
Table of Contents

1	Documentation	1
	SUSANNA HÄFLIGER, PETER E. OCHSNER	
1.1	Prospectively Recorded Data	1
1.2	Retrospectively Integrated Data	2
1.3	Data Entry	2
1.4	Data Correction	3
1.5	Data Basis for this Book	3
	References	4
2	Patient Population	5
	MARTIN LÜEM	
2.1	Introduction	5
2.2	General Analysis of the Patient Population	5
2.2.1	Recorded Cases	5
2.2.2	Characteristics of the Patient Population	6
2.3	Prostheses Used	7
2.3.1	Primary Operations on the Acetabulum	7
2.3.2	Revision Operations on the Acetabulum	9
2.3.3	Primary Operations on the Femoral Shaft	9
2.3.4	Revision Operations on the Femoral Shaft	12
2.4	Frequency of Complications	13
	References	13
3	Surgical Technique	15
	PETER E. OCHSNER, ANDREAS SCHWEIZER	
3.1	Introduction	15
3.2	Concept of Total Hip Replacement According to M.E. Müller	16
3.3	Implants and Corresponding Indications	16
3.3.1	Acetabular Implants	17
	General Information on Implantation	17
	Primary Stability and Prevention of Migration Through Screw Fixation	17
	Checking the Migration of Acetabular Implants (EBRA)	20
	Acetabular Implants Used	21
	– Cemented Polyethylene Cup	21
	– Uncemented SL Cup	21

– Acetabular Reinforcement Ring	21
– Burch-Schneider Antiprotusio Cage	22
3.3.2 Selection of Femoral Implants	22
Femoral Implants Used	22
– Cemented Straight-Stem Systems	22
– Uncemented Femoral Components	26
3.4 Operation Planning	26
3.4.1 Planning Preparations	26
3.4.2 Objectives of Planning	26
3.4.3 Standard Planning for a Primary Total Hip Replacement	28
3.4.4 Planning Example for a Complex Primary Prosthesis	36
3.4.5 Planning Revision Operations	36
3.5 Preparing for the Operation	44
3.5.1 Preoperative Patient Examination	44
3.5.2 Anaesthetic Preparation	44
3.5.3 Implant and Instrument Preparation	44
3.5.4 Positioning the Patient	44
3.6 Operation Procedure for Primary Prostheses	46
3.6.1 Approach	46
3.6.2 Cup Implantation	47
3.6.3 Stem Implantation	50
3.6.4 Wound Closure	53
3.7 Surgical Procedure During Revision Operations	54
3.7.1 Approach	54
3.7.2 Prosthesis Retrieval	54
3.7.3 Reimplantation	56
3.8 Postoperative Management	56
References.....	57
 4 Postoperative Haematomas	 59
MATHIAS KLEIN, DAMIEN TOIA	
4.1 Introduction	59
4.2 Frequency	59
4.2.1 Frequency in Our Own Patients	59
4.2.2 Frequency in the Literature	60
4.3 Preventive Measures	60
4.3.1 Haematoma Prevention	60
4.3.2 Thromboprophylaxis	61
4.4 Treatment for Haematomas	61
4.4.1 Aspiration	61
4.4.2 Revision	61
4.4.3 Embolisation of Bleeding Vessels	62
4.4.4 Infected Haematomas	63
4.4.5 Duration of Hospitalisation	63
4.5 Conclusions	63
References.....	63

