

Contents

1. Introduction	1
2. Wave Motion	3
2.1 What is Wave Motion?	3
2.2 Dispersive and Nonlinear Effects of a Wave	4
2.3 Solitary Waves and the Korteweg de Vries Equation	5
2.4 Solution of the Korteweg de Vries Equation	7
3. Lightwave in Fibers	11
3.1 Polarization Effects	11
3.2 Plane Electromagnetic Waves in Dielectric Materials	12
3.3 Kerr Effect and Kerr Coefficient	14
3.4 Dielectric Waveguides	15
4. Information Transfer in Optical Fibers and Evolution of the Lightwave Packet	19
4.1 How Information is Coded in a Lightwave	19
4.2 How Information is Transferred in Optical Fibers	20
4.3 Master Equation for Information Transfer in Optical Fibers: The Nonlinear Schrödinger Equation	23
4.4 Evolution of the Wave Packet Due to the Group Velocity Dispersion	25
4.5 Evolution of the Wave Packet Due to the Nonlinearity	26
4.6 Technical Data of Dispersion and Nonlinearity in a Real Optical Fiber	27
4.7 Nonlinear Schrödinger Equation and a Solitary Wave Solution	29
4.8 Modulational Instability	32
4.9 Induced Modulational Instability	37
4.10 Modulational Instability Described by the Wave Kinetic Equation	38
5. Optical Solitons in Fibers	41
5.1 Soliton Solutions and the Results of Inverse Scattering	41
5.2 Soliton Periods	44

5.3	Conservation Quantities of the Nonlinear Schrödinger Equation	44
5.4	Dark Solitons	45
5.5	Soliton Perturbation Theory	49
5.6	Effect of Fiber Loss	52
5.7	Effect of the Waveguide Property of a Fiber	53
5.8	Condition of Generation of a Soliton in Optical Fibers	57
5.9	First Experiments on Generation of Optical Solitons	58
6.	All-Optical Soliton Transmission Systems	61
6.1	Raman Amplification and Reshaping of Optical Solitons-First Concept of All-Optical Transmission Systems	61
6.2	First Experiments of Soliton Reshaping and of Long Distance Transmission by Raman Amplifications	64
6.3	First Experiment of Soliton Transmission by Means of an Erbium Doped Fiber Amplifier	67
6.4	Concept of the Guiding Center Soliton	68
6.5	The Gordon-Haus Effect and Soliton Timing Jitter	71
6.6	Interaction Between Two Adjacent Solitons	73
6.7	Interaction Between Two Solitons in Different Wavelength Channels	74
7.	Control of Optical Solitons	77
7.1	Frequency-Domain Control	77
7.2	Time-Domain Control	82
7.3	Control by Means of Nonlinear Gain	86
7.4	Numerical Examples of Soliton Transmission Control	90
8.	Influence of Higher-Order Terms	97
8.1	Self-Frequency Shift of a Soliton Produced by Induced Raman Scattering	98
8.2	Fission of Solitons Produced by Self-Induced Raman Scattering	99
8.3	Effects of Other Higher-Order Dispersion	100
9.	Polarization Effects	103
9.1	Fiber Birefringence and Coupled Nonlinear Schrödinger Equations	103
9.2	Solitons in Fibers with Constant Birefringence	106
9.3	Polarization-Mode Dispersion	111
9.4	Solitons in Fibers with Randomly Varying Birefringence	115

10. Dispersion-Managed Solitons (DMS)	123
10.1 Problems in Conventional Soliton Transmission.....	123
10.2 Dispersion Management with Dispersion-Decreasing Fibers ..	124
10.3 Dispersion Management with Dispersion Compensation	127
10.4 Quasi Solitons	136
11. Application of Dispersion Managed Solitons for Single-Channel Ultra-High Speed Transmissions	141
11.1 Enhancement of Pulse Energy	141
11.2 Reduction of Gordon–Haus Timing Jitter	144
11.3 Interaction Between Adjacent Pulses	147
11.4 Dense Dispersion Management	151
11.5 Nonstationary RZ Pulse Propagation	152
11.6 Some Recent Experiments	155
12. Application of Dispersion Managed Solitons for WDM Transmission	159
12.1 Frequency Shift Induced by Collisions Between DM Solitons in Different Channels	159
12.2 Temporal Shift Induced by Collisions Between DM Solitons in Different Channels	161
12.3 Doubly Periodic Dispersion Management	164
12.4 Some Recent WDM Experiments Using DM Solitons	166
13. Other Applications of Optical Solitons	169
13.1 Soliton Laser.....	169
13.2 Pulse Compression	173
13.3 All-Optical Switching	176
13.4 Solitons in Fibers with Gratings	180
13.5 Solitons in Microstructure Optical Fibers	184
References	188
Index	197

Optical Solitons in Fibers

Hasegawa, A.; Matsumoto, M.

2003, IX, 201 p., Hardcover

ISBN: 978-3-540-43695-9
