
Table of Contents

1	Introduction	1
1.1	General	1
1.2	Global Nuclear Power	2
1.3	Nuclear Resources	3
1.4	Technological Forecasts	5
1.5	Summary	6
	Further Reading	6
2	Chemistry, Metallurgy, Mineralogy and Mining	7
2.1	Chemistry	7
2.2	Metallurgy	9
2.2.1	General	9
2.2.1.1	Nuclear Properties	11
2.2.1.2	Physical Properties	12
2.2.1.3	Thermal Properties	13
2.2.1.4	Mechanical Properties	13
2.2.2	Primary Irradiation Effects	13
2.2.2.1	Irradiation and Thermal Cycling Growths	14
2.2.2.2	Irradiation Swelling	14
2.2.2.3	Irradiation Creep	15
2.2.3	Summary	15
2.3	Mineralogy	17
2.3.1	Introduction	17
2.3.1.1	Earth Materials	17
2.3.1.2	Rocks and Minerals	18

2.3.1.3	Rock-Forming Minerals	19
2.3.1.4	Definition of Minerals	20
2.3.1.5	Geochemical Classification of the Elements .	22
2.3.1.6	Mineral Formation and the Phase Rule	24
2.3.1.7	Mineral Deposits	25
2.3.1.8	Industrial Deposits	25
2.3.1.9	Ore, Ore Deposit or Orebody	26
2.3.1.10	Gangue Minerals	30
2.3.1.11	Ore Mineral	31
2.3.1.12	Abundance and Concentration	34
2.3.1.13	Mineral Deposits – Types and Formation ..	36
	2.3.1.13.1 Magmatic Deposits	37
	2.3.1.13.2 Pegmatitic Deposits	38
	2.3.1.13.3 Hydrothermal Deposits	39
	2.3.1.13.4 Exhalative Deposits	41
	2.3.1.13.5 Deposits Formed by Sedimentary Processes	42
	2.3.1.13.6 Supergene Enrichment	48
	2.3.1.13.7 Metamorphic Deposits	49
	2.3.1.13.8 Contact-Metasomatic Deposits ...	50
2.3.2	Uranium Mineralogy	51
2.3.2.1	Mineralogical Crustal Chemistry and Abundance	53
2.3.2.2	Formation of Uranium Deposits	56
2.3.2.3	Time Bound Characteristics of Uranium Deposits	58
2.3.2.4	Classification of Uranium Deposits	59
2.3.2.5	Ore Reserves and Mineral Resources	61
	2.3.2.5.1 Primary Sources	63
	2.3.2.5.2 Secondary Sources	65
2.4	Uranium Mining	72
2.4.1	A General Account	72
2.4.2	Mining Methods	73
	2.4.2.1 Open Pit Mining and Quarrying	74
	2.4.2.2 Dredging	75
	2.4.2.3 Underground Mining	76
	Further Reading	81

3 Uranium Resource Dissolution	83
3.1 Introduction	83
3.2 Leaching	84
3.2.1 Acid Leaching	89
3.2.1.1 Acid Leaching Chemistry	89
3.2.1.2 Chemical Response of Minerals	91
3.2.1.3 Leaching Parameters	92
3.2.1.4 Leach Process Patterns	93
3.2.2 Alkaline Leaching	97
3.2.2.1 Alkaline Leaching Chemistry	98
3.2.2.2 Process Parameters	100
3.2.2.3 Pachuca Leaching by Carbonate Process	100
3.2.3 Pressure Leaching	100
3.2.3.1 Acid Pressure Hydrometallurgy	102
3.2.3.2 Alkaline Pressure Hydrometallurgy	104
3.2.4 Novel Separation Methods	105
3.2.4.1 Solvent Leaching	105
3.2.4.2 Bioleaching	106
3.2.4.3 In Situ Leaching	111
3.2.4.3.1 Introduction	111
3.2.4.3.2 Techniques	112
3.2.4.3.3 Parameters	112
3.2.4.3.4 ISL Systems	117
3.2.4.3.5 Commercial Exposure	122
3.2.4.3.6 Penetrative ISL	124
3.2.4.3.7 PNE-ISL System	125
3.2.4.4 Heap or Dump Leaching	129
Further Reading	131
4 Leached Solution Processing	133
4.1 Ion Exchange	134
4.1.1 Introduction	134
4.1.2 Adsorption and Elution Principles	136
4.1.3 Chemical Reactions	138
4.1.4 Ion Exchange Materials	140
4.1.5 Ion Exchange Equipment	141
4.1.5.1 Fixed Bed Columns	141
4.1.5.2 Resin in Pulp (RIP) Systems	143

