

# Contents

## **The Super-Resolution Near-Field Structure and Its Applications**

Junji Tominaga .....	1
1. The Optical Near-Field and Its Application for High-Density Data Storage .....	1
2. Basic Principle of the Near-Field Optical Readout .....	2
3. Super-Resolution Near-Field Structure .....	5
4. Recording Mark Trains and Surface Plasmons in Optical Data Storage .....	10
5. Local Plasmon Photonic Transistor and Scattering .....	12
6. Potential of Super-RENS in Future .....	19
References .....	21

## **Near-Field Optical Properties of Super-Resolution Near-Field Structures**

Din Ping Tsai .....	23
1. Introduction .....	23
2. Tapping-Mode Tuning-Fork Near-Field Scanning Optical Microscopy ..	24
3. Near-Field Imaging of the Sb-Type Super-Resolution Near-Field Structure .....	26
4. Near-Field Imaging of the AgO <sub>x</sub> -Type Super-Resolution Near-Field Structure .....	29
5. Summary .....	32
References .....	32

## **Super-RENS Media Using Alternative Recording Systems**

Jooho Kim .....	35
1. Super-RENS with a Magneto-Optical Recording System .....	35
1.1. Introduction .....	35
1.2. Preparation .....	36
1.3. Results and Discussion .....	37

2. Super-RENS with Reactive Diffusion Recording System ..... 40

    2.1. Introduction ..... 41

    2.2. Preparation ..... 42

    2.3. Results and Discussion ..... 42

References ..... 47

**Metal-Doped Silver Oxide Films as a Mask Layer  
for the Super-RENS Disk**

Takayuki Shima, Dorothea Büchel, Christophe Mihalcea,  
Jooho Kim, Nobufumi Atoda, and Junji Tominaga ..... 49

1. Introduction ..... 49

2. Silver Oxide Film ..... 50

    2.1. Film Preparation ..... 50

    2.2. Thermal Decomposition Process ..... 51

3. Metal-Doped Silver Oxide Film ..... 53

    3.1. Film Preparation ..... 53

    3.2. Thermal Decomposition Process ..... 53

4. As a Mask Layer in the Super-RENS Disk ..... 55

5. Summary ..... 56

References ..... 57

**Transient Optical Properties of the Mask Layer  
for the Super-RENS System**

Toshio Fukaya and Dorothea Büchel ..... 59

1. Introduction ..... 59

2. Experimental ..... 61

    2.1. Transmittance and Reflectance Versus  
        Input Light Power Measurement of Sb Thin Films  
        in a Microscopic Area ..... 62

    2.2. Time Response Properties of Sb Films and AgOx Films ..... 62

    2.3. Spectral Changes of Sb Film and AgOx Film ..... 64

    2.4. Light Scattering Properties of AgOx Films ..... 67

    2.5. Relation between Rayleigh and Raman Scattering ..... 68

3. Discussion ..... 71

4. Conclusion ..... 75

References ..... 77

**A Thermal Lithography Technique Using a Minute Heat Spot  
of a Laser Beam for 100 nm Dimension Fabrication**

Masashi Kuwahara, Christophe Mihalcea, Nobufumi Atoda,  
Junji Tominaga, Hiroshi Fuji, and Takashi Kikukawa ..... 79

1. Introduction ..... 79

2. Technique ..... 80

3. Experiment .....	82
References .....	85

### **New Structures of the Super-Resolution Near-Field Phase-Change Optical Disk and a New Mask-Layer Material**

Lu Ping Shi and Tow Chong Chong .....	87
---------------------------------------	----

1. Introduction .....	87
2. Description of the Reading and Recording Process for the Super-RENS and the Requirements for the Mask-Layer Material and the Super-RENS .....	89
2.1. Description of the Reading and Recording Process for the Super-RENS .....	89
2.2. Requirements for the Mask Layer .....	91
3. New Mask Material .....	91
4. New Structures .....	92
5. Theoretical Simulation .....	92
5.1. Optical Simulation .....	93
5.2. Thermal Simulation .....	95
6. Fabrication of the Disk .....	100
7. Measurement Results .....	100
7.1. Thermal Stability .....	100
7.2. Super-RENS Effect .....	102
8. Possible Mechanism of the Super-RENS .....	103
9. Conclusions .....	105
References .....	106

