

## CONTENTS

### Chapter 1 Fluids

G.A. BIRD: The effect of noise and vibration on separated flow regions in hypersonic flow .....	1
H. M. BLACKBURN: Computational bluff body fluid dynamics and aeroelasticity .....	10
S. CANDEL, S. DUCRUIX, T. SCHULLER and D. DUROX: Dynamics and control of flames interacting with pressure waves .....	24
P. LE QUÉRÉ, E. GADOIN, O. DAUBE, S. XIN and L. TUCKERMAN: A general method for studying the hydrodynamic stability of flows in enclosures .....	38

### Chapter 2 Structures

A. DERVIEUX, B. KOOBUS, E. SCHALL, R. LARDAT and C. FARHAT: Application of unsteady fluid-structure methods to problems in aeronautics and space .....	57
J.-P. GRISVAL: Numerical simulation in aeroelasticity for complex configurations in a transonic flow .....	71
K. HOURIGAN, I. McBEAN, M. THOMPSON and FENG LUI: Numerical prediction of flow instabilities and aeroelastic effects .....	87
M.L. SCOTT, M.Q. NGUYEN, D.J. ELDER, J. BAYANDOR, S.P. RAJBHANDARI and R.S. THOMSON: Explicit finite element modelling of impact events on composite aerospace structures .....	101
LIYONG TONG and DONGCHANG SUN: Dynamics and control of smart structures using piezoelectric actuators and sensors .....	115
P. TRIVAILO and T. GILBERT: Overview of nonlinear finite element modelling of flexible manoeuvring aerospace structures .....	129

### Chapter 3 Electromagnetics

S.J. ANDERSON: Inverse problems in HF radar .....	143
C. CALNIBALOSKY: Antenna integration on aircraft; needs and methodology .....	158
F. COLLINO and B. DESPRÉS: An iterative method for time-harmonic integral Maxwell's equations .....	171
JUNWEI LU: High performance computation and visualization of EMs using an integrated computation system .....	182

## Chapter 4 Optimisation

S.A. DUNN: Genetic algorithm optimisation of mathematical models – an aircraft structural dynamics case study .....	197
O. PIRONNEAU and B. MOHAMMADI: Techniques for optimal shape design .....	211
M. SEFRIQUI, E. WHITNEY, J. PERIAUX and K. SRINIVAS: Evolutionary algorithms for multi-objective design optimisation .....	224

## Chapter 5 Mathematical Methods and Tools

C. GRANDMONT and Y. MADAY: Some remarks on fluid-structure interaction problems in case of rigid body plus small perturbations .....	239
JOHN KOT: An investigation of the least-squares finite element method in electromagnetism .....	251
A.N. STOKES, N.G. BARTON, X.-L. LUO and Z. ZHU: Fluids, finite elements and multi-physics .....	262

## Chapter 6 Aircraft design

F. CHALOT, T. FANION, M. MALLET, M. RAVACHOL, and G. ROGE: Status and future challenges of CFD in a coupled simulation environment for aircraft design .....	277
K.C. WONG: Challenges in development of mini and micro air vehicles..	287

## Round Table Discussion

Future tools for design and manufacture of innovative products in the aeronautics industry .....	299

Coupling of Fluids, Structures and Waves in Aeronautics

Proceedings of a French-Australian Workshop in

Melbourne, Australia 3-6 December 2001

Barton, N.G.; Périaux, J. (Eds.)

2003, XII, 318 p., Hardcover

ISBN: 978-3-540-40222-0