5	Infections	65
	MATHIAS SCHAFROTH, WERNER ZIMMERLI, MARCO BRUNAZZI, PETER E. OCHSNER	
5.1	Classification, Definitions	65
5.1.1	Exogenous vs. Haematogenous Infection	65
5.1.2	Implant-Associated Infection	66
5.1.3	Time of Manifestation of the Infection	66
5.1.4	Pathogenicity and Virulence of the Pathogens	67
5.1.5	Soft Tissue Conditions	68
5.1.6	Probability of Infection	68
5.2	Diagnosis	69
5.2.1	History and Clinical Findings	69
5.2.2	Laboratory Investigations	69
5.2.3	Imaging Procedures	69
5.2.4	Intraoperative Findings	70
5.2.5	Microbiological Investigations	70
5.2.6	Histological Investigation	72
5.2.7	(Missed) Infection in Old Age	72
5.3	Frequency	74
5.3.1	Frequency in Our Own Patients	74
5.3.2	Frequency in the Literature	74
5.4	Risk Factors	74
5.4.1	Patient-Specific Risk Factors	74
5.4.2	General Risk Factors	75
5.5	Preventive Measures	75
5.5.1	Proven Effective Measures	75
5.5.2	Presumed Effective Measures	75
5.6	Treatment of Infected Total Hip Prostheses	76
5.6.1	Surgical Management	76
5.6.2	Therapeutic Elements	82
	Débridement	82
	Irrigation-Suction Drainage	82
	Spacer Preparation	83
	Reimplantation	84
	Revision in Fluid Retention	84
	Reimplantation Long After a Girdlestone Hip	84
5.6.3	Antibiotic Therapy	84
5.6.4	Our Own Results	85
5.6.5	Comparison with Published Data	88
5.7	Concluding Remarks	88
	References	89
6	Dislocations After Total Hip Replacement	91
	GREGOR KOHLER	
6.1	Definitions, Impingement	91
6.1.1	Definitions	91
6.1.2	Impingement and Dislocation	97
6.2	Frequency	99
6.2.1	Frequency in Our Patient Population	99
6.2.2	Frequency in the Literature	101

6.3	Risk Factors	102
6.4	Preventive Measures	102
6.5	Management of Dislocations	103
6.5.1	Our Own Measures	103
6.5.2	Dislocation Management in the Literature	104
6.5.3	Overview of the Therapeutic Options for Dislocations	104
6.6	Discussion	105
6.6.1	Early Dislocations	105
6.6.2	Late Dislocations	105
	References	106

7 Periprosthetic Fissures, Fractures and Perforations of the Proximal Femoral Shaft 107

THIERRY MÜNCH

7.1	Introduction, Definitions	107
7.1.1	Fracture Types	107
7.1.2	Site	109
7.1.3	Time of Onset/Time Identified	109
7.1.4	Stability of the Prosthesis	111
7.2	Frequency	111
7.2.1	Frequency in Our Own Patients	111
7.2.2	Frequency in the Literature	113
7.3	Risk Factors	113
7.4	Preventive Measures	114
7.5	Management of Complications	114
7.5.1	Fissures and Fractures Associated with Primary Prostheses	114
	Intraoperatively Detected Fissures/Fractures	114
	Postoperatively Detected Fractures and Perforations	117
	Fractures Associated with Loose Prosthesis	119
7.5.2	Fissures and Fractures Associated with Revision Prostheses	119
7.5.3	Postoperative Management and Complications After Osteosyntheses	120
7.5.4	Results After Internal Fixation of Fissures and Fractures	120
7.5.5	Literature on the Management of Fissures and Fractures	120
7.6	Conclusions	121
	References	122

8 Trochanteric Problems 123

MARTIN SARUNGI

8.1	Introduction, Definitions	123
8.1.1	Introduction	123
8.1.2	Definitions	123
8.2	Frequency of Trochanteric Fractures and Osteotomies	126
8.2.1	Frequency in Our Own Patients	126
8.2.2	Frequency in the Literature	127
8.3	Risk Factors for Trochanteric Fractures	127
8.4	Indications for Trochanteric Osteotomies – Prevention of Trochanteric Fractures	128

8.4.1	Indications for Osteotomies of the Greater Trochanter	128
8.4.2	Prevention of Trochanteric Fractures	128
8.5	Techniques for Osteotomy and Fracture Osteosynthesis	129
8.5.1	Methods Used in Our Patients	129
8.5.2	Osteosynthesis of Trochanteric Osteotomies	129
8.5.3	Osteosynthesis of Trochanteric Fractures and Nonunions	130
8.6	Outcome for Trochanteric Fractures and Osteotomies	133
8.6.1	Nonunion Rate	133
8.6.2	Clinical Outcome	134
	References	135

