About This Book	1
Acknowledgments.....	5
Part I : Smarter Business with Case-Based Decision Support	7
1. Making Smarter Business Decisions in Less Time	9
1.1 Why Case-Based Decision Support?	10
1.2 What Is Case-Based Decision Support?.....	11
1.2.1 Case-Based Reasoning.....	11
1.2.2 Knowledge Discovery and Data Mining.....	13
1.3 Successful Applications of Case-Based Decision Support	14
1.3.1 Management of Industrial Knowledge.....	14
1.3.2 Sales Support	14
1.3.3 Reliability Analysis.....	14
1.3.4 Technical Support.....	15
1.4 Benefits of Case-Based Decision Support	15
1.5 Case-Based Decision Support and Alternative Techniques	15
1.5.1 Statistics.....	16
1.5.2 Expert Systems	16
1.5.3 Databases.....	17
1.6 Development Process and Case Collection	17
1.7 How Are Cases Retrieved?	18
1.8 How Are Cases Represented?	19
2. Case-Based Reasoning Approaches.....	21
2.1 The Textual CBR Approach	22
2.2 The Conversational CBR Approach.....	23
2.3 The Structural CBR Approach	25
2.4 Comparing the Different Approaches	28
2.5 Effort Required for the Different Approaches	31
2.6 Overall Assessment of the Different CBR Approaches	33

3. Selected Applications of the Structural Case-Based Reasoning Approach.....	35
3.1 HOMER: A Case-Based CAD/CAM Help-Desk Support Tool.....	36
3.1.1 DaimlerChrysler's Motivation.....	36
3.1.2 Initial Situation at the CAD/CAM Help-Desk.....	36
3.1.3 Project Goals and Benefits.....	38
3.1.4 Knowledge Representation.....	39
3.1.5 The HOMER System.....	40
3.1.6 Users and Roles.....	44
3.1.7 Lessons Learned.....	44
3.1.8 Results Achieved.....	45
3.1.9 Summary.....	46
3.2 A Case-Based Product Catalog of Operational Amplifiers.....	47
3.2.1 The Application Development Process.....	48
3.2.2 Benefit Analysis.....	48
3.2.3 Similarity Functions Used in the Application.....	49
3.2.4 How the Software Works.....	50
3.2.5 Status of the Application.....	54
3.3 Case-Based Maintenance Support for TGV Trains.....	55
3.3.1 TGV's Environment.....	55
3.3.2 A Hierarchy of Data Models and Case Bases.....	55
3.3.3 Technical Approach for Diagnosis.....	57
3.3.4 Example of the System in Action.....	58
3.3.5 Integration into the End-User Environment.....	59
3.3.6 Status of the Application.....	61
3.4 The Fraunhofer IESE Experience Factory.....	61
3.4.1 Fraunhofer IESE's Motivation.....	61
3.4.2 Initial Situation.....	62
3.4.3 Sharing Project Experience.....	63
3.4.4 Benefits of Sharing Explicitly Stored Experience.....	64
3.4.5 Organizing a Best-Practice Repository.....	64
3.4.6 Populating the Case Base.....	66
3.4.7 Envisioned Usage of Lessons Learned.....	68
3.4.8 Conclusion.....	70

Part II: Developing Case-Based Application with the INRECA Methodology 71

4. Practical Guidelines for Developing Case-Based Reasoning Applications 73

- 4.1 Define Your Measures of Success 74
- 4.2 Orient Your Customers 75
- 4.3 Get the Big Picture 76
- 4.4 Think about Maintenance 77
- 4.5 Welcome Feedback and Testing 78
- 4.6 Measure the Success 79
- 4.7 Direct Access for the Customer 80
- 4.8 Market Your Success 81
- 4.9 Expand the Scope 82

5. Professional Case-Based Reasoning Application Development 85

- 5.1 Why Do You Need the INRECA Methodology? 86
 - 5.1.1 How You Benefit from a Methodology 86
 - 5.1.2 What the INRECA Methodology Can Do for You 86
 - 5.1.3 Ensuring High-Quality Software 87
- 5.2 Foundations from Software Engineering 87
 - 5.2.1 The Experience Factory and the Quality Improvement Paradigm 88
 - 5.2.2 Software Process Modeling 90
- 5.3. The CBR Experience Base 92
 - 5.3.1 Experience Captured in Software Process Models 93
 - 5.3.2 Experience on Different Levels of Abstraction 93
- 5.4 How to Apply the INRECA Methodology to New Projects 94
- 5.5 Capturing Your Own CBR Experience 96
- 5.6 The INRECA Methodology and Quality Standards 98

6. Documenting Case-Based Reasoning Development Experience 99

- 6.1 Into the Details of Processes, Products, and Methods 100
 - 6.1.1 Software Processes: The Basic Activities 100
 - 6.1.2 Technical, Organizational, and Managerial Processes 101
 - 6.1.3 How Processes Interact 101
 - 6.1.4 Combining Processes to Process Models 103
- 6.2 Generic and Specific Descriptions 103
 - 6.2.1 Generic Descriptions 104

