1	Shoulder Arthroscopy: Struggles and Successes	1
	L.L. Johnson	
1.1	Struggles	1
1.2	The Second Major Area of Problems.	2
1.3	Anatomical Landmarks	2
1.4	Anatomical Variations.	3
1.5	Glenohumeral Instability	7
1.6	Degenerative Arthritis	9
1.7	Undersurface Rotator Cuff Tears	11
1.8	The Subacromial Space	13
1.9	The Acromioclavicular Joint	14
1.10	Surgical Technique.	14
1.11	Diagnostic Arthroscopy.	15
1.12	Operative Arthroscopy	15
1.13	Rotator Cuff Disease.	17
1.14	Learning Arthroscopic Shoulder Surgery	19
1.15	New Technology	20
1.16	The Internet	21
1.17	Results and Outcomes.	21
1.18	Expanded Applications of Arthroscopic Techniques.	21
1.19	Future	21
2	Positioning of the Patient.	25
	G. Lajtai · G. Aitzetmüller D. Meyer · C. Gerber	
2.1	Lateral Decubitus Position	25
2.1.1	Procedure	25
2.1.2	Tips	27
2.1.3	Advantages of the Lateral Decubitus Position.	29
2.2	Beach-Chair Position	30
2.2.1	Procedure	30
2.3	Comparison of the Advantages and Disadvantages of the Above-Mentioned Resting Positions	30

3	Instrumentation in Shoulder Arthroscopy	31
	N.Espinosa · G. Lajtai · C. Gerber	
3.1	Introduction	31
3.2	Equipment	31
3.2.1	Operating Instruments.	31
3.3	Irrigation and Pump Systems.	38
3.3.1	The Reservoir for the Liquid	38
3.3.2	Pump Systems	39
3.3.3	Cannula Systems	40
3.4	Optical Equipment.	42
3.4.1	Light Source	42
3.4.2	Light Cables.	44
3.4.3	Arthroscopes	45
3.4.4	Cameras.	45
4	Suture Anchors.	47
	D. Meyer · G. Lajtai · C. Gerber	
4.1	Introduction	47
4.2	Types of Suture Anchors	47
4.2.1	Materials	47
4.3	Types of Insertion- and Fixation-Mechanisms in Bone	49
4.3.1	Straight Insertion.	49
4.3.2	Screw-Type Anchors	50
4.3.3	Toggling Anchors.	52
4.3.4	Expanding Anchors	52
4.4	Fixation of Soft Tissue	53
4.4.1	Suture	53
4.4.2	Knotless Anchors.	53
4.5	Performance and Failure of Suture Anchors	54
4.5.1	Pullout from Bone	54
4.5.2	Structural Failure	54
4.5.3	Suture Damage Through the Eyelet	54
4.6	Hints for Anchor Selection and Deployment	55
4.6.1	Anchor Insertion Site.	55
4.6.2	Financial Aspects.	58
4.7	Summary	58