4.1.5.2.1	Basket Resin in Pulp	143
4.1.5.2.2	Screen-Mix Resin in Pulp	145
4.1.5.2.3	Suspended Bed Columns	147
4.1.5.3	Fluidised Bed Contactors	148
4.1.6	Uranium Liquor Processing	150
4.1.7	Miscellaneous Applications	154
4.1.7.1	Waste Treatment	154
4.1.7.2	Chemical Analysis	154
4.1.7.3	Chromatography	155
4.1.7.4	Membranes	156
4.2	Solvent Extraction	156
4.2.1	Introduction	156
4.2.2	Process Chemistry	158
4.2.2.1	Extractant Types	158
4.2.2.2	Solvent Characteristics	162
4.2.2.3	Leach Liquor Characteristics	168
4.2.3	Process Design	168
4.2.3.1	Graphic Presentation of Solvent Extraction	169
4.2.3.2	Contacting Equipment	175
4.2.3.2.1	Mixer Settler	178
4.2.3.2.2	Solvent-in-Pulp Extraction	182
4.2.4	Theoretical Aspects	183
4.2.4.1	Mechanisms	183
4.2.4.2	Kinetics	186
4.3	Novel Separation Methods	188
4.3.1	Gel Extraction	188
4.3.1.1	Hydrogels	188
4.3.1.2	Hydrophobic Gels	189
4.3.2	Membrane Separation	192
4.3.2.1	Bulk Liquid Membranes	193
4.3.2.2	Emulsion Liquid Membranes	193
4.3.2.3	Electrostatic Pseudo Liquid Membrane	196
4.3.2.4	Supported Liquid Membranes	196
4.3.2.5	Polymeric Incursion Membranes	197
4.3.2.6	Transport in Membrane	197
4.3.2.6.1	Co-Transport	198
4.3.2.6.2	Counter-Transport	199
4.3.2.6.3	Transport Model	200
4.3.2.7	Choice of Substrate, Membrane and Solvent	202
4.3.2.8	Applications in Hydrometallurgy	203

4.4	Precipitation	206
4.4.1	Principles	206
4.4.1.1	Crystallisation	206
4.4.1.2	Chemical Methods	207
4.4.1.2.1	Hydrolysis	208
4.4.1.2.2	Ionic Precipitation	208
4.4.1.2.3	Reduction	211
4.4.1.2.4	Substitution	219
4.4.2	Processes	219
4.4.2.1	Selection Criteria	219
4.4.2.2	Selectivity	220
4.4.2.3	Precipitation Domains	220
4.4.2.4	Product Specifications	222
4.4.2.5	Precipitation Alternatives	223
4.4.3	Process Alternatives	224
4.4.3.1	Phosphate Precipitation System	224
4.4.3.2	Ammonium Hydroxide System	224
4.4.3.3	Ammonium Uranyl Tricarbonate (AUT) System	228
4.4.3.4	Peroxide System	230
4.4.3.5	Fluoride System	233
4.4.3.6	Oxalate System	234
4.4.3.7	Urea Precipitation	235
	Further Reading	235
5	Uranium from Phosphates	239
5.1	Introduction	239
5.2	Dissolution and Products	242
5.2.1	Sulphuric Acid	243
5.2.2	Hydrochloric Acid	248
5.2.3	Nitric Acid	251
5.2.4	Dicalcium Phosphate	254
5.2.5	Carbothermy	256
5.3	Uranium Recovery	258
5.3.1	Fertilisers	259
5.3.2	Industrial Phosphates	260
5.3.3	Chloride System Residues	261
5.3.4	Acid Extraction Streams	261
5.3.5	Furnace Slag	262
5.3.6	Phosphogypsum	262