6.2.2	Specific Descriptions	104
6.3	Detailed Description of Process Models	105
6.3.1	Process Description Sheets	106
6.3.2	Product Description Sheets	108
6.3.3	Simple Method Description Sheets.....	108
6.3.4	Complex Method Description Sheets	111
Part III: Using the Methodology in Different Domains		107
7.	Developing Case-Based Help-Desk Support Systems for Complex Technical Equipment	115
7.1	Characteristics of Case-Based Help-Desk Support Systems.....	116
7.2	Development and Use of Case-Based Help-Desk Support Systems for Complex Technical Equipment	117
7.2.1	Managerial Processes during System Development	117
7.2.2	Organizational Processes during System Development.....	119
7.2.3	Technical Processes during System Development.....	121
7.3	Using the System	125
7.3.1	Managerial Processes during System Use	125
7.3.2	Organizational Processes during System Use.....	126
7.3.3	Technical Processes during System Use.....	126
7.4	Process Model for a Help-Desk Project	129
7.5	Impact of the Methodology in Developing and Using Help-Desk Support Systems.....	133
7.5.1	Impact of the Methodology during Project Definition.....	135
7.5.2	Impact of the Methodology during System Development	135
7.5.3	Impact of the Methodology during System Use	136
7.6	Conclusion	136
8.	Developing Intelligent Catalog Search Applications	139
8.1	Characteristics of an Intelligent Catalog Search Project	140
8.2	Vertical Platform for Catalog Search.....	141
8.2.1	Case Structure and Domain Model.....	141
8.2.2	Defining Similarity	142
8.2.3	Customer Dialogs	143
8.2.4	Integration with Product Database.....	143
8.2.5	Web Interface	144
8.3	Process Model for Catalog Search	145
8.3.1	Requirements Acquisition.....	145
8.3.2	Case Base Development	147
8.3.3	GUI Development.....	148

8.3.4	Implement CBR Engine.....	149
8.3.5	Integrate CBR and GUI	149
8.4	Benefits of the Methodology.....	150
9.	Developing Maintenance Applications	153
9.1	Characteristics of a Maintenance Application for Complex Technical Equipment.....	154
9.1.1	Typical Input and Output.....	154
9.1.2	Technical Characteristics	155
9.2	Vertical Platform for Maintenance.....	156
9.2.1	Domain Model: The Hierarchical Approach	157
9.2.2	Case Acquisition Process	158
9.3	Impact of the Methodology in a Maintenance Application of Complex Technical Equipment.....	160
9.3.1	Productivity for Building a Diagnostic Support Application.....	161
9.3.2	Quality of the Results Obtained.....	161
9.3.3	Improved Communication	162
9.3.4	Managing Decision Making.....	162
10.	Developing Experience Factory Applications.....	165
10.1	Introduction.....	166
10.2	Experience Factory Application-Development Process.....	168
10.2.1	Setting the Objectives	169
10.2.2	Setting the Subject Area	170
10.2.3	Identification of Scenarios	173
10.2.4	Development of the Experience Factory Ontology.....	175
10.2.5	Definition of Experience Recording	179
10.2.6	Implementation.....	183
10.3	Lessons Learned.....	185
10.3.1	A Systematic, Goal-Oriented Approach for Structuring Complex Experience Bases is a Must	186
10.3.2	The Process Hierarchy is a Framework for Organizing Method Libraries.....	186
10.3.3	Further Lessons Learned.....	187
10.4	Conclusion	187
A.	Compilation of INRECA Methodology Applications.....	189
A.1	ANALOG DEVICES – Sales Support for Integrated Circuits.....	189
A.2	ANSALDO – Maintaining the Metro in Naples	190
A.3	bol.com – Find Books Fast	191
A.4	DAIMLERCHRYSLER – The Intelligent Hotline	192

A.5	FM-Ultranet: Fetal Malformation Ultrasonography Training Networking Platform	193
A.6	Fraunhofer IESE – eParticipation in Software Engineering Projects (indiGo).....	194
A.7	FREIGHTLINER LLC – Online Knowledge Repository for Truck Diagnostics.....	196
A.8	GICEP ELECTRONIQUE – Diagnostic Help for Circuit Boards Used in Halogen Stove-Tops	198
A.9	IRSA – Expertise Knowledge-Base	198
A.10	LEGRAND – Rapid Cost Estimation for Plastic Parts Production.....	199
A.11	MET-ERICSSON – Analyzing Telecommunication Cards and Electronic System Test Data	200
A.12	MÜRITZ ONLINE – Tourist Information on the Internet.....	202
A.13	NATIONAL SEMICONDUCTOR – Failure Analysis of Semiconductors.....	202
A.14	NATIONAL SEMICONDUCTOR – Online Sales Support of Electronic Devices	204
A.15	Neckermann – Intelligent Product Assistant.....	205
A.16	ODENSE STEEL SHIPYARD – Improving Performances of Ship- Welding Robots	206
A.17	otto.de – Intelligent Product Search for Internet Shoppers	207
A.18	PSA PEUGEOT CITROEN – Improving Vehicle Repair to Enhance Customer Loyalty.....	209
A.19	SAG Knowledge Center – A Comfortable Way of Customer Support	210
A.20	SIEMENS – SIMATIC Knowledge Manager.....	211
A.21	SNECMA SERVICES – Troubleshooting Boeing 737 Engines.....	212
A.22	THE COMPENDIUM “PRECISION FROM RHINE-LAND- PALATINATE” – Product and Catalog on the Internet	213
A.23	VITAC – The Virtual Technical Assistant Center for SIEMENS Employees.....	213
A.24	WARTSILÄ NSD – Extending Marine Engine Life Cycles and Easing Their Maintenance	214
A.25	Worldwide Content Network for Bertelsmann Created with Retrieval Technology	215
Glossary		217