5	Arthroscopic Knot-Tying Techniques	59	7	Arthroscopic Anatomy and Normal Variants	101
	F. Unger · G. Lajtai · D. Meyer · C. Gerber			F. Unger · G. Lajtai · C. Gerber	
5.1	Introduction	59	7.1	Introduction.	101
5.2	Terminology, Suture Material and Instruments	59	7.2	Anatomy of the Glenohumeral Joint. . . .	101
	5.2.1 Suture Materials	59		7.2.1 Biceps Tendon.	101
	5.2.2 Cannulas	60		7.2.2 Rotator Interval	103
5.3	General Guidelines and Technical Hints. . .	60		7.2.3 Humeral Head.	103
5.4	Knot Patterns.	61		7.2.4 Glenoid	104
	5.4.1 Nonsliding Knots	61		7.2.5 Glenoid Labrum.	104
	5.4.2 Sliding Knots	63		7.2.6 Joint Capsule and Glenohumeral Ligaments	105
	5.4.2.4 A Very Special Knot: The Outback Knot (Heinz Hoenecke).	67		7.2.7 Rotator Cuff	107
5.5	Causes and Suggestions for Avoiding Mistakes in Knot Tying	71		7.2.8 Subscapular Recess	110
	5.5.1 The Knot Is Not Sufficiently Tight From the Beginning	71		7.2.9 Normal Variants	110
	5.5.2 The Knot Loosens Slowly	71	7.3	Anatomy of the Subacromial Space	112
	5.5.3 Solutions, if Knots Are Loose.	71	7.4	Acromioclavicular Joint	114
5.6	Tips and Tricks	71	7.5	Course of Examination.	114
5.7	Biomechanical Studies and Discussion . . .	71		7.5.1 Glenohumeral Joint.	114
5.8	Summary	72		7.5.2 Subacromial Space	115
			7.6	Summary	116
6	Surgical Approaches.	75	8	MR Imaging of the Shoulder: Basic Introduction to MRI, What To Look For and Potential Problems	117
	G. Lajtai · G. Aitzetmüller D. Meyer · C. Gerber			G.R. Applegate	
6.1	Introduction	75	8.1	Introduction.	117
6.2	Anatomy	77	8.2	Principles of Magnetic Resonance Imaging	117
6.3	Approaches to the Glenohumeral Joint. . .	77		8.2.1 T1- and T2-Weighted Images	118
	6.3.1 Dorsal Approach	77	8.3	Quality.	118
	6.3.2 Anterior Approaches.	80		8.3.1 Equipment.	119
	6.3.3 Cranial Approach (Neviaser Portal) . .	89		8.3.2 MRI Shoulder Protocol	120
	6.3.4 Changing of Portals	90		8.3.3 Radiologic Interpretation	121
	6.3.5 The Half Pipe	91	8.4	Indications	121
6.4	Approaches to the Subacromial Space . . .	94	8.5	Normal Anatomy and Normal Variants . .	121
	6.4.1 Dorsal Subacromial Approach	94		8.5.1 Rotator Cuff	121
	6.4.2 Anterior Subacromial Approach . . .	95		8.5.2 Glenoid Labrum.	125
	6.4.3 Lateral Subacromial Approach	96		8.5.3 Sublabral Foramen	126
6.5	Approach to the Acromioclavicular Joint. .	96		8.5.4 Buford Complex.	126
	6.5.1 Superior and Transcutaneous Approach	97	8.6	MR Arthrography.	128
	6.5.2 Inferior from the Subacromial Space .	97		8.6.1 Theory	128
6.6	Impaired Visualization	98		8.6.2 Technique	128
	6.6.1 Blood Pressure Control.	98		8.6.3 Three-Dimensional MRI from an Intra-articular Perspective	129
	6.6.2 Intra-articular Filling Pressure	98			
	6.6.3 Electrocoagulation	98			
	6.6.4 Laser.	98			

9	MRI in Shoulder Instability and SLAP Lesions	131
	G.R. Applegate · S.D. Simonich	
9.1	Indications	131
9.2	Glenohumeral Ligaments	131
9.2.1	Superior Glenohumeral Ligament.	131
9.2.2	Middle Glenohumeral Ligament.	131
9.2.3	Inferior Glenoid Ligament	131
9.3	Labral Pathology	131
9.4	Specific Injuries	131
9.4.1	Bankart Lesion	132
9.4.2	HAGL Lesion.	134
9.4.3	ALPSA Lesion	136
9.4.4	GLAD Lesion.	136
9.4.5	Osteochondral Lesion of the Glenoid	136
9.4.6	Multidirectional Instability	138
9.5	Recommendations	138
9.6	SLAP Lesions	138
9.6.1	Subtypes.	138
9.7	Labral Degeneration	141
9.8	Paralabral Cysts	141
10	Arthroscopic Repairs of Instability: Anterior, Posterior, Multidirectional, and Microinstability Repairs	145
	C. K. Jones · F.H. Savoie III	
10.1	Introduction	145
10.2	Pathology	145
10.3	Anterior Instability – Historical Perspective and Results	153
10.3.1	Indications for Arthroscopic Anterior Reconstruction	154
10.3.2	Bankart Reconstruction – Surgical Technique	154
10.3.3	Postoperative Management of Bankart Repair	160
10.4	Multidirectional Instability – Historical Perspective and Results	160
10.4.1	MDI – Surgical Indications	161
10.4.2	Technique of Thermal Capsulorrhaphy and Rotator Interval Closure for MDI	161
10.4.3	Postoperative Management for Capsular Shrinkage and Rotator Interval Closure	165