5.4 Uranium from Phosphoric Acid	266
5.4.1 Precipitation	266
5.4.2 Ion Exchange	268
5.4.3 Membrane Separation	272
5.4.3.1 Supported Liquid Membranes	272
5.4.3.2 Emulsion Liquid Membranes	273
5.4.4 Froth Flotation Processes	276
5.4.5 Solvent Extraction Processes	277
5.4.5.1 Anionic Extractants	277
5.4.5.2 Neutral Extractants	281
5.4.5.3 Acidic Extractants	282
5.4.5.3.1 Pyroacids	282
5.4.5.3.2 Phenyl Phosphoric Acids	285
5.4.5.3.3 Aliphatic Organophosphorus Acids	292
5.4.5.4 Synergistic Extraction	293
5.4.5.4.1 Tri- <i>n</i> -butyl Phosphate Synergist ..	294
5.4.5.4.2 Dibutyl Butyl Phosphonate Synergist	296
5.4.5.4.3 Tri Octyl Phosphine Oxide Synergist	299
5.4.5.4.4 Other Synergists	308
5.4.6 Solvent Extraction Flow Sheets	309
5.4.6.1 Pre-Treatment	309
5.4.6.1.1 Oxidation-Reduction	309
5.4.6.1.2 Organic Matter Separation	317
5.4.6.1.3 Suspended Solids Separation	323
5.4.6.1.4 Temperature Adjustment	329
5.4.6.1.5 Pre-Treatment: Chemical Change .	331
5.4.6.2 Post-Treatment	332
5.4.6.2.1 Entrainment Measurements	333
5.4.6.2.2 Coalescence	335
5.4.6.2.3 Coalescence Equipment	338
5.5 Industrial Scenario	341
5.6 Rare Earths and Fluorine Recoveries	349
5.6.1 Rare Earths	349
5.6.2 Fluorine Recovery	350
Further Reading	351

6 Uranium from Minor Secondary Resources	361
6.1 Uranium from Copper Resource Processing	361
6.1.1 South African Source	361
6.1.2 Australian Source	363
6.1.3 Indian Source	365
6.1.3.1 Mineralogical Composition	366
6.1.3.2 Particulate Characteristics	367
6.1.3.3 Nature of Occurrence of Uranium	368
6.1.3.4 Principles of Gravity Concentration	369
6.1.3.5 Uranium Liberation	371
6.1.3.6 Reichert Cone Concentrator	371
6.1.3.7 Bartles-Mozley Separator (BMS) and Cross-Belt Concentrator (CBC)	374
6.1.3.8 Magnetic Separation	377
6.1.4 American Source	387
6.2 Monazite	389
6.2.1 Occurrences	389
6.2.2 Monazite Processing	390
6.2.3 Uranium and Thorium Separations	395
6.2.3.1 Chemical Methods	395
6.2.3.2 Solvent Extraction	396
6.2.3.2.1 Solvents	396
6.2.3.2.2 Extraction from Chloride/Sulphate Media	397
6.2.3.2.3 Extraction from Nitrate Medium	397
6.2.4 Process Description	399
6.3 Seawater	400
6.3.1 Separation Processes	403
6.3.1.1 Constraints	403
6.3.1.2 Types of Processes	404
6.3.2 Pilot Plant Test Work	409
6.3.3 Plant Engineering	417
6.4 Coal	420
6.5 Gold Processing	423
6.6 Zirconium Sources	426
6.7 Uranium from Some Unconventional Sources	427
6.7.1 General	427
6.7.2 Uranium Scraps	428

6.7.3 Uranium Slags	430
6.7.4 Uranium Solutions	433
Further Reading	435
7 Safety Appraisals	441
7.1 Radiation and Its Control	442
7.1.1 Preliminaries	442
7.1.2 Radiation Exposures	443
7.1.3 Radiation Exposures in Industrial Operations	446
7.1.3.1 External Radiation	446
7.1.3.2 Dust	446
7.1.3.3 Radon Gas	447
7.1.4 Exposure Monitoring	447
7.1.5 Radioactive Effluent Treatment	448
7.2 Chemical Pollution and Its Control	451
7.3 Uranium Mining and Milling	454
7.4 General Safety	455
Further Reading	455
8 Addendum	457
8.1 Introduction	457
8.2 General Principles	460
8.3 Uranium in Consolidated Form	462
8.3.1 Chemical Processing	462
8.3.2 Reduction Process	474
8.3.2.1 Magnesiothermy	475
8.3.2.2 Calciothermy	484
8.4 Uranium in Powder Form	486
8.4.1 Natural Uranium	486
8.4.2 Enriched Uranium	491
8.5 Nuclear Fuel Fabrication	495
8.5.1 Introduction	495
8.5.2 General	496
8.5.3 Classifications	497

8.5.4	Manufacture of Fuel Elements	498
8.5.4.1	Metallic Fuel Elements	499
8.5.4.2	Ceramic Fuel Elements	503
	Further Reading	509
Subject Index	511
