

# Contents

<b>1</b>	<b>Introduction to Semiconductor Lasers</b>	<b>1</b>
1.1	Semiconductor Gain Media	1
1.1.1	Heterostructure Lasers	2
1.1.2	Quantum Well Semiconductor Lasers	2
1.1.3	Quantum Dot Semiconductor Lasers	3
1.2	Laser Cavities	4
1.2.1	In-Plane Edge-Emitting Lasers	4
1.2.2	Vertical-Cavity Surface-Emitting Lasers	5
1.2.3	High-Power Laser Amplifiers	6
1.2.4	Optically Pumped Lasers	7
1.3	Microlasers	7
1.3.1	Optical Microcavities	8
1.3.2	Photonic Bandgap Laser	9
	References	9
<b>2</b>	<b>Semiconductor Laser Theory:</b>	
	<b>The Maxwell–Bloch Equations</b>	<b>13</b>
2.1	Optical Field Dynamics	15
2.2	Carrier Dynamics	18
2.3	Temperature Dynamics	21
	References	23
<b>3</b>	<b>The Active Carrier Plasma:</b>	
	<b>Ultrafast Microscopic Dynamics</b>	
	<b>and Spatio-Spectral Gratings</b>	<b>25</b>
3.1	Semiconductor Laser Maxwell–Bloch–Langevin Equations: A Dual-Field Approach	25
3.2	Nonlinear Gain and Index-Dynamics: Picosecond Pulse Propagation	28
3.2.1	Time Scales	28
3.2.2	Non-Equilibrium Wigner Distributions	29
3.3	Nonlinear Femtosecond Dynamics of Ultrashort Light Pulses	34
3.3.1	Ultrafast Gain Dynamics	35
3.3.2	Ultrafast Nonlinear Propagation Effects	37
3.3.3	Dynamic Spectral Properties	38

3.4	Ultrafast Active Phase Conjugation . . . . .	40
3.4.1	Spatio-Temporal Wave-Mixing . . . . .	40
3.4.2	Nonequilibrium Gain and Refractive Index Distributions	42
3.4.3	Spatio-Temporal Dynamics of the Phase Conjugation .	45
3.4.4	Spatio-Temporal Response of the Phase Conjugating Mirror . . . . .	46
3.5	Conclusion . . . . .	48
	References . . . . .	48
<b>4</b>	<b>High-Speed Dynamics of Semiconductor Lasers . . . . .</b>	<b>51</b>
4.1	Introduction: Transverse and Longitudinal Mode Dynamics ..	51
4.2	Multi-Mode Maxwell–Bloch Equations . . . . .	54
4.3	Transverse Coupling and of a Twin-Stripe Laser . . . . .	56
4.4	High-Frequency Modulation of Segmented Contact Semiconductor Lasers . . . . .	59
4.5	Conclusion . . . . .	63
	References . . . . .	64
<b>5</b>	<b>Polarization Fluctuations and Dynamics of Vertical-Cavity Surface-Emitting Lasers . . . . .</b>	<b>65</b>
5.1	Spatially Resolved Polarization and Temperature Dynamics in Quantum Well Vertical-Cavity Surface-Emitters . . . . .	66
5.1.1	Light-Field Dynamics and Carrier Transport . . . . .	67
5.1.2	Bloch Equations for Quantum Well Vertical-Cavity Surface-Emitting Lasers . . . . .	68
5.1.3	Spatio-Temporal Dynamics . . . . .	76
5.2	Polarization fluctuations in VCSELs . . . . .	79
5.2.1	The ‘Split-Density’ Rate Equation Model . . . . .	79
5.2.2	Spin Dynamics . . . . .	82
5.2.3	Fluctuation Dynamics of the Non-Lasing Polarization .	83
5.2.4	Amplified Spontaneous Emission Spectra of the Non-Lasing Polarization . . . . .	84
5.2.5	Fluctuations of the Stokes Parameters . . . . .	87
5.2.6	Spectra at the Spin Flip Transition . . . . .	89
5.3	Conclusion . . . . .	92
	References . . . . .	93
<b>6</b>	<b>Nonlinear Pulse Propagation and Solitons in Active Semiconductor Media . . . . .</b>	<b>95</b>
6.1	Pulse Propagation in Nonlinear Semiconductor Media . . . . .	96
6.1.1	Dynamic Pulse Shaping . . . . .	96
6.1.2	Spatial Amplification and Wave-Guiding . . . . .	99
6.2	Solitons in Partially Coherent Active Semiconductor Media ..	102
6.2.1	Spatio-Temporal Refractive Index and Gain Dynamics	105
6.2.2	Dynamic Spatio-Spectral Dispersion Compensation ...	107

6.3	Conclusion .....	109
	References .....	109
<b>7</b>	<b>Spatio-Spectral Wave Mixing in High-Power Amplifier and Laser Systems .....</b>	<b>113</b>
7.1	Introduction .....	113
7.2	Modelling of Optical Injection .....	114
7.3	Continuous-Wave Laser Amplifiers .....	115
7.3.1	Spatio-Spectral Wave Mixing .....	116
7.3.2	Optimization of the Tapered Geometry .....	119
7.4	Laser Amplifiers with Pulsed Injection .....	130
7.4.1	Dynamic Wave Mixing and Pulse Shaping .....	131
7.4.2	Dynamics of Induced and Spontaneous Emission .....	133
7.4.3	Self Phase Modulation .....	136
7.5	Conclusion .....	139
	References .....	141
<b>8</b>	<b>Mesoscopic Theory for Quantum Dot Lasers .....</b>	<b>147</b>
8.1	Introduction .....	147
8.2	Theoretical Description:	
	Quantum Dot Maxwell–Bloch Equations .....	148
8.2.1	Carrier Dynamics Within a Quantum Dot .....	150
8.2.2	Carrier Relaxation Dynamics .....	151
8.2.3	Optical Field Dynamics: Counterpropagation and Diffraction .....	160
8.3	Coupled Spatio-Temporal Light Field and Inter/Intra-Level Carrier Dynamics in Quantum Dot Lasers .....	163
8.3.1	Spatio-Temporal Light Field Dynamics: Interplay of Spontaneous and Induced Emission .....	164
8.3.2	The Spatially Inhomogeneous Quantum Dot Ensemble: Influence of Disorder .....	168
8.3.3	Ultrashort Pulse Propagation in a Quantum Dot Waveguide .....	171
8.3.4	Inter and Intra-Level Carrier Dynamics of the Quantum Dot Ensemble .....	173
8.3.5	Luminescence of Optically Excited Quantum Dot Media .....	175
8.4	Conclusion .....	179
	References .....	180
<b>9</b>	<b>Delayed Optical Feedback and Control of Spatio-Temporal Dynamics .....</b>	<b>181</b>
9.1	Introduction:	
	Spatio-Temporally Chaotic Semiconductor Lasers .....	181

9.2	Transverse Lang–Kobayashi Model for Coupled Lasers . . . . .	182
9.3	Eigenmode Analysis . . . . .	183
9.4	Stabilization of Chaotic Laser Arrays . . . . .	184
9.5	Spatially Structured Delayed Optical Feedback Control . . . . .	188
9.6	Conclusion . . . . .	197
	References . . . . .	197