10.5	Posterior Instability – Historical Perspective and Results	165
10.5.1	Posterior Instability – Operative Indications.	165
10.5.2	Operative Technique for Posterior Instability	166
10.5.3	Posterior Instability – Postoperative Management	169
10.6	Microinstability – Historical Perspective and Results	169
10.6.1	Indications for Surgery	173
10.6.2	Operative Technique for Microinstability	173
10.7	Summary	174
11	Posterior and Posteroinferior Instability.	177
	J.S. Abrams	
11.1	Introduction	177
11.2	Surgical Technique	180
11.2.1	Patient Positioning	180
11.2.2	Technical Equipment	180
11.2.3	Tips and Tricks.	181
11.2.4	Procedure	183
11.2.5	Postoperative Care	189
11.3	Summary	190
12	Minor Shoulder Instabilities.	193
	A.Castagna · A.Grasso · G.Vinanti	
12.1	Introduction	193
12.2	Etiology	193
12.3	Traumatic Minor Instability	194
12.4	Atraumatic Minor Instability	195
12.5	Anatomical-Pathological Findings	195
12.5.1	Supraspinatus Tendon Lesions.	195
12.5.2	Posterior-Superior Labrum Lesions.	196
12.5.3	Superior Labrum Lesions (SLAP Lesions).	196
12.5.4	Rotator Interval Lesions	196
12.5.5	Middle Glenohumeral Ligament Lesions	198
12.5.6	Anterior-Inferior Labrum Lesions	198
12.5.7	Inferior Glenohumeral Ligament Lesions	199
12.5.8	Posterior-Inferior Capsule Retraction	199
12.5.9	Axillary Pouch Capsular Stretch	199

12.6	Diagnosis	199
12.6.1	History	199
12.7	Clinical Exam	200
12.7.1	Range-of-Movement Evaluation	200
12.7.2	Clinical Tests	200
12.8	Imaging	201
12.9	Surgical Technique	201
12.9.1	Rotator Interval Treatment	202
12.9.2	Middle Glenohumeral Ligament Treatment	206
12.10	Postoperative Treatment	211
12.11	Summary	211

13	Pulley Lesions	213
	S. Lichtenberg · P. Habermeyer	

13.1	Introduction	213
13.1.1	Anatomy of the Pulley System	213
13.1.2	Pathoanatomy and Pathogenesis of Pulley Lesions	217
13.1.3	Diagnostic Evaluation	219
13.2	Operative Technique	219
13.2.1	Operative Treatment	219
13.3	Postoperative Rehabilitation	226
13.4	Summary	226

14	Arthroscopic Treatment of Superior Labral Lesions	229
	T. F. Murray Jr.	

14.1	Introduction	229
14.2	Classification of SLAP Lesions	231
14.3	Diagnosis	232
14.4	Treatment	233
14.4.1	Patient Set-up	233
14.4.2	Portal Placement	234
14.4.3	Diagnostic Arthroscopy	235
14.4.4	Arthroscopic Superior Labral Débridement	235
14.4.5	Superior Labral Repair	236
14.5	Pitfalls	241
14.5.1	Poor Portal Placement	242
14.5.2	Inadequate Suture Anchor Fixation	242
14.5.3	Difficult Suture Passage	242
14.5.4	Suture Entanglement	242
14.5.5	Suture Breakage	242
14.6	Rehabilitation	242
14.6.1	Orthopedic Associates of Portland SLAP Rehabilitation Protocol	243

15	Posterosuperior Impingement	245
	D. Jung	

15.1	Introduction	245
15.2	Indications	245
15.3	Preoperative Planning	245
15.4	Patient Information	245
15.5	Equipment	246
15.6	Preoperative Preparation	246
15.7	Surgical Technique	246
15.8	Postoperative Therapy	251

16	MRI Evaluation of the Rotator Cuff, Acromioclavicular Joint and Bursa	253
	G. R. Applegate · S. D. Simonich	

16.1	Impingement	253
16.1.2	Bursal Changes	253
16.1.3	Osseous Impingement	253
16.1.4	Secondary Impingement	255
16.2	Rotator Cuff Tears	255
16.2.1	Full-Thickness Tears	256
16.2.2	Partial-Thickness Tears	258
16.2.3	Subscapularis Tears	258
16.2.4	MRI Accuracy	260
16.3	Rotator Cuff Tear Size and Atrophy	260
16.4	Evaluation of the Postoperative Cuff	260
16.5	Other Rotator Cuff Issues	263
16.5.1	Acromioclavicular Joint	263
16.5.2	Biceps Pathology	263
16.5.3	Rotator Cuff Arthropathy	264
16.5.4	Greater Tuberosity Fracture	264
16.5.5	Balanced Tears	264
16.5.6	Calcific Tendinitis	266
16.5.7	Adhesive Capsulitis	267
16.5.8	Osteochondromatosis	267

