Preface	vii
----------------------	-----

Part I. Riemannian Holonomy Groups and Calibrated Geometry

Dominic Joyce

1	Introduction	3
2	Introduction to Holonomy Groups	4
3	Berger's Classification of Holonomy Groups	10
4	Kähler Geometry and Holonomy	14
5	The Calabi Conjecture	20
6	The Exceptional Holonomy Groups	26
7	Introduction to Calibrated Geometry	31
8	Calibrated Submanifolds in \mathbb{R}^n	36
9	Constructions of SL m -folds in \mathbb{C}^m	41
10	Compact Calibrated Submanifolds	50
11	Singularities of Special Lagrangian m -folds	57
12	The SYZ Conjecture, and SL Fibrations	63

Part II. Calabi–Yau Manifolds and Mirror Symmetry

Mark Gross

13	Introduction	71
14	The Classical Geometry of Calabi–Yau Manifolds	72
15	Kähler Moduli and Gromov–Witten Invariants	93
16	Variation and Degeneration of Hodge Structures	102
17	A Mirror Conjecture	121
18	Mirror Symmetry in Practice	122
19	The Strominger–Yau–Zaslow Approach to Mirror Symmetry	140

Part III. Compact Hyperkähler Manifolds

Daniel Huybrechts

20	Introduction	163
21	Holomorphic Symplectic Manifolds	164
22	Deformations of Complex Structures	172
23	The Beauville–Bogomolov Form	177
24	Cohomology of Compact Hyperkähler Manifolds	190
25	Twistor Space and Moduli Space	196

26	Projectivity of Hyperkähler Manifolds	203
27	Birational Hyperkähler Manifolds	213
28	The (Birational) Kähler Cone	221
	References	226
	Index	237

Calabi-Yau Manifolds and Related Geometries

Lectures at a Summer School in Nordfjordeid, Norway,

June 2001

Gross, M.; Huybrechts, D.; Joyce, D. - Ellingsrud, G.;

Olson, L.; Ranestad, K.; Stromme, S.A. (Eds.)

2003, VIII, 244 p. 2 illus., Softcover

ISBN: 978-3-540-44059-8
