

# Table of Contents

<b>1 A Guide to the Book</b>	
<i>Jean-Pierre Rozelot</i> .....	1
<b>2 The Figure of the Sun, Astrophysical Consequences.</b>	
<b>A Tutorial</b>	
<i>Jean-Pierre Rozelot, Sandrine Lefebvre</i> .....	4
2.1 Introduction.....	4
2.2 Basic Definitions .....	5
2.3 What Could Be the Definitions of the Figure of the Sun? .....	11
2.4 Why Is It Important to Study the Figure of the Sun?.....	13
2.5 Why Is It Difficult to Model and to Observe the Figure of the Sun? ..	15
2.6 Taking into Account the Rotation.....	16
2.7 Confrontation with Observations and Other Available Values .....	24
2.8 Conclusion .....	25
References .....	25
<hr/>	
<b>Part I Solar Oscillations</b>	
<hr/>	
<b>3 Helioseismology:</b>	
<b>A Fantastic Tool to Probe the Interior of the Sun</b>	
<i>Maria Pia Di Mauro</i> .....	31
3.1 Introduction.....	31
3.2 Theoretical Approach to Helioseismology.....	32
3.3 Propagation of Solar Oscillations.....	37
3.4 Helioseismic Investigations .....	40
3.5 Helioseismic Inversion .....	45
3.6 Inversions for the Solar Structure .....	49
3.7 Dynamics of the Sun .....	56
3.8 Seismology of the Fine Structure: Solar Asphericities .....	60
3.9 Concluding Remarks .....	62
References .....	63
<b>4 Detection of Solar Eigenmodes</b>	
<i>Bernard Gelly</i> .....	68
4.1 Physics of the Solar Eigenmodes .....	68
4.2 Instruments and Data .....	72

4.3 Spectral Densities and Modes .....	86
4.4 Amplification of Brightness Oscillations Using the Solar Limb .....	95
References .....	101

---

**Part II Variations in the Solar Irradiance**

---

<b>5 Solar Ultraviolet Irradiance: Origins, Measurements, and Models</b>	
<i>Linton Floyd</i> .....	109
5.1 Introduction .....	109
5.2 Why We Study the Solar UV Irradiance .....	109
5.3 Concepts and Definitions .....	110
5.4 Solar UV Spectrum: Origin, Description, and Variation .....	112
5.5 Solar UV Measurements .....	116
5.6 Measurement Accuracy .....	120
5.7 Measurement Strategies .....	122
5.8 Models of the Solar UV Irradiance .....	122
5.9 Discussion and Conclusions .....	125
References .....	127

**6 Total Solar and Spectral Irradiance Variations  
from Near-UV to Infrared**

<i>Judit M. Pap</i> .....	129
6.1 Introduction .....	129
6.2 Climate Implications .....	131
6.3 Measurements of Total Solar Irradiance .....	133
6.4 Measurements of Spectral Irradiance from Near-UV to Infrared .....	135
6.5 Irradiance Variations and Their Origin .....	141
6.6 Effect of Magnetic Field Variations on Solar Irradiance .....	144
6.7 Discussions and Perspectives .....	149
References .....	152

---

**Part III Measurement of the Solar Diameter**

---

**7 Atmospheric Turbulence and Solar Diameter Measurement**

<i>Abdenour Irbah, Abd-Errezak Bouzid, Lyes Lakhal, Nassim Seghouani, Julien Borgnino, Christian Delmas, Francis Laclare</i> .....	159
7.1 Introduction .....	159
7.2 Basic Properties of Atmospheric Turbulence .....	160
7.3 Parameter Estimation of the Observation Conditions .....	165
7.4 Atmospheric Effects on Solar Diameter Measurements .....	169
7.5 Conclusion .....	177
References .....	178

**8 Solar Astrometry with the Astrolabe of Santiago**

<i>Fernando Noël</i> .....	181
8.1 Introduction .....	181
8.2 The Danjon Astrolabe and the Method of Equal Altitudes .....	182
8.3 Observations of the Sun with the Astrolabe of Santiago .....	183
8.4 Results of Semidiameter Measurements .....	185
8.5 Discussion and Conclusions .....	190
References .....	194

**9 Measurements of the Sun's Radius at Calern Observatory**

<i>Christian Delmas</i> .....	196
9.1 Introduction .....	196
9.2 The Solar Astrolabe .....	196
9.3 DORAYSOL .....	202
9.4 Prospective .....	207
9.5 Annex 1: The Spherical Triangle .....	208
9.6 Annex 2: The Parallax .....	210
9.7 Annex 3: Time-Scales .....	211
9.8 Annex 4: Atmospheric Refraction .....	213
9.9 Annex 5: Heliographic Latitude .....	213
References .....	216

The Sun's Surface and Subsurface  
Investigating Shape and Irradiance  
Rozelot, J.-P. (Ed.)  
2003, XX, 218 p. 14 illus., Hardcover  
ISBN: 978-3-540-44188-5