9 Leg Length Discrepancies 137

ANJA S. PIRWITZ

9.1	Definitions, Classification	137
9.1.1	True Leg Length Discrepancy	137
9.1.2	Functional Leg Length Discrepancy	140
9.1.3	Mixed Form	140
9.2	Frequency in Our Own Patients	140
9.2.1	Material and Methods	140
9.2.2	Analysis of the Patient Population	140
9.3	Frequency in the Literature	142
9.4	Preventive Measures	144
9.4.1	Clinical and Radiological Recording	144
9.4.2	Preoperative Planning in Cases of Leg Length Discrepancy	144
9.4.3	Intraoperative Reference Points	145
9.5	Management of Postoperative Leg Length Discrepancy	145
9.5.1	Leg Length Discrepancy in the Immediate Postoperative Period	145
9.5.2	Leg Length Discrepancy of Gradual Onset Postoperatively	145
9.5.3	Management of Leg Length Discrepancy in the Literature	146
9.6	Conclusions	146
	References	146

10 Limping 147

PIA FERRAT

10.1	Definitions	147
10.1.1	General	147
10.1.2	Normal Gait	147
10.1.3	Limping	148
10.2	Frequency	148
10.2.1	Frequency in Our Own Patients	148
	Primary Operations	148
	Revisions	149
10.2.2	Frequency in the Literature	151
10.3	Risk Factors	152
10.4	Preventive Measures	152
10.5	Treatment	152
10.6	Discussion	153
	References	153

11	Neurological Complications	155
	YVES THOMANN, HANS RUDOLF STÖCKLI	
11.1	Definitions	156
11.1.1	The Injury Mechanisms	156
11.1.2	Severity of the Nerve Injury	156
11.1.3	Severity of Paralysis	156
11.1.4	Pain and Nerve Lesions	157
11.2	Clinical Pictures and Their Clinical Diagnosis	157
11.2.1	Sciatic Nerve	157
11.2.2	Femoral Nerve	159
11.2.3	Superior Gluteal Nerve	161
11.2.4	Obturator Nerve	163
11.2.5	Lateral Femoral Cutaneous Nerve	163
11.3	Neurological Examination	163
11.3.1	Clinical Examination	163
11.3.2	Electrophysiological Diagnosis and Methods	164
	Electrophysiological Methods	164
	Timetable and Objectives	
	in Electrophysiological Investigations	164
11.4	Frequency and Course of Neurological Complications	165
11.4.1	Incidence and Course in Our Patients	165
11.4.2	Frequency in the Literature	167
11.5	Risk Factors	169
11.6	Preventive Measures	171
11.7	Treatment of Nerve Injuries	171
11.7.1	Principles of Treatment	171
11.7.2	Therapeutic Components	171
	Positioning	171
	Physiotherapy	171
	Pain Management	172
	Orthoses	172
	Surgical Measures	172
	Electrostimulation	173
11.7.3	Accompanying Spinal Problems	173
	References	173
12	Periarticular Ossification	175
	JOACHIM VAECKENSTEDT	
12.1	Introduction	175
12.2	Definitions	176
12.3	Classification	176
12.4	Aetiology	177
12.5	Clinical and Radiological Presentation	177
12.6	Frequency	179
12.6.1	Frequency in Our Own Patients	179
12.6.2	Frequency in the Literature	180
12.7	Risk Factors	181
12.8	Preventive Measures	181
12.8.1	Overview of Possible Measures	181
12.8.2	Literature on Prophylactic Measures	181

12.9	Management of Ossification	182
12.9.1	Procedure in Our Hospital	182
12.9.2	Literature on the Management of Ossification	183
12.10	Conclusions	183
	References	184