17	Impingement Syndromes	269
	C. Gerber · G. Lajtai	

17.1	Types of Impingement Recognized To Be of Clinical Significance	270
17.1.1	Extra-articular Impingement	270
17.1.2	Intra-articular Impingement	275

18	Arthroscopic Subacromial Decompression	283
	G. Aitzetmüller · G. Lajtai · C. Gerber	
18.1	Introduction	283
18.2	Indications for ASD	284
18.3	Counterindications to ASD	285
18.4	Radiographic Examination	285
18.5	Surgical Technique	287
18.5.1	Surgical Instrumentarium	287
18.5.2	Positioning of the Patient	287
18.5.3	Orientation Support	288
18.5.4	Visibility	288
18.5.5	Arthroscopy of the Glenohumeral Joint	289
18.5.6	Bursoscopy	289
18.5.7	Lateral Instrument Portal	290
18.5.8	Acromioplasty	292
18.5.9	Clavicular Osteophyte	295
18.6	Postoperative Treatment	296
18.7	Complications	296
19	Arthroscopic Treatment of Rotator Cuff Calcific Tendinitis	299
	T.F. Murray Jr.	
19.1	Introduction	299
19.2	Diagnosis	299
19.3	Treatment	300
19.3.1	Nonoperative Treatment	300
19.3.2	Operative Treatment	300
19.4	Rehabilitation	304
19.5	Summary	305
20	Arthroscopic Treatment of Significant Bursal-Sided and Full-Thickness Rotator Cuff Tears	307
	T.J. Tucker · S.J. Snyder	
20.1	Introduction	307
20.2	Set-up	308
20.3	Special Equipment	308
20.4	Visualization	310
20.5	Technique	311
20.5.1	Subacromial Decompression	312
20.5.2	Arthroscopic Rotator Cuff Repair Technique for Full-Thickness Tears	319
20.5.3	Significant Bursal-Sided Tears and Bursal Flap Tears	335
20.6	Postoperative Care	337

21	Arthroscopic Resection of the Lateral Clavicle	339
	G. Aitzetmüller · G. Lajtai · C. Gerber	
21.1	Introduction	339
21.2	Indications	340
21.3	Counterindications	340
21.4	Radiographic Examination	340
21.5	Operative Technique	340
21.5.1	Positioning	340
21.5.2	Accesses	340
21.5.3	Surgical Instrumentarium	341
21.5.4	Associated Pathologies	341
21.5.5	The Acromioclavicular Joint	341
21.5.6	Soft-Tissue Débridement	342
21.5.7	Bone Resection	342
21.6	Radiological Check	347
21.7	Postoperative Treatment	347
21.8	Complications	347
22	Arthroscopic Management of Frozen Shoulders	349
	L. Neumann	
22.1	Introduction	349
22.2	Definition	349
22.3	Primary Frozen Shoulder	350
22.3.1	Epidemiology	350
22.3.2	Pathology	351
22.3.3	Pathogenesis	351
22.3.4	Associated Conditions	351
22.3.5	Clinical Presentation	352
22.3.6	Clinical Diagnosis	352
22.3.7	Differential Diagnosis	352
22.3.8	Investigations	352
22.4	Acquired Frozen Shoulder	353
22.4.1	Proximal Humerus Fractures	353
22.4.2	Degenerative Joint Diseases	353
22.4.3	Sepsis Sequelae	353
22.4.4	Surgical Sequelae	353
22.5	Treatment	354
22.5.1	Primary and Secondary Frozen Shoulder	354
22.5.2	The Acquired Frozen Shoulder	359
22.6	Rehabilitation	361
22.7	Complications	361
22.8	Summary	362

23	Arthroscopic Reconstruction of Glenoid Fractures	365
	G. Lajtai · G. Aitzetmüller	
23.1	Introduction.	365
23.2	Classification	365
23.3	Requirements.	366
23.4	Positioning	369
23.5	Surgical Technique.	369
23.6	Conclusion	377
