with Saturable Absorber .....	174
12.2.3	Stabilization of Spatial Solitons by Gain Diffusion ....	176
12.3	Optical Parametric Oscillator with Diffracting Pump .....	180

12.3.1	Turing Instability in a DOPO .....	181
12.3.2	Stochastic Patterns .....	184
12.3.3	Spatial Solitons Influenced by Pump Diffraction .....	187
	References .....	191
<b>13</b>	<b>Three-Dimensional Patterns .....</b>	<b>193</b>
13.1	The Synchronously Pumped DOPO .....	193
13.1.1	Order Parameter Equation .....	194
13.2	Patterns Obtained from the 3D Swift–Hohenberg Equation ..	196
13.3	The Nondegenerate OPO .....	200
13.4	Conclusions .....	201
13.4.1	Tunability of a System with a Broad Gain Band .....	201
13.4.2	Analogy Between 2D and 3D Cases .....	202
	References .....	202
<b>14</b>	<b>Patterns and Noise .....</b>	<b>205</b>
14.1	Noise in Condensates .....	206
14.1.1	Spatio-Temporal Noise Spectra .....	207
14.1.2	Numerical Results .....	210
14.1.3	Consequences .....	214
14.2	Noisy Stripes .....	216
14.2.1	Spatio-Temporal Noise Spectra .....	217
14.2.2	Stochastic Drifts .....	221
14.2.3	Consequences .....	223
	References .....	224

Transverse Patterns in Nonlinear Optical Resonators

Staliunas, K.; Sánchez-Morcillo, V.J.

2003, XIV, 226 p., Hardcover

ISBN: 978-3-540-00434-9