13 Vascular Injuries 185

PETER E. OCHSNER, BERNHARD NACHBUR

13.1	Introduction, Definitions	185
13.1.1	Time of Clinical Manifestation	186
13.1.2	Type of Vascular Injury	186
13.1.3	Causes of Injury	187
13.1.4	Affected Arteries/Veins	187
13.2	Frequency	188
13.2.1	Frequency in Our Own Patients	188
13.2.2	Frequency in the Literature	188
13.3	Known Causes of Vascular Injuries	188
13.3.1	Our Own Cases	188
13.3.2	Supplied Case Studies with Fatal Outcome	189
13.3.3	Case Studies from the Literature	191
13.4	Preventive Measures	194
13.4.1	Measures to Reduce the Frequency of Injury	194
13.4.2	Prevention of Injuries During Screw Fixation of Acetabular Implants	194
	Uncemented SL Cup	194
	Acetabular Reinforcement Ring	198
	Burch-Schneider Antiprotusio Cage	198
13.4.3	General Precautionary Measures	198
13.5	Management of Vascular Injuries	198
13.5.1	Intraoperative Massive Bleeding	198
	Timely Detection	198
	Intraoperative Emergency Procedure: Lower, Anterior Lumbotomy	199
13.5.2	Detection of Postoperative Bleeding or Ischaemia	200
	References	201

14 Pain 203

PETER E. OCHSNER

14.1	Exploratory Options – Investigations	203
14.2	Pain Associated with Common Organic Complications	205
14.3	Foreign Body Sensation	205
14.4	Rare Pain Phenomena	205
14.4.1	Groin Pain	205
14.4.2	Buttock Pain	208
14.4.3	Trochanteric Pain	208
14.4.4	Thigh Pain	210
14.4.5	Scar Pain	211

14.4.6	Pain After Vascular and Nerve Injuries	211
14.4.7	Back Problems	213
14.4.8	Polymyalgia rheumatica	213
14.5.	Complex Clinical Pictures	213
	References	215

15 Revision Rates Due to Aseptic Loosening

After Primary and Revision Procedures 217

PETER E. OCHSNER, ULF RIEDE, MARTIN LÜEM,
THOMAS MAURER, RENATO SOMMACAL

15.1	Definitions	217
15.2	Plotting of Curves	218
15.3	Analysis of Revisions After Primary Operations	219
15.3.1	Overview	219
15.3.2	Femoral Components	219
	Straight-stem Prosthesis	220
	SL Prosthesis with a Rough-blasted Proximal Section	220
	Virttec Prosthesis	221
	CDH Prosthesis	221
15.3.3	Acetabular Components	221
	Polyethylene Cups	222
	Acetabular Reinforcement Ring According to M.E. Müller	222
	SL Cup, Uncemented, Types 1 and 2	223
	Burch-Schneider Antiprotusio Cage	224
15.4.	Analysis of the Re-revisions After Revision Operations	224
15.4.1	Overview	224
15.4.2	Femoral Components	224
15.4.3	Acetabular Components	225
15.5	Conclusions	225
15.5.1	Confirmed Implants	226
15.5.2	Abandoned Implants	226
15.5.3	Re-introduced Implants	226
15.5.4	Decisions Still Outstanding	226
15.5.5	Difficulty of Evaluating a Single Component as a Counterpart to a Poorer Component	226
15.5.6	Comparative Evaluation of the Kaplan-Meier and Competing-Risk Curves	226
15.5.7	Assessment of the Generous Revision Policy	227
	References	227

16 Preoperative Briefing 229

PETER E. OCHSNER

16.1	Purpose and Content of the Briefing	229
16.1.1	Benefit to Be Expected for the Patient	229
16.1.2	Alternatives	230
16.1.3	Treatment Schedule	230

16.1.4	Risks	230
16.1.5	Costs	230
16.2	General Conditions of the Briefing Discussion	231
16.2.1	Clarification of the Patient's Environment by the Doctor	231
16.2.2	Time of Briefing	231
16.2.3	The Briefing Doctor	231
16.3	Legal Aspects of Briefing	232
16.3.1	Right to Briefing	232
16.3.2	Scope	232
16.3.3	Record Keeping	232
16.4	Specific Briefing Before a Total Hip Replacement	235
16.4.1	Complications of a General Nature	235
16.4.2	Local Complications	235
16.4.3	Specific Problems in Revision Operations	236
16.4.4	Effect of Complications on Quality of Life	236
	References	236
 Subject Index		 237

Total Hip Replacement
Implantation Technique and Local Complications
Ochsner, P.E. (Ed.)
2003, XXIV, 243 p., Hardcover
ISBN: 978-3-540-43876-2