### **Polarization Dependence Analysis of Readout Signals of Disks with Small Pits Beyond the Resolution Limit**

Takashi Nakano, Hisako Fukuda, Junji Tominaga, and Takashi Kikukawa .....	109
--	-----

1. Introduction .....	109
2. Polarization Dependence of Readout Signals of Super-RENS Disks ..	110
2.1. Simulation Model of a Super-RENS Disk .....	111
2.2. Intensity and Signal Distribution at the Exit Pupil Plane .....	112
2.3. Read-Out Signal Properties of a Super-RENS Disk .....	114
3. Polarization Dependence of the Read-Out Signals of the Super-ROM Disk .....	115
3.1. Simulation Model of a Super-ROM Disk .....	116
3.2. Simulation Results of a Model with 2T Pit Pattern .....	116
4. Conclusion .....	118
References .....	118

**Signal Power in the Angular Spectrum  
of AgOx SuperRENS Media**

Tom Milster, John J. Butz, Takashi Nakano, Junji Tominaga,  
and Warren L. Bletscher .....119

1. Introduction ..... 119

2. Signal Power in the Angular Spectrum ..... 121

3. Simulation ..... 123

    3.1. Scalar Model Configuration ..... 123

4. Scalar Results in Reflection ..... 125

5. Scalar Results in Transmission ..... 127

6. FDTD Results in Reflection ..... 131

7. Experimental Procedure ..... 132

8. Experimental Results ..... 133

9. Conclusions ..... 137

References ..... 138

**Super-Resolution Scanning Near-Field Optical Microscopy**

Ulrich C. Fischer, Jörg Heimel, Hans-Jürgen Maas, Harald Fuchs,  
Jean Claude Weeber, and Alain Dereux .....141

1. Introduction ..... 141

2. Experimental Scheme ..... 142

3. Imaging of Photonic Nanopatterns ..... 142

4. On the Mechanism of Tip Excitation ..... 144

5. Highly Resolved SNOM Images of the Granular Structure  
    of a Gold Film ..... 145

6. Interpretation of the Experimental Images ..... 147

7. Discussion ..... 148

References ..... 151

**Optical Tunneling Effect and Surface Plasmon Resonance  
from Nanostructures in a Metallic Thin Film**

Wei-Chih Liu .....153

1. Introduction ..... 153

2. One-Dimensional Theoretical Models ..... 155

3. SPP and LSP Resonance in the One-Dimensional  
    Deep-Grooved Grating ..... 157

4. Implications for Randomly Distributed Grooves  
    and Non-periodic Grooves ..... 159

5. Conclusions ..... 161

References ..... 161

## **Coherent Spontaneous Emission of Light Due to Surface Waves**

Jean-Jacques Greffet, Remi Carminati, Karl Joulain, Jean-Philippe Mulet, Carsten Henkel, Stephane Mainguy, and Yong Chen .....	163
1. Introduction .....	163
2. Spectral Properties of Emitted Thermal Near Fields .....	164
2.1. Spectrum of the Thermally Emitted Light .....	164
2.2. Examples: Near-Field Thermal Emission of SiC and Glass .....	165
2.3. Potential Applications .....	169
3. Radiative Heat Transfer at Nanometric Distances .....	170
3.1. Introduction .....	170
3.2. Contribution of Resonant Surface Waves .....	171
4. Spatial Coherence of Thermal Sources in the Near Field .....	174
4.1. Exact Calculations of the Spatial Correlation of the Field .....	174
4.2. Qualitative Discussion .....	176
5. A Spatially Coherent Thermal Source .....	178
6. Conclusions .....	181
References .....	182

## **Plasmon Resonances in Nanowires with a Non-regular Cross-Section**

Olivier J.F. Martin .....	183
1. Introduction .....	183
2. Model .....	186
2.1. Metals at Optical Frequencies .....	186
2.2. Scattering Problem .....	187
3. Relation Between Shape and Resonance Spectrum .....	190
4. Polarization Charge Distributions .....	192
5. Field Enhancement and SERS .....	196
6. Influence of the Model Permittivity and of the Background .....	201
7. Conclusions and Outlook .....	203
References .....	204

<b>Index</b> .....	211
